Less Number of Settlers Are Taking Up | Der 18. Homesteads.

MILLIONS OF ACRES IN PUBLIC DOMAIN

Amendments to Arid Land Law Seeded -Efforts to Stop Depredations on Timber Land Belonging to the Government.

WASHINGTON, Oct. 26.—Commissioner of the General Land Office Binger Hermann has submitted his annual report to the secretary of the interior. Compared with the previous year it shows a decrease of 3,298 original homestead entries, aggregating 378,625 acres. In the entire disposals of public land there was a falling off of 5,370,406 acres. The areas sold for each reached 419,952 scres, and miscellaneous entries aggregating 7,334,554 acres. The receipts from disposal of public lands amounted to \$1,596,380, and from disposal of Indian lands \$438,716. There were 32,087 agricultural patents issued, approximating 5,133,920 acres. There were patented or certified with the effect of patenting for the benefit of railroad companies under congressional grants 5,101,969 acres, a decrease of over 10,000,000 acres from the previous year. An approximate estimate of the number of acres of vacant public lands in the several acres of vacant public lands in the several states and territories at the close of the fiscal year is: Atabama, 532,339; Arizona, 54,400,211; Arkansas, 3,922,042; California, 43,841,044; Colorado 40,037,204; Florida, 1,797,602; Idaho 45,362,855; Kanass, 1,046,589; Louisiana, 845,020; Michigan 522,431; Minnesota, 6,240,829; Mississippi, 441,220; Missouri, 497,764; Montana, 71,432,917; Nebraska, 19,569,352; Nevada, 61,578,586; New Mexico,56,983,047; North Dakota, 21,385,293; Oklahoma, 8,105,238; Oregon, 35,883,318; South Dakota, 3,259,718; Utah, 44,205,079; Washington, 17,985,536; Wisconsin, 454,107; Wyoming ton, 17,985,536; Wisconsin, 454,107; Wyoming 49,341,588; Alaska 369,529,600 acres. The Sgares above given do not include the vacant land embraced in military, timber and Indian reservations, reservoir siles, tracts covered by selections, filings, railroad grants, etc. couching the famous Beason surveys in California, Commissioner Hermann says six surveying parties under Mr. Benson's direction are now in the field correcting the sur-veys under the recent agreement. RECLAIMING ARID LANDS.

The report calls attention to the necessity for some further legislative quantment, either original or amendatory of the Carcy act, which should tend to make secure the capital invested in the reclamation of the arid lands. Owing to the recent financial depression, especially felt in the arld land states, but comparatively little advancement has been made toward reclamation, but now, the report says with the revival of industries generally, and the more ready supply of money for investment purposes, there also has been a revival of the former interest in this sub-

The mining industry reached its lowest coint during the past year, but is now on the increase. In view of the expected filing of many locations incident to the opening up of he upper Yukan district the triet in Alaska. Noting the fact that numer us mining syndicates are already competing or the title of many individual location made on the rich mineral discoveries in Alaska it is recommended that the law be so amended as to prohibit the including of more than one lode caim or more than sixty acres of placer ground in a single application

There were 370 cases of depredations or public timber reported, involving a value of \$975,064, recoverable to the government. Fearly 200 mermits have been issued to cut attle timber since the passage of the permit Lw, with an estimated amount of timber thus allowed to be out of 300,000,000 feet Commissioner Hermann says: "Large co-porations and companies have secured permits at different times to cut many millions of feet, notably the Big Blackfoot Milling company, Bitter Root Developing company and Angeonda Mining company, all of Mon-ana. Since my induction I have refused to allow any licenses to use to exceed onefurther quantit until showing of the real necessity.

At the present timber dealers yearly sweevast quantities of timber from the oublic lands in the interests of speculations without paying a dollar to the government and con without government effort to check destruction. The number loss yearly from these sources conservatively runs to into the mill lions of dollars. It is impracticable to pro-tect and administer the forests upon th public domain without provision for the main tenance of a full local force to supervise th timbered lands and execute these laws." Among the recommendations are for pramor action by congress to terminate the suspen-sion of Arkansas land claims; a change in the course of proceedings for the adjustment of mineral lands, modification of the law imposing penalties for depredations on public timber and ample appropriations for collecting and administering existing and pros-

#### FACTS CONCERNING WAR VESSELS. Report of Engineer-in-Chief George

pective forest reservations.

W. Melville, WASHINGTON, Oct. 26 .- The gradual re placement on war vessels of the familiar cylindrical boller by various forms of the water tube boiler constitutes the most important fact in marine engineering at this time, according to Engineer-in-chief George W. Melville, who has just published his annual report to the secretary of the navy. For torpedo boats he says the edvantages of these bollers were so evident the they quickly displaced the old types and

have now been used for several years ex-clusively for this kind of craft. Touching liquid fuel, with which many fouching fidule fuel, with which many mations are experimenting, as a substitute for coal, the report gives an interesting history of those made in this country. Included in this list is the test made by the Pennsylvania ratiroad company about ten years ago, which, while proving the practicability of using coal oil for feel for beffers, demonstrated that the Pennsylvania ratiroad itself would consume more than one third of the extra consume more than one-third of the entire output of coal oil at that time if it were used for fuel instead of coal. Nevertheless, the balances of advantage are so greatly in favor of the liquid fuel for small craft that

the bureau expresses the intention of making use of coal oil on torpedo beats.

Commodore Melville makes a atrong argument is favor of building our ships in future in classes so as to secure the great advantages that follow the tages that follow the training of men for whole classes of ships, instead of for one vessel, and also the ability to use duplicate parts of machinery. It is recommended that the machinery of ships laid up in reserve with skeleion crews be subjected every six months to a dock trial with full steam presire to make sure they are ready for use at

The bureau has been making some inquiry es to the possibility of acquiring large mer-chant vessels in an emergency to serve as machine shops of fleets, and having obtained a list of suitable vessels, now submits an estimate of \$25,000 for machine tools to be laid aside for fitting one of them out who

The engineer-in-chief has a good deal to any in his report on the subject of personnel, and he insists that he is warranted in urging, after many years of careful observation and study, two things as necessary to the highest efficiency of the engineer corps. First. An increase of numbers of the corps from 135 officers of all grades to about divided as to the various grades as to give

fair proportion.

Second. The conferring of actual rank and titles (with the names of the corps attached) as is the case for the staff officers of the

Send Expert to Montgomery. of the Marine hospital service has been ordered to Monigomery by the surgeon general to confer with the local authorities in devising restrictive measures to prevent the spread of yellow fever in that city, and is there for that purpose today. Surgeon General Wyman has male inquiry of the chief of the Weather bureau of the dates at which frost may be expected at various places infected by yellow fever, and is informed that the average date of the first appearance of

DECREASE IN LAND ENTRIES frost at Mobile is November 22, at Montgomery November 12 and at Galveston December 18. The earliest date at which frost has been known at Mobile is November 3, at Mont gomery November 1 and at Gaiveston Novem

> BOGUS CREEK NATION WARRANTS. Government Will Not Lose Anything

by the Fraud. WASHINGTON, Oct. 26 .- Government offials are at a loss to know on whom will fell the loss by the \$90,000 worth of bogus warrants on account of the Creek Indian payments which are now out. The government will not lose anything, but the money on all these warrants has been paid out in an intermediary way. Whether the Creek nation, which is said to have paid some of the money on the warrants, or outside parties, who are known to have cashed at least a part of them of a premium as brokers, or others, will be the ones to stand the loss is not known. not known. Secretary Bliss stated today that while there were about \$90,000 worth of bogus warrants out for the Creek payment they had not been paid. Who holds the warrants cunnot be learned, he said, but the government would not lose a cent. Further than this officials refuse to talk.

Plans for the payment of the indebtedness ere about consummated and the payment of the money was about to be made, when the discrepancy was discovered. The war-rants were on the United States sub-treasury at St. Louis and the arrangements for the payments were immediately suspended pending the investigation. Special Agent Secverly, who practically worked up the case, is expected here before the end of the He will then confer with Secretary liss, laying before him all the facts gained of a preliminary character. Pending his arrival the definite facts as to many of the points in the case will not be known.

Reception to Nansen.

WASHINGTON, Oct. 26 -- Dr. Fridtjof Nanen, the Arctic explorer, was given a reception tonight at the Arlington hotel by the National Geographic society. The pariors and banquet room of the hotel were appro-oriately decorated with plants and flowers. and the Norwegian and American flags. The guests were introduced to Dr. Nansen by Dr. David Day of the Geological survey and Hon. Gardiner Hubbard, and assisting the ex-plorer in receiving were General Greely of the army and Chief Engineer Melville of the havy. These who called included Secretaries Long and Alger, Arsistant Secretaries Venderlip and Rossevelt, Associate Justice Harer and Secretary to the President Porter and other distinguished public men. After the reception General Greely made a few remarks complimentary of Nansen and his work. Engineer Melville introduced Nansen. the grandest here who ever rode the

DIRECTOR OF MINT MAKES A SUGGESTION

General Preston Explains How an Early Decision Will Help the Work of His Department to a Great Extent.

WASHINGTON, Oct. 26.-tSpecial Telegram.)-General Preston, director of the mint, is especially anxious that the Transmississippi and International Exposition association shall indicate to the department a design for the medal which is provided by congress to be presented to exhibitors. General Preston is desirous of giving the exposition a medal typical of the country and industries represented, and is also moved to request the design for the medalette which shall be struck during the period of the exposition. Speaking of this feature of the show in Omaha next year General Preston said: "We are still manufacturing medals for prize winners at the World's fair, due in a great part to the failure of the directory of the Chicago exposition to adopt a design for the medal until nearly the close of the exposition. It requires considerable time for the engravers to properly prepare a medal, and in order to avoid delays I would most aurantly urgs upon the people beings the engravers to properly be seen and in the railway people are now to investigate my case and in which it is busy repairing damages. A Kobe dispatch matter will be ignored by me. I do not think that City Attorney Connell has the railway people are now to investigate my case and in which it is busy repairing damages. A Kobe dispatch matter will be ignored by me. I do not think that City Attorney Connell has the railway people are now to investigate my case and in which it is busy repairing damages. A Kobe dispatch to investigate my case and in which it is to my case and in which it the investigation which has been on during the investigation which has been on during the last three weeks, and submit his reort. The advices so far received have been of a preliminary character. Pending his arort of the definite facts as to many of the olints in the case will not be known. typical character of medal. Should the mat-ter be submitted to the bureau here for design it would naturally take a national character, which to my mind is not what is wanted by the Omaha people. I would have it so arranged that the medals could be pre-sented during the last month of the exposition, thereby saving an endless amount of worry and heartburning at the same time."

GENERAL LAND OFFICE BUSINESS. GENERAL LAND OFFICE BUSINESS.

The report of the commissioner of the general lend office for the fiscal year ending June 20 last was made public today. It shows that the Union Pacific Railroad company received patents during the year for 195,455 acres of land in Nebraska. All this land had been sold to bona fide settlers, and patents were issued in accordance with orders of Secretary Francis after proof of bona fides had been filed. The report says that there are 19.609,553 acres of surveyed, unoccupied public land in Nebraska. In noccupied public land in Nebraska. In outh Dakota the area of variant land embraces 11.153,420 acres that has been surveyed and 2,007,288 acres unsurveyed. Grand and Hooker county surveys in braska were approved. They embraced 111,-

The report of the suveyor general of South Dakota, which accompanies the commissioner's report, says that no surveys were mad Discuss Gage's Report.

Matter Brought to Attention of Commercial Club Committee.

At yesterday's meeting of the Com-1 mercial club's executive committee a communication from A. J. Vanlandingham, secretary of the St. Louis Traffic bureau, re garding the new lase of light draught steel barges to run between St. Louis and New Orleans, was received and read. It was suggested that as the barges will draw but eighteen inches of water they could ply on the Missouri river from Omaha to St. Louis between May 1 and August 1 of each year, carrying wheat and other cereal product destined for southern export. The present freight rate on wheat is 15 cents from here to New Orleans. By the steel barges would be 4 conts to St. Louis and 3 cent more to New Orleans, or 7 cents a bushel for the through shipment. The matter was eferred to a subcommittee, and will receive rether consideration. Notice of the establishment of a commerci-

Dale to build a two-story frame residence at Twenty-eighth and Hickory streets. It will cost \$3,900. John A. Larson will build dub at Grand Island was received. The numbers of the new club will be banqueted by the Omaha Commercial club early in December. Other commercial clubs of state will be similarly entertained later. A description of Emily Carlson, a young parterly dinner of the club will be give girl from Odebolt, Ia., has been given to the police with instructions to try to locate her. Miss Carlson has been living with the family of Otto Anderson, 2562 South Twentieth street, for a few weeks past, but disappeared on November 8, at which time addresses will be made by Senator Thurston and Con-

BARGES FOR THE RIVER TRADE. lowing conventions were reported as secured for Omaha next year, since the last meeting: National Detective association, Funeral Di-restors of the United States and the Liberal J. W. Hirst, the new president of the lin-

eed oil works, was unanimously elected to membership. A letter regarding the handling of national onventions was received from W. C. Burckhart, convention reporter of the Detroit Free ress. It was placed on file.

The following resolution was adopted:

'Resolved, That the executive committee of the Omaha Commercial club favors the voting of bonds by Douglas county in aid of the Transmississippi Exposition, and recommends to members of the club and friends that they vote 'yes' on the bond proposi-tion on November 2."

An Honest Remedy. "We could not say too much in favor of Chamberlain's Cough Remedy. About three years ago one of our children had an attack of croup and we were afraid that we would lose him. Seeing Chamberlain's Cough Remedy, advertised, we decided to give it a rial. It gave almost instant relief and we believe it saved the child's life. Since them we have never been without a bottle of this remedy in the house and we recommend it to every one as being an honest cough rem-

We are now showing all that's new in ent glass-some of the most exquisite pieces ever shown in Omalia-We now have this cutire stock opened and ready or your inspection-You can well afford the time for inspecting this beautiful and sparkling cut glass display-and we cordially invite you to do so some elegant pieces suitabe for wedding presents We engrave and print all our own plate and embossed work-100 cards with copper plate for \$1.50-100 cards printed from your own plate for \$1.00-Wedding will probably supersede them altogether, stationery—engraved in the latest ariistic. The alternating current lamp is the most effects—\$10 for the first 100-\$3.50 per 100 after that-Your mail order will receive our most careful and prompt at-
