tate Department Officials Do Not Anticipate Serious Complications with Germany Over

the Affair.

NEW YORK, Nov. 30 .- A special to the Herald from Washington says: The Hayen government has asked the United States o use its good offices for the settlement of its controversy with Germany. Ambassador White is feeling the pulse of the German authorities on this phase of the subject, and if it can be ascertained beforehand that Germany will not reject the good offices of the United States, they will be tendered.

The administration is reluctant to believe that it will be called upon to make any assertion about the application of the so-called Monroe doctrine to the present controversy, but State department officials do not deny

stopping at Hayti. The instructions have not yet been sent to the commander of the cruiser, but there is reason to believe they will direct him to anchor in the harbor of Port au Prince and see that Germany takes no action in contravention of the principles of international law

Ambassador White's dispatches to the State department do not indicate that the Berlin author/ties have any further purpose than to secure full reparation of the reporte sutrage on Lueders, the primary object bein o give Hayti a wholese o give Hayti a wholesome object lesson. Germany has demanded the immediate pay nent of an indemnity and an apology.

SITUATION IS GRAVE. WASHINGTON, Nov. 30 .- Reports thu came to the State department late in the afternoon from Hayti were to the effect that considerable excitement prevailed there and that the situation was grave. For this reason it was determined to hasten the departure he Marblehead, and the paval officials wer communicated with to this end. The impres sion appeared to prevail in Part Au Princ that a German war ship was rapidly ap proaching the place. Of course it is state that the Marbiehead goes solely to protec American interests that might be threatene

The latest advices from German scurce however, indicate that no occasion will be given for friction between the United State and Germany on account of the Havitan diff rulty, and that the matter will be adjuste. It developed today that Hayti had sent reply to Germany's demands which is some what remarkable for its firmness in view of the difference in size of the powers. Wherefore plaintiff prays that said de- Haytien note makes it clear that the republ

The complainants charge a conspiracy on the part of the American Exchange National bank to wreck the American Cereal company, or to greatly depreciate its stock, so as to secure the management of the complany. permanent results. Confidence is expresse in the letentions of the German governmen not to act injustly toward the little republic and it is felt that with the gunbout Marble head at Port au Prince to watch over on interests in the event of trouble all he been done in the way of preparation that can

From the German standpoint the Haytia no is a simple one of collecting indemnit or an offense against a German citizen pointed out that Germany has not yet prosented an ultimatum to Hayti, no German fleet has been sent to Haytian waters, no of cial intimation has been made that force would be used against the republic. The call tangible facts thus far, according to the Ger man view, are that an indignity has bee committed against a German subject, causin him pecuniary loss and that Germany hi osked an indemnity of 300,000 marks. Be youd this it is said the reports of Germany ultimate purpose to use force either on land or sea are purely conjectural and not such as the United States government will be

likely to take cognizance of. Among leading diplomats it is said that the Monroo destrine cannot be involved except through a determination by Germany to hold a part of the Haytian territory. Ger-many has no such purpose, it is said, but is merely desirous of securing an indemnity. I s probable that Germany would readily give assurances that no territoria; extension northwest snow starm has prevailed here involved, if it were not for the fact that today. Reports received at the government such assurence would concede the right of the United States to take a band in the mat ter. It is not likely that any concession of

this character will be made, as it is be lieved Germany will maintain its rights south this indemnity question with Hayti in its own way and will insist that the United staten recognize the principle in the case of Turkey's indemnity for outrages committed rican citizena.

Termination of English Treaties with Germany the Beginning of a Great Struggle_Chinese Markets the Great Prize.

Agent Stern, at Bamberg, in a report to the State department has given a great deal of general laformation governing the recent notice of England to terminate the commercial treaty made with Germany, Mr. Stern says that negotiations have been entered into at the instigation of Great Britain for a new treaty. The commerce between England and Germany comprises nearly 25 per cent of the latter's trade. Germany's exports to Great Britain proper in 1896 were valued at \$169,932,000 and to the British colonies \$26,418,000. The great amount of trade, the says, is due to the treaty of most favored notions existing between Germany and England and its colonies. treaty about to be terminated conceded to German trade the enjoyment of any con-cession or privilege granted to the colonies of Great Britain or to the mother country he herd will be used through the winter same advantages with the Dutch, French or Spanish colonies. The relations of the three latter mother countries to their colonies is much closer in matters of trade than England has with hers. Referring to the facthat Canada has recently made concession: in its tariff to English goods, and after ex pressing the opinion that there is no doub that other English colonies will soon follow Canada, Mr. Stern says: then be obliged to make concessions in its turn and amend all its customs laws in suca way that certain products of its colonic may be imported into the mother country under more favorable conditions than the corresponding products of other countries This would be carrying into effect the plan to amalgamate all parts of the British em pire into one customs union. ENGLAND THE GAINER.

Mr. Stern says that in the German tariff a certain amount of consideration seems t Uintah and Ouray agency, in Utah, in his have been extended, resulting in a great in crease of trade, and in comparing the figure it is shown that imports to Germany from England and its colonies have been con nent of Justice states that more than 600 ably greater than Germany's exports thither depredation claims, amounting to more than He instances a number of articles which \$1,000,000, have been filed against the Ute England and its colonies send to Germany Indians in the United States court of claims and upon which the tariff amounts to bu and the suits instituted in such manner as very little. Influential German papers, dis cussing the termination of the treaty, say that it will be easy for Germany to make reprisals The provision of the government and that an increase in German tariff rates for counsel to defend these cases is stated would be much more serious for Englan be inadequate and the southern Utes of than Germany. Prof. Carl Rothgen, a wel known national economist, in discussing the question, says the "most favored nation lause should not be applied to the custon duties, but be conceded only to a small cir cle of countries which are economically re-lated to each other. It is not advisable to concede to the British empire and the United States after the new tariffs hav ome into force, any treaty rights by dealing with the imports upon the basis of the most favored nation clause, thus creating fresh obstacles for closer commercial and political relations between the middle European states.
