If the exposition is to be opened on schedule time not a minute of time available for construction work can be wasted. The exposition wants its buildings completed within the time limit set by each contract rather than the penalties provided for violation of the timeclause, but the only way to enforce the time limit is to insist on payment of penalties whenever they accrue.

Why should it be necessary for the governor to stir the state rallway commission to action on complaints laid before it by aggrieved citizens? Can it be true that the reform secretaries of the State Board of Transportation can do nothing except draw their \$2,000-a-year salaries until they get orders properly countersigned at railroad headquarters?

The Ottumwa Democrat still insists that the "prosperity the republicans talk about is a deceptive kind," but the Democrat cannot truthfully say that the prosperity actually experienced by republicans and democrats alike is deceptive. Raising a cry for "genuine prosperity" is in extreme bad taste while the people are so busy with other things.

Prosperity on a Solid Footing.

The United States are getting upon the solid ground of prosperity. We shall have our little backsets, such as that which prevented the south from going on a this time, but we shall not lose all the advantage we shall have gained, and we shall start again. The next time we shall go further, and 1898 is certain to be a prosperous year for the farmer, the mechanic, the mer chant, manufacturer, banker and laborer, Everybody will profit, even the calamity-howler, but the number of calamity-howlers is going to be greatly reduced.

CHICAGO AT OMAHA.

Plans of the World's Fair City for the Transmississippi Exposition.

Chicago Inter Ocean. Ohicago is making an early and very promising effort toward preparation for a worthy exhibit at the Transmississippi Exosition, which is to be held in Omaha durthe ensuing summer. The design for the Illinois State building, of which a pic ture was published in the Inter Ocean of yesterday, is both graceful and imposing, nd the exposition committee has given it finely elevated site.

But the erection of a fine state building is less than half the duty of Illinois. The state and its cities ought to be represented well in the display of manufactures and of machinery for the production of manufac-tures. West of the Mississippi are vast mining regions, and Illinois manufactures the best mining tools and machines. West of the great river are areas of the empires in which agriculture holds sway and Illinois makes the best agricultural im-plements and machinery. West of the Mississippi woolen manufactures and sugar facand Illinois can

tories are springing up, and furnish them with machinery. There are articles of commerce now manufactured in Illinois that are not manufactured in the transmississippi states and that are not likely to be manufactured there for years to come. These should be exhibited and the trade of a dozen great states cen-tered in the markets of Illinois. Already there is a demand for 35,000 square feet for Illinois exhibits, but the enterprise of our propriated plans must be prepared and to make votes for the republican ticket is a requisition for double the space.

According to the sworn returns the nominee for the highest office contributes the least to political expenses. Mayor-elect Van Wyck of New York swears the campaign cost him only \$158.75. The democratic cand date for governor of Ohio admits that he spent These figures are not conclusive proof of diminishing campaign boodle. Three Tammany candidates admit having paid \$5,000 each, several others \$2,500 each, another professional reformer of the tiger stripe forked over \$10,000 for a four-year office with a salary of \$17,500 a year.

"In 1825," eays the Boston Transcript "George Ticknor and a foreign gentleman made a call upon the venerable statesman. John Adams, to was then 90 years of age. WEDDED TO CALAMITY.

A Temporary Arrangement with Divorce in Sight. Chicago Times-Herald.

The November Corn Belt, the monthly sublication of the Burlington railway, makes most phenomenal showing of prosperity mong the agricultural classes in Nebraska With evidences of thrift on every hand as hown by the reports of production, it may vell excite the wonderment of intelligen nen that such a state should persistently follow the lead of populists and calamity howlers who want the laws of nature reversed and whose only stock in trade is an

appeal to the discontented classes.

But why should there be any discontented classes in Nebraska? The statistics gathered by the Burlington railway indicate that the ome of the champion of cheap money is he most prosperous of all the western agicultural states. The farmers are rapidly paying off their mortgages. The state is dotted all over with the best farm houses that money can buy; the people have all the comforts and many of the luxuries of the soil is wonderfully fertile being dapted to a greater diversity of inv other western state. Its alfalfa meadows are the wonder of the world and it gives greater promise of profitable beet sugar culture than any other state. And yet Nebraska is not satisfied with prossigns of the times.

 fay, tons.
 4,630,143

 Sugar beets, tons.
 101,000

 The value of the Nebraska crops and other products at local market prices is es-

timated as follows: Farm products \$ 99,370,065,21
Dairy products 9,438,000,00
Eggs 2,250,000,00
Poultry 5,500,000,00 .ive Stock 44,945,489,35 If we may judge from the last two eleions in Nebraska the people of that state

would prefer to receive \$89,766,727,28 for this bumper crop instead of \$161,523,454,56. It is ncomprehensible that a state so bountifully plessed with prosperity chould continue ollow with fatuous allegiance the apostles of cheap money, calamity and repudiation. NO MIDDLE GROUND.

About 100,000 Muslim pilgrims visit the sacred city of Mecca every year on the occasion of the pilgrimage, and there is very considerable traffic between Yembo and Medina, the hirthplace of the prophet. It is now proposed by a London syndicate to construct a railway between Yembo, Medina and Mecca. A difficulty, however, arises not from the natural features of the country, which are ecedingly favorable for the construction of railway, but from the peculiar rites of the lajj, or pilgrimage, which were instituted t a time when pollways were never dreamed of. It is, however, probable that a railway will be constructed from Yembo to Medina, a listance of 130 miles, thus leaving the rest the journey to the sacred shrine to be trudged on foot.

In these times, when everyone is clamoring for your trade, and irresponsible dealers are selling shoddy in the name of wool.

A cold bluff will sell a great deaf of inferior clothing to a good many persons who are tempted alone by ridiculously low prices-(for a while)-a problem confronts every reader of clothing advertisements. Why? because a few are so foolishly and obviously exaggerated and mendacious that they attract no attention; for in the matter of honest clothing the only security is in dealing with a reliable and responsible house.
