To the end of restoring perfect harmony in the ranks of the party and effecting a more compact organization, we respectfully invite the national committee at the Laclede hotel, St. Louis, Mo., for January 12, 1898. To the end of restoring perfect harmony in the ranks of the party and effecting a more compact organization, we respectfully invite the national committee of the people's party to meet with us in conference on the above date, appealing to their particism and sense of duty to aid us in restoring to its once splendid estate our party organization.

chairman of the national democratic committee, has issued the following address:

To the National Democracy: The results of the recent, election were in no wise discouraging to the success of the principles for which the national democratic party has been battling. The sliver organizations lost the states of Ohio and Maryland, with the legislatures, which will choose United States senators. In Kentucky the sliver candidate had a majority of only 123, with 89,000 electors, a majority of whom were unquestionably for sound money, not voiling. The national democratic vote of the state was twice as large as it was last year, while the loss in the free silver vote was 40,000.

In Iowa the democratic sound money vote was doubled, notwithstanding the candidates abandoned that issue and pleaded for support on state matters. The sound money vote in both Kentucky and Iowa would undoubtedly have been much larger had it not been for the facts that all the local candidates for county offices appeared on the ballots under the free silver state tickets and emblems, thereby compelling sound money electors to scratch their tickets are vote the free silver state tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems, thereby compelling sound money electors to scratch their tickets and emblems there was reduced the same ratio.

In Nobraska the free silver majority was reduced, while South Dakota deserted the cause.

The efforts of the national democratic or

cause.

The efforts of the national democratic organization last year were to aid in the saving of the credit of the nation from dishonor. Its mission in the future will be, if possible, to preserve the true principles of democracy until judgment and reason shall again dominate the councils of the party and its ancient creed be restored to its platform. Then, and not until then, will the work of the national democracy be accomplished, and its organization cease to be an independent one.

The firmer the convictions, and the bolder the courage, of the national democracy, the sooner will the country be free from the bilghting influences of impending disaster. No compromise with dishonor, no surrender of principle to expediency is the shibbolish of the national democracy, and each and every member of the party should stand by his convictions and redouble his efforts to uphold the principles he believes to be indispensable to the preservation of the rights and properties of the people.
