1900 cannot be expected. It is not known whether Representativ Sheldon is votcing the sentiment of the state acuse machine leaders, who have steadily protested against discarding any of the three disguises of the silver party, but his pro-posal is certain to draw out considerable discussion of the subject throughout the state. A prominent populist of the First district who made speeches all through the last cam-paign, and who has had hopes of receiving

the fusion nomination for congress next year was interviewed a few days ago re-garding the results of the state election. During the conversation his attention was called to the fact that the fusion party had made its gains in the cities and towns, with the exception of Omaha, and that the repub

licans had made corresponding gains in the farming and stock-raising districts. He accounted for this by saying: "It shows that all the thieves and rogues of the towns are getting into the populist party because it has the offices, and some of the fatmers have taken alarm at this and are getting out. If a few more of the dishonest element climb into the populist band wagon, all of us who believe in a clean party will have to get out and hunt a new one. I believe that the poplist party is being ruined by the convert who have come in during the last three years and who are mostly office-seekers." A number of the old-line populists in this part of the state are expressing themselves in the

same way and there is a strong feeling prevailing that between the democrats and the office-seekers the populist party has been pretty effectually swallowed up. YOUNG CURTIS IS STILL ALIVE.
