> Seeing is Believing. Des Moines

A farmer from Funk, Neb., had specimen of fine corn at the New London, Ia., county fair and was rewarded for the exhibit by visits at his home shortly after of three men who went to see the land where the cora grew. Two of them made immediate investments.

#### Profits of the Prize Exhibit. Springfield (Mass.) Republican.

Star Pointer, the champion pacer, could not have earned much more than Mr. Bryan did shipment to the United States between now as the chief attraction at the Kansas State and the end of the year \$50,000,000 in gold fair at Wichita. When handed a check for the liberal-minded citizens of Omsha will nearly \$2,500, as his share of the receipts, Mr. Brysn frankly said that he had never before earned so much money in one day, But did he "earn" it? Has not Mr. Bryan himself said that no man could really "earn'

#### **Proposed Destruction of Seals.** Baltimore Herald

If congress shall finally order the destruc ion of the seal herds, as now seems likely the international arbitration treaty will be obliterated by the blood of harmless animals and the "brotherhood of man," which England's chief poet and greatest statesmen have prated about in modern days, will be shown up as a principle of inordinate greed who are behind the proposed state as-sociation are not interested so much in which has put forth the proud boast that it leads the world in science, art, and the graces of civilization.

#### American Manufactures Abroad. Kansas City Star.

The order for 26,000 tons of steel ralls for the Japanese government, just booked by the Illinois Steel company, ought to open the eyes of the managers of that great concern to the fact that it is worth

pay some attention to other than the home interests they are liable to rouse the markets. The production of this vast quan-dormant sentiment against the liquor tity of manufactured steel will give employment and wages to a good many men and incidentally may swell the profits of the esflict which they should do everything to tablishment to a considerable extent.

### Wheat Crap and Prices.

With the thrashing season fully at an end. the wheat crop greatly exceeds expectations, and will aggregate nearly 600,000,000 bushels. This will give 200,000,000 bushels for export and leave an ample supply for the home demand.

Fortunately for the American wheat farm-ers, the entire surplus will be needed abroad, where it is going as fast as the big steam-ships can carry it. In view of this, certainly nothing can check the rising tide of business prosperity in this country until an ample wheat crop abroad makes American wheat drug in the market once more. Whether this will happen next year is

### THE INFLOW OF GOLD.

# Giobe-Democrat: It will be noticed that in its upward movement, having just crossed the \$140,000,000 line. In April last, shortly before the gold exportation began, the reerve was \$6,000,000 higher than it is now. erve was \$6,000,000 higher than it is now. However, as gold is coming into the country at present instead of going out, and as this movement is likely to continue for several months. The reserve stands a chance to go far beyond last April's figures. Opringfield Republican: Gold to the amount of over \$4,500,000 has been engaged abroad for shipment to the United States

incertain. and for the present American wheat and British gold are changing places greatly to the gratification of American whea growers, as well as a good many other folks

### Adulteration of Food.

Pennsylvania should afford a fertile field investigation into the character and extent of the adulteration of foods and drugs which is now being undertaken by the United States Department of Agriculture. The reent collapse of a cree against a merchant charged with selling impure mustard which was due wholly to the judge's decision that mustard was not a food, the guilt of the defendant being unquestioned, is one example of the difficulties of enforcing such pure food laws as get on the statute books. There is no question that every state should have a stringent pure food and pure drug law of so omprehensive a character and at the same time so simple that convictions under it will be easy and not difficult. As it is in this state, the law of June 26, 1895, although aparently clear, is thus proved inadequate, and when the question of the milk supply is conidered, one of the most important of food upplies a great city like Philadelphia is without the full protection needed. As the department at Washington is after facts it ought not to have much difficulty in discovering in most states a very lax state of affairs indeed.

## DISHONEST PATENT AGENTS.

#### Disbarment of the Swindlers by the Commissioner of Patents Endorsed. St. Paul Ploneer Pre

John Wedderburn & Co. of Washington D. C., have been very prominent as patent agents, and have resorted to such extraordinary means to increase their business that they are said last year to have made about \$500,000. But apparently they are going to make any more money out of their patcat office business, at least through any direct dealings with the patent office; for under a very recent decision of the commissioner of patents, approved by the secretary of the interior, John Wedderburn has been disbarred for gross misconduct. In the last number of the Official Gazette

of the United States Patent Office thirty-seven pages are devoted to a review of the results of the investigation on which this decision was made by the commissioner of patents, with the report of Assistant Comalssioner Greeley ba the same subject. The business of this enterprising firm, according o the statements of the commissioner, was

o play upon the guilibility of the thousand: of would-be investors; to advise them that their devices were patentable, whether they were or not, and to intimate that they were probably of great value, and thus induce them to put the imatter into their hands, with the liberal fors they exacted. "There can be no doub". says the commissioner "There

a the syllabur of his detailed review of the transactions of these people, "that the facts brought out in the record show that the respondents carified lout in their practice a skillfully planned scheme of deception, mis-leading and defrauding thousands of wouldbe inventors out of hundreds of thousands of dollars, and have used to further their schemes the offices of the government and s postoffice facilities,

It appears that one of the modes resorted to by John Wedderburn & Co. to obtain business was through representations of their anxious concern for the interests of oor, struggling inventors, and of their deep olicitude to protect them from the bands of unscrupulous patent snarks or ignorant and dishones: solicitors. By this and kindrel means, 33,000 of these poor, struggling indishones! ventors were induced to put their applications for patents in the hands of these philanthropic gentlemen, with the result that less than 1.600 have been allowed.

As an honest and capable patent agent does not encourage his client to apply for a patent unless there is reasonable ground for the assurance that it will be granted, these figures would indicate that there was good ground for the disbarment of John Weddersame story, and while wages have not yet been generally advanced, a vastly larger number of men have been given work.

PRODUCTION OF SUGAR BEET. Facts Showing a Great Future for the

#### Industry. Chicago Post

to the credit of the company. A deposit of Statistics of sugar production of the last ten years as compiled by a French jour-\$2,000,000 has been made as a proof of good faith by the reorganization committee. nal are interesting as showing the rapid development of the sugar beet industry. malning payments are to be thirty, fifty and sixty days. The last paynent by the reorganization committee be due in January. Prior to that date In the season of 1887-8 the production of beet sugar was just about equal to that of cane sugar. In the first case it amounted ubsidy Pacific railway bouds-\$29,904.952 to 2,407,000 tons, as against 2,541,000 in the latter. This year the production of cane will be advertised for redemption, and this will put that large amount of money back sugar remained about where it was ten years nto circulation. So these large transfers ago, any difference being in the direction of a decrease, while the production of f money will not make even a flurry in the arket. The government meanwhile is well rid of

Of caue sugar beet sugar nearly doubled. there was produced this year 2,432,000 while of beet sugar the production was

These figures go to show that there now a much larger consumption of augar than was the case ten years ago. In the from the date of their issue it makes about \$21,000,000 profit on its loan of credit to the first year of the decade the production was 4.948,000 tons, while in the last it was 7,204,000 tons. It is but fair to conclude that the entire production goes into actual consumption. How this increase is to be accounted for is not easy to determine. The fact that it exists, however, seems to be in-Pacific. disputable. Perhaps it is one of the signs of improvement in the circumstances of the people as a whole, whereby their consumptheir position as holders of the first morttive capabilities have been increased. I so, it might be cited as an additional refuta tion of the cry of the pessimists that the poor are constantly growing poorer, while the rich are growing richer. The advance ment of rich and poor alike in the direction of self-betterment appears to be simultane

with all other creditors of the bankrupt com pany. But it always is profitable in the This view of the case would seem to be sorne out by the fact that the improvement run to be honorable. The pity of it is that here are so many smart men who do not see has been a gradual one. In the first year of the decade the total production of sugar was It in that light.

.948,000 tons. The following year it rose to 5,067,000 tons; the next year to 5,701,000 tons the succeeding one to 6,237,000 tons, and s Daugers of Exhausting the Steam in

on until in 1894-5 it had risen to 7.828,000 tons, since when there has been a slight At this time of year, when people are re failing off, possibly in consequence of the depression that has prevailed turning from their vacations; when many are universal None of the decrease, however, is chargeabl coming home to rest after a season of activity to beet sugar. Its production this last year has been larger than ever before. This fact and dissipation, and when many more are returning with freshened energies for the will be of special interest to those western battle with the world, it might be well to restates, such as Nebraska and Colorado, which member, says Leslie's Weekly, that there is have been going extensively into the cultiva such a thing as overdoing and undoing one's self even after the annual recreation. The tion of sugar beet. It may be taken by them as an indication that there is a great future prosy moralists, from our boyhood days to for their new industry, and that the cossi
