### THE OMAHA DAILY BEE: SUNDAY, DECEMBER 12, 1897.

### 

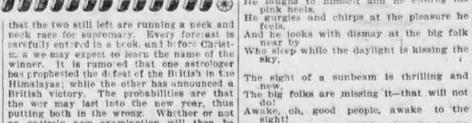

Early last spring the sovereign of Ealuchistan lost his court astrologer, Mir All Khan. This worthy, who had prophesied. like Joseph, before the throne for many sears, was fortugate enough to die a natural death.

16

Prof. Ashley H. Gray of the Woods and Forests department of India, recently a visitor to this country in connection with the ornithological congress, gives the following account of this examination:

"It was my luck," said Prof. Gray, "to be in Khelat, the capital of Baluchistan, when the gathering of netrologers and sootheayers began. They poured into the town from every corner of southern Asis. Baluchistan, as you probably know, is a wild when the gathering of netrologers and country, lying between Persia and British India, and between the Arabian eea and Afghanistan. The khan of Khelat rules it, with the advice of British agents, but civiliwith the advice of British agents, but civili-zation has so far made little progress, and in the interior the provincial governors care very little for the khan, or for Great Britain, either. The people are nominal Mahomet-ans, but their religion is so mixed up with idolatry, fire worship and four or five super-stitions beliefs that the pure Mahometans look on them as out-and-out heretics.

"Proclamation for an astrologer was made heralds and couriers. Queer looking. sheepskin-clad warlocks came from Thibet and Asia, long-robed dervishes from Persia and Arabia, turbaned priests from across the mountains, whethered and weaponed function from Afghanistan. The tribes now at war with Great Britain sent many candidates. Every caravansari in Khelat was chock full.

an entirely new examination will then be held, I cannot say. It seems hard that after predicting correctly for almost a year the labors of the two condidates should go for naught. "The post of court astrologer of Boluchis-

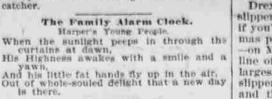

prophesying, and if one's prophesies turn out false, the executioner is almost certain to be called in." day Is old as their memories, turn blindly away. And His Highness is left with the birds of called in."

ALL THE BETTER FOR IT.

## British Peerage Founded by Yunkee Boy.

Many noble English families are more or ess affiliated with America, but it is by no means common to find a British peer of high rank, whose ancestors in the direct male line were Yankees. Such a personage, however, is Most Noble Constantine Phipps, marquis of Normandy.

About the middle of the seventsenth century there dwelt on the backs of the Kernebec Maine, a pioneer named James Phipps. In carly life he had been a gunsmith, but the delights of the wilderness wooed him, and, flinging off the to mmels of civilization he followed the course of the Kremeter with "At last, on April 11, there was a grand parade, and the would be prophets marched in imposing though dirty array past the khan and his vizier. The Eritish agents, among
