BOOKS FOR BOYS AND GIRLS

One Place Where Grown People Need Infant Protection.

CHILDREN'S SECTION OF THE LIBRARY

Devotion of a Room' and Attendant

to the Exclusive Use of Young-

sters Proves a Very Pop-

ular Success.

"No grown people allowed unaccompanied

by children," is the unwritten law which

clusive use of boys and girls in the Omaha

public library. The juvenile department,

organized, will be furnished with a complete

the first floor by clearing away shelving and

no longer be obliged to compete with their elders in the general reading room or to

search for famillar magazines in the mass of

modicus quarters.

urrent literature on its tables. This addition joins the juvenile department already established and with it affords quite com-

The books subject to the demand of children are ranged on shelves about this newly con-structed room. They have been chosen from a cathlogue of child backs complied by John F. Sargent, which is a patiental structure

F. Sargent, which is a national standard, Blank spaces are left in his collection and there have been filled in 7,000 block numbers,

there have been filled in 3,000 book numbers, showing that number on hand in this de, art-ment. Besides these a number of duplicates have been provided in the cases of such highly prized books as "The Brownles," "Little Lord Fauntleroy" and others. Nu-merous fluctrations of animals and other sub-jects have been mounted on cariboard and will be displayed about the sub-

be displayed about the walls. A large o vage wash drawing of the White

podeon from Harper's Weekly has proved a unusual attraction. It is thought that her features will be added from time to

The attendant expects to devote practically

her entire time to this department and will make a study of its operation. Her service

will be of a personal sort, and us she be-comes acquainted with the different chil-

drep her suggestions regarding the material

suited to the pleasure or profit of tach will be of increasing value. It is hoped that by this effort to individualize the work the co-operation of public school teachers will be offered. This is now effective in a meas-

ure, as in the case of one of the teachers at Comeolus school, who has become responsible

pupils, and every month the Board of Edu-

ation wagon delivers to her that number if books. The High school teachers have

already so based their work on library ref-crences that the facilities in certain subjects

are fairly awamped for some time daily after

It has been only within the lest two years

that there has been a separate children's de-partment in the library. The wisdom of its

establishment is shown in the fact that the younger patrons have increased from a com-

partitively small number to over 27 per cent of the total list of book borrowers. The following table, taken from the annual library

report, shows the monthly attendance of boya and girls in the period from September 15,

INVASION OF NEW TREES

to 3,700 feet at its eastern extremity. Upon

this extended ridge this pine has extended for at least ninety miles. It is found also

in widely isolated canyons in the central part

The following trees, which have invaded the state from the west, have followed one or the other of these two ridges. Thus the cottonwood (populus angustifolia), mountain announced by the company that the surveys maple (acer glabrum), and canon birch (betula) for the cable between the coast of California occidentalis, follow Pine Ridge for from ten to seventy-five miles. On Cheyenne ridge Rydberg's cottonwood (pepulus acuminati) has made for the establishment of that pushed in from the Wyoming foothills for a distance of from ten to fifteen miles. It is interesting to mention here that the very pretty smaller mountain mahogany (cercocar-pus parvifolius), which further southwest becomes a small tree, enters the state of Cheyenne Ridge, where it grows luxuriantly

as a rather tall spreading shrub on the pr clpitous slopes of the Wild Cat mountains. Looking over the whole area and studying attentively the condition of the trees along the borders of the areas which they occupy we may ask whether they are advancing or retreating. At one time I held the view that the eastern trees were advancing and the western verceating, but further examination has somewhat modified this view. Along th western border of the area occupied by th bur oak (quercus macrocaroa) the trees an found up on the sides of the narrow valleys through which flow the creeks and rivers These trees are young and vigorous and hav young and vigorous.

PINES MOVING EASTWARD.

With the western species it is nearly the same. While at some stations the pine upon outlying borders are apparently the remnants of a former larger growth in many other places these outliers are grow-ing and vigorous. This was particularly motionable to a ground slatt or former larger noticeable in a recent visit to Cheyenne Ridge, where but one explanation could be given for the present distribution of individand trees upon the spurs and hillsides. It is very certain that upon Cheyenne Ridge the pines are slowly pushing eastward, and is very certain that upon Caeyeane have the pines are slowly pushing eastward, and that in spite of the ravages of man and of herds of cattle, horses and sheep, this species is more than holding its own. Upon some parts of Pine Ridge man's interference has checked the advance of the pine, and this is the case also in some places along the Ni brara river, but in miny other places the young trens are springing up and vigor-cusily centesting with grasses and weeks for the possession of ground. The mountain maple and the canyon birch give one the same impression of a successful and com-paratively treent advance into a territory formerly unoccupied. Even the shrubby paratively recent advance into a territory formerly unoccupied. Even the shrubby mountain makegany upon the slopes of the Wild Cat mountains is evidently fighting a winning, and not a losing, battle. No one can ride through the mountain canons and see the vicerous plants of this matter advances see the vigorous plants of this pretty species and come to any other conclusion than that there is here a strong eastern advance of a weatern emetion

 western species.
 With respect to some of the trees upon the Nebraska plains I have to admit that it is at present impossible to see either ad-vance or retreat. It is probable that in some instances, as for example the paper birch instances, as for example the paper birch (betula papyrifera), the trees have remained where they are for ages, without perceptible change in area. Perhaps we have in this tree a survival of the glacial migraton from the far north Likewise. I find it impossible to prondunce upon the status of the bass-wood, c tiorwood, elm, silver maple, buck-eye, cherrics, etc. They have as yet not shown anything which is conclusive either way.

From such evidences as we have thus far, it is evident that some of the eastern trees are advancing toward the west, and that some of the western trees are advancing eastward. In other words, we can say that

A. Scrymser was elected and Edmund L. Baylies vice president an cting treasurer. The company announces that its proposed enble will connect San Francisco with the Hawaiian islands near Honolulu, and exten-sions from the Hawaiian Islands will be made for faces. quaking ascen (populus tremuloides), black made to Japan and Australasia. Needs of the German Navy.

LONDON, Nov. 25 .- The Berlin correspondent of the Daily News alleges that a ile. Herman Kountze has had a gang pamphlet just published by Prof. Schaefer wholecale. Herman Kountze has that a gate of men at work laying walks cround his property for several months and the new walks that he has laid this years may be estimated by the mile. The general price estimated by the mile trans walks is 15 cents for laying artificial stone walks is 15 cents per foot. Brick is cheaper and the taturol ctone costs 19 and 20 cents. Brick and ar-tificial stone are the materials most in use and the total investment in permanent walks of the Garman coast. It also hints at the eventuality of an Anglo-Ressian war, when n Omaha this year is estimated at from Germany would require a strong havy is order to preserve her neutrality and to reap

son, but with the except of the with the cap tich avenue main sever and the Vinton street sever they have all been small jobs, costing less than \$1,000. The total expenditure in this department during the year was nearly \$10,000, distributed as follows: matter was argued for an against all day

are inclined to invent forced reasons for not making exhibits, the new policy has been adopted and the transmississippi states have been notified of this action. The first reply received to this announcement was from the Ed Blunk of Elkhorn, while hunting on Saturday, was a victim of misplaced confi lence and came within an ace of playing gove nor of a certain state who rsked the the star part at a funeral ceremony. the amount allotted to his state be doubled Samuel Fry, George Coppel, Ed Doyle as it was not sufficient for the exhibite the various interests in the state would like to Morgan Jeffries and Ed Blunk, all Elkhorn-

ites, started for the Platte river on a goost and duck exterminating expedition. They SOUTH DAKOTA'S COMMISSION pitched their tent on the east bank of the Platte near the delta of the Elkhorn, and Governor Lee Names the Men Who while the other members of the party ar-ranged things nice and snug around the Will Handle the Exhibit. Governor Andrew E. Lee has notified the Department of Promotion that he has apcamp Messrs. Blurk and Doyle took posses-sion of two of the innumerable sand bars pointed the following men as the South Dathat are part and parcel of the rivel that is kota Explaition commission: Vice president, A. McKinney, Lead; W. L. Gardner, Rapid

distinguished for its treacherous bottom, great width and shallowness, and awaited patiently the coming of the evening flight of City; Harris Franklin, Martin Chapman and greese and ducks. Finally their vigil was re-warded, and as the result of their accurate Charles E. Davis, Deadwood; John Stabler, Hot Springs; Hatce Murphy, Elk Point: C. aim two of the largest guesc bagged on the Platte for years were served to grace the Thanksgiving table today. A. Jewett, Sloux Falls, O. H. Mann, Okobojo Hugh Smith, Howard,

The governor says he will appoint addi-tional members of this board at the earlies Doyle's bird dropped in the current of the river and was fast fading from sight when opportunity and will cell the commission to gether and devise some means of raisin he hastily divested himself of a layer or two of reliments and plunged into the stream money for making a state exhibit. He expresses regret that the bonds voted by the ing he landed it, but was completely ex-Black Hills district failed to go through hausted. Blunk's bird very considerately after his prize. After considerable flounderby reason of the refusal of the canvassing after being killed landed high and dry on the board to canvass the returns on the bonds, sand eminence almost at his feet and he but he expresses the hope that a way will congratulated himself upon his good luck. His joy, however, was of short duration, for sented.

the discovery that the channel of the atream had switched and cut him off from the land. And to make a bad matter worse the wind came up and blew strong from the direction of the Klondike country, chilling him

through and through. He cannot swim and there was nothing for him to do but stay prominent Nebraskans who will go to Texas prominent Nebraskans who will go to Texac early in December to attend the Deep Waiter convention and boom the Transmississippi Exposition. These pamphlets contain six-fern pages of reading matter descriptive of the plan, scope and progress of the exposi-tion, and inserted as a frontispicce is a half-tane engraving, 4x6 inches, of the official bird's-eye view of the exposition grounds. There are uso balf-time engravings of fixe right there until his companion could go to camp and send aid to him. He was finally reasued after being in the river three hours. Two natives were found who owned a boat and were willing to man it for \$5. They

were paid their price and when they reached Blunk it was about 9 o'clock Saturday night. There are also half-tone engravings of five of the main buildings. The reading matter Owing to the fact that the channel kent eating its way through the bar Blunk, when his rescuers reached him, was standing in water waist does of the main buildings. The reading matter is up-to-date and states briefly and concisely in a criep, pointed manner the prominent features of the exposition story. One of the architectures of the exposition story. water waist deep.

Disfigurement for life by burns or scalds intry be avoided by using De Witt's Witch Hazel Salve, the great remedy for olles and for all kinds of sores and skin troubles. liah'n striking features is a list of fify-one ra-tionel and interstate conventions which will meet in Omaha next year. Typographically the examplet is a gem and reflects credit on the department.

The Publicity department has in prepara-tion a twenty-page pamphlet containing half-ione engravings of the hirds-sys view and the main buildings. These will be for gen-eral distribution and will be issued within

Rusiness.

Rev. John P. Newman, D. D., bishop of the Methodist Episcopal church, arrived in Omaha yesterday morning from Chicago on an early morning train. He appeared in his usual good health as he stepped from the usual good health as he stepped from the cometery. train, and his whitened hair was the only S. L. Boyd has been a resident of Omaha

train, at d his whitened hair was the only suggestion of venerablences. He was met at the train by Mr. Joseph H. McCornell, and driven to the latter's residence. He will be the cross of Mr. and Mr. McCornell, and the train by Mr. Joseph H. McCornell, and driven to the latter's residence. He will be driven to the latter's residence. He will be the guest of Mr. and Mrs. McConnell until Monday

Monday Bishop Newman is en route from the east to the extreme west, and is going to San Francisco to take up his episcopal residence there. Yesterday he attended the Thanke-giving day service at the First Methodist Episcopal church. After the service this morning he held an impromptu reception, zeveral hundred Methodists and other friends of the bishop going to the front of the church

that state who are interested in sesing that the Sunflower state is properly represented at the exposition. The suggestion was made by the secretary of the Commercial club of

The showing for these particular eight months and a half is given to point out the urprising increase in pitronage imme-liately after the formation of a separate uvenile department. The attendance for september, indicated by the last fifteen days, ould be about 3.750. The juvenile departnent was organized early in October, and n that month there were 5,055 of the young

disitors at the library. The average daily itendance sprang at core from 145 to 195, and it has increased steadily till the prea-The library officials think this increase is

b be traced directly to the more satisfac-ory provisions for attending to the children's wants. The juvenile works were for the first time placed in accessible cases of shelves and the younger readers invited to examine and select books for themselves. The congestion at the delivery windows was relieved, which was appreciated by all pa-trons alike. It became no longer the qua-tom for children to make out application slips haphazard from the sound of the titles, and the attraction of handling the books and of a personal choice gave an added zest to their reading. Books of a higher classtravel, history and blography-are now ex-amined and read by boys and girls which

would have been passed over without thought as their titles appeared in the cata-fogue. It was soon found necessary to make iditions to books of this character from the general supply. With the opening of the new children's realing room the juvenile department is expected to become one of the main features of the library and the use-fulness of the institution enhanced in form-ing studies bable ing studious habits among the children that will last them throughout their lives.

DEATH COMES TO S. L. BOYD.

Injuries to the Milk Inspector Greater than He Could Bear.

S. L. Boyd, city milk inspector, after an liness covering a week, died at the Presbyterian hospital yesterday morning surrounded by his family.

While driving near Twentleth and Center streets last Thursday Mr. Boyd was thrown from his buggy by a collision with a run-away farmer's team. He sustained a frac-tured skull and was picked up in an un-conscious condition. After being removed to the hospital an operation was performed in the hope of saving his life. For a time

in the hope of saving his life. For a time thereafter the injured man appeared to raily and hope was entertained by his family and friends that he would ultimately recover. In spite of this, however, Mr. Boyd grew rapidly worse Wednesday night and his life came to a peaceful end. The body was taken in charge by the members of the Order of Odd Pellows, the Knights of Pythins, the Modern Wootmen and the Order of the World, in all scelelies of which Mr. Boyd was a member of long standing. The funeral will take
