

COSTLY CHRISTMAS.
The Way John Halton Bought Snow and Ice to Ballarat, Australia.
 (By John C. Fleming.)

John Halton was an Australian squatter with a problem to solve. His solution was to buy snow and ice from the north of Scotland. He arranged for a steamer to bring the snow and ice to Ballarat, Australia. The cost was high, but it was worth it for the sake of his daughter Alice.

CHRISTMAS ANNIVERSARIES

Notable Events of History Which Have Occurred on December 25.

DAY IN THE REVOLUTIONARY TIMES

Incidents of War and Peace, of Death and Disaster, Bearing Date with the Festival of Festivals.

On the night of December 25, 1776, Washington made his famous passage of the Delaware river at McCook's ferry (now Taylorville), a few miles above Trenton, where Colonel Bull, with 1,500 Hessians, was stationed. So great was his contempt of the rebels that he neglected to plant a single cannon. At 4 a. m. on the 26th Washington's force stood on the Jersey shore and were upon the enemy's pickets in Trenton before they were discovered. Colonel Bull was mortally wounded in the struggle, which terminated in a complete victory, and the capture of about 1,000 prisoners, 1,200 small arms, six brass field pieces and all the German standards. The moral effect of this success was immense; the colonists were stimulated to fresh efforts and the dread of German mercenaries was dissipated.

American Methodism reckons December 25, 1784, as its birthday. It was on this day and in the meeting house in Lovely Lane, Baltimore, that a conference of Methodists decided to organize an independent church, and the plan was carried out with a body of eighty-three preachers and a membership of 15,000.

Thaddeus Kosciuszko, the illustrious Polish patriot, who led the brave resistance of his unhappy countrymen against the allied forces of Russia, Austria and Prussia, was released from imprisonment in St. Petersburg by the emperor, Paul I., on December 25, 1796. His distinguished services in the cause of American independence during the revolution gained him the thanks of congress, a grant of land and a pension. Kosciuszko passed his later years in France and Switzerland and was killed in 1817 by a fall from his horse over a precipice.

Fort Fisher, N. C., was visited by Colonel S. Featherstone, appointed commissioner by the state of Mississippi to urge the hesitating Kentuckians to adopt measures for a united defense against possible attack of the northern states. On the same day the Greenback City was the scene of a mass meeting of enthusiastic Louisianians assembled to ratify the nomination of delegates to a southern rights convention.

Christmas, 1862, was a gloomy day for Minnesota and the thirty-eight Indian prisoners at Markato, who were awaiting execution on the following day for participation in the terrible massacres which had marked the Sioux uprising of that year.

Fort Fisher, N. C., on the Cape Fear River, the outlying defense of Wilmington, was ineffectually bombarded on December 25, 1864, by the expedition sent against it under the command of Admiral Porter and General Butler.

The celebrated Benito Juarez was inaugurated president of Mexico on December 25, 1857. He had first been elected to this office in 1851, and thus led the Mexican resistance to the French usurpation under Maximilian, which terminated in the tragic death of the Austrian prince at Queretaro. The death of Juarez in 1872 left Mexico without a recognized and dominant leader until the advent of the present chief executive, General Porfirio Diaz.

President Andrew Johnson issued his historic proclamation of amnesty to those who had served in the Confederate army and were disfranchised for that reason by acts of congress then in force, on December 25, 1865. This was the president's Christmas present to a large body of ex-Confederates.

On December 25, 1869, the body of Edwin M. Stanton, secretary of war under Lincoln, lay in state in Washington, he having died on the previous day. Oddly enough it was

President Grant, with whom Stanton wrangled for having ordered the troops around Washington from upon assuming command as Lieutenant General. Grant ended the dispute by appealing to President Lincoln, who sustained the general, observing that the latter would resign if interfered with.

Andalusia, Spain, was shaken by earthquakes on December 25, 1884. The shocks were felt in Madrid and some 266 persons were killed. The seismic disturbances continued for a week and a number of towns in other districts of Spain were destroyed. Usually South America is looked upon as the land of the earthquake, but this distinction more properly belongs to Naples, in which portion of Italy between 1783 and 1857 no less than 111,000 persons were killed by earthquakes. This is at the rate of more than 1,500 a year for an average population of 8,000,000.

On Christmas of 1888 General John A. Logan lay in his last illness at his home in Washington, death ensuing on the following day.

Samuel Champlain, the famous French explorer, soldier and navigator, died December 25, 1635. He was born in the town of Champlain, France, and in 1610 discovered the lake which bears his name. He spent several years in promoting the fur trade and in exploring the region around the great lakes. He was appointed governor of Canada in 1620, and wrote several narratives of his discoveries, which were published in 1630.

General Samuel Ryan Curtis, who commanded the federal troops at the battle of the Marston, served with distinction in the Mexican war. He was a member of congress from 1857 to 1861, and a member of the peace congress at the outbreak of the war, died at Council Bluffs, Ia., December 25, 1868. He was born in Ohio in 1807 and graduated at West Point in 1831.

Captain James Cook, who discovered Hawaii, which he named the Sandwich Islands, discovered Christmas Island December 25, 1777.

Christmas day, 1642, gave to the world the illustrious philosopher, Sir Isaac Newton, whose discoveries in astronomy, physics and mathematics mark him as one of the greatest of all scientific investigators. In conjunction with Leibnitz he shares the honor of inventing fluxions or the calculus, that branch of mathematics which has perplexed and grieved so many college students since their time.

John Andrew Hale, one of the most celebrated of English jurists and famed as an upright judge, died on December 25, 1678, at the age of 67. He was appointed by Cromwell judge of the common bench in 1653 and elected to Parliament in 1658 and in 1660 was appointed chief baron of the exchequer by Charles II. and chief justice of the king's bench in 1671. Sir Matthew left a reputation upon his grandchildren to abstain altogether from the drinking of beer. Pledging one health meant many more. He said, and resulted in drunkenness.

The combined ages of a couple recently married in Kansas was 134 years, the bride being 71 and the groom 63.

Because the widow of Saron, the late photographer, has married again, it is being said of her that she was unable to develop a negative.

Mr. Fisher, N. C., on the Cape Fear River, the outlying defense of Wilmington, was ineffectually bombarded on December 25, 1864, by the expedition sent against it under the command of Admiral Porter and General Butler.
