BROAD SCOPE OF AUTONOMY

Spanish Minister at Washington Analyzes Cuba's New Law.

MAKES LIBERAL CONCESSIONS TO ISLAND

Drafted After the Rules Governing Canada It Goes Further in Some. Particulars Toward General Liberty.

WASHINGTON, Nov. 29 .- Senor Dupuy de Lome, the Spanish minister, has received dispatches from Madrid showing in detail the plan of autonomy which Spain is about to official Reports Accuse the Police of apply to Cuba. While there do not give the text of the new law, they explain all important features and clear up doubts which and Lieutenant Cavanaugh, Ninth cavalry, found a most gratifying change in the conhad arisen from the unofficial reports which who commanded the troops in the recent ditions of the west over that of three years have come from Madrid. Speaking of the Indian disturbance in Colorado, have recom-

now law the minister said today: erisen over the new law owing to the very meager reports heretofore received concerning it. I must admit also, that I have been astonished at the disposition in some quarters to oriticise small technical features. without looking at the broad general char-

plan of autonomy is the same as the old one, with some changes of detail. As a matter of fact the new plan is a complete realization of the policy and platforms of the autonomist party during the last twenty years. The old of autonomy have to Cuba an advisory. It did not have a final authority in making laws, but merely advised as to those laws. Now, however, the new law p opcoes to give Cuba a parliamentary body of full lawmaking power. The completeness of this legislative power is great, if not greater, than that enjoyed by Canada, or by any state of the United States. "This is readily demonstrated by compar-

ing the plan of the new law with that of the British North American act of 1867, which establishes the present parliamentary system of Cuba. According to the Canadian law the Carridian Parliament consists of two bodies. The upper house is made up of members appointed by the crown, each member holding a life tenure, with a qualification that no member is eligible unless he has an income of \$4,000. The provision of the new Cuban upper house is along the same general line, but is far less stringent. In-stead of the crown appointing all of the upper house, as in the case of Canada, the Spanish crown is to appoint only one-half of the upper house of Cuba. The other half ts to be elected by the people of Cuba every five years. There is a \$4,000 property qualification for membership of the upper house of Cuba, which is the same as that in Canada.

UNRESTRICTED FRANCHISE. "There is a \$2,500 property qualification r members of the lower house in Canada,

and also a property qualification as to those who may vote for such members. But in the new plan for Cuba there are no property qualifications as to the electors. It is one man, one vote, the same be he black or

control of its own affairs than do the cev-eral states in this country. For lessance, it is given control of its currency and customs. This last feature is most important. It gives to the Cuban Parliament entire control of the tariff, with the condition that there shall be preferential duties for Spain not exceeding 35 per cent.

'It should be understood that these preferential duties are not an unusual thing. Even under the last reciprocity treaty between the United States and Cuba, which is conceded to have been the most satisfactory reciprocity treaty made by the United States, there was a preferential duty of 50 per cent to Spain. Under the new law this is cut to 35 per cent Moreover, it should be understood the preferential duties do not cover all the tariff schedules, as they did when the United States and Cuba had a reciprocity treaty, but cover only a limited number of articles. These articles doubtless will be so chosen as not to affect the trade between the United States and Cuba, so that while Spain enjoys the prefer ence from its colony, it will not be a preference as against the United States.

ASSUMES PART OF CUBA'S DEBT. "There is another feature which should For the first time the government has said officially that Spain will assume a part of the debt of Cuba. The payment of this debt is to be arranged by the Cortes but it is to be on a basis satisfactory to

both parties." Recurring to the legislative powers which Cuba would enjoy, the minister was asked if these were not to be qualified to some extenby the right of approval reserved to the governor general in certain cases.

"It will be found on examining the new law," answered the minister, "that the governor general has this reserved right only in three specific cases, while the general rule is that the laws go into effect without reserve. Furthermore, these three reservations are the same as those given to the governor general of Canada or to any other executive. This will be found to be the case by examining the British-American act of

KEEP FAITH WITH INDIANS. Intruders Will Have to Get Out of Oklahama Territory.

are located. In this Mr. Wisdom says:

The intruders must go. The intruders have made the Indians doubt the good faith of the government and made it more difficult to treat on the more important issues of allotment and the breaking up of tribal autonomy in the nation to which the individual Indian belongs. A sound public policy demands the eviction of all declared intruders and any measure of expediency on the part of the department that temporizes with the intruder or postpones his removal on mere technicalities is fallacious and misleading. Let all the treaties be enforced and all the safeguards secured to the Indians be upheld in letter and in spirit and then the Indians will make liberal concessions and accept without murmuring that changed condition which confronts them.

their individual capacity, to emigrate to either Mexico or South America and there purchase new homes for themselves and families. This movement, the report says, may grow to the proportion of a colony and it is understood that liberal grants of land can be secured from the countries mentioned This movement may settle the Indian problem to a degree and thus happily relieve the Dawes commission, congress and others who have combatted with the question for years. The movement may be chimerical or visionary, but I am disposed to present it seriously.

Discussing the judicial complications in the territory the report stamps the change made in putting deputy United States marshals back on a fee basis as a great mistake. The report takes a reseate view of the pos-sibilities of success of the Dawes commission negotations.

RAPIDLY DEPOPULATING CUBA

War Directly and Indirectly Has Cost Half a Million Lives. NEW YORK, Nov. 29 .- A dispatch to the year undoubtedly will fall considerably short World from Havana says: The World's first of the estimates made by the managers of the new tariff bill during its pendency in congress. At that time it was estimated that customs would yield about \$180,000,000 during the fiscal year. The indications now | tends to prove them nearly double that number. When the grim returns are all in it is now almost certain that this Cuban massacre of the innocents will reach 400,000. And thi awful number does not include those killed in battle or the thousands and thousands of women and children who have died of ex-

osure, disease and massacre in the 'managues' and swames. It now seems certain that more than 500,000 secople, for the most part loyal subjects of spain, have been killed by Spanish war in

luba. A week's trip through the provinces Havana, Metenzes and Santa Clara has tended to make moderate this tremendous extreme figure. The figures of Spanish official reports show but a part of the mortality. They only give the number buried in consecrated ground they do not give that fully. And yet these official ultra-Spanish reports of burial permits issued admit that in the province of Santa Clara there have died and been burley since Weyler's flat 71,847 persons. The number of people for whose existence Weyler le directly responsible is 155,132 in Santa Clara province, and of those he has killed 86,216, or

over one-half of them. Santa Clara has so far been by far the least destitute of the provinces. It has many cattle and not a very thick population. Be-tween its 52 per cent dead the mortality ranges to Pinat del Rio's admitted 80 per cent mortality. These percentages are established now by the actual figures in some thirty cities and towns. Applied to the denser populations of their respective provinces the total deaths since Weyler's "bando" will foot up not by 1,000,000. 'bando" will foot up nea ly 1,000,000.

The Sentiments of Love are Divine but They Tend to Shorten the Life. "There is no way by which people exhaust themselves, kill themselves, so quickly

as by exercising the affections." This startling remark was made by one of the best physicians in America. He was a man who had studied deeply, observed keenly, and knew men and women thoroughly. Continuing, he said:

"Sentiment is a grand, a lovely thing, and the world cannot live without it, but the exercise of the scutiments invariably exhausts. People may not feel it, but it is true nevertheless. A man or a woman wears out, breaks down, and then wonders at the cause. In ages before civilization, when men Three of a Train Crew Dead When only had brute instincts, the feelings were PORT HURON, Mich., Nov. 29.—Asphyxla- the passions were not aroused, but in the not high, the sentiments were not keen, even tion caused the death of three men in the present day of breeding, of feeling, men and
