STANDING IN THEIR OWN LIGHT. As a class American workingmen are ntelligent, as well as skillful, but what bey lack is intelligent and honest leaderdrip. As a class the men who seek to lead them do not want to work, but prefer to make a living by agitation. In order to create a want for their services through pneumatic tubes to facilitate they often precipitate contests which are not in the interest of the wage workers and advocate policies that are actually points, forces to the front the question to the detriment of the bread winners. For example, the recent action of the In the large cities of Europe where Board of County Commissioners in setting apart \$75,000 toward defraying the cost of the exposition buildings is being denounced by men who claim to speak for labor as injurious to the working classes. How such a conclusion can be reached by any intelligent person passes our comprehension. In what way could be recognized in Cuba along the battle are sent to other points or forwarded to the commissioners have promoted the lines, but the badges of the Red Cross other cities promptly. How could the or short according to the demands of money have been expended to greater the occasion, the final delivery is by advantage to workingmen? While it is government employes and is prompt true that the buildings toward which the county is contributing were planned and some of them contracted for before the bond proposition had been ratified, it was well understood on all hands that the proceeds of the bonds would go toward aiding the exposition in carrying out the plans for a creditable exhibit That did not mean that the money should be expended in buildings expressly designed for exhibiting the in dustrial products of this city and county, but for structures in which these products should have a proper place with those of other localities in this and other states. Nobody in or out of Omahahad any right to expect that the county would use the proceeds of the bombs for the purchase of articles to be exhibited. whether these articles were the product of the farm, orchard and dairy or of

the mill and factory. Had such a course been pursued the workingman's share of the outlay would have been much less that it will be when paid in wages to members of the build ing trades. To say that the exposition managers would have completed the necessary buildings in any event and without aid from the county is an assymption that is far-fetched. With all the aid they can possibly get from the city, county and state and with every dollar of stock subscription paid in the managers will still be short \$200,000 before they can pay for all the buildings that will be required by the extraordinary demand for space that comes from all sections of the United States and from foreign countries. It is a condition and not a theory by which they are confronted. Instead of obstructing the men who are struggling night and day to make the exposition a success, the worklagmen should join with them in every enort to secure more aid for the great task that has been loaded upon their

Sepator late has drawn his bill with marked nce and full comprehension of a deficit in the public revenues. Congress should concur in its provisions.

Watching the Scaling Business. Four British war ships are now on their to the Esquimault squairon, which vay to the Esquimant square with this addition, will be the strongest fleet Great Britain has ever assembled in the north Pacific. It would be sensational to say United States, but it means that, with usual policy of attending strictly to busi uss, Great Britain intends to be prepared for out of the Bering sea question. Senten paratus" is her rule, and by being always prepared she everts many dangers. One cannot but admire the energy which is equal to maintaining an adequate fleet in every sea of either hemisphere where they may be

A HYGIENIC BOME.

Minsey's Missaille.

My wife and I are trying hard.

To live or beatthful diet.

We read the food chart by the yard,
And run our kitch in by it.

We've hapished from our bills of fare.

All that such guides condemn:

True hygiere is all our care. As planned and taught by them,

For breakfast, effect is tablooed, Hot cakes and eggs forbidden, And malk, since it is off imbard. With germs profuse, though hidden; Bread is unwhole some, so is steak, Submissive to our lot. Outment and graham gems we take, And drink boiled water, hot,

For dinner, soup will never do,
And oysters typhold nourish;
Salads, entries, and less, too.
Are more dysperite flourish;
Potatoes thy the lost advice;
Are poisonous, were told;
We cut rare meat, chopped fine, with rica,
And drink boiled water, rold.

For supportsome professors teach. The best to go without it.
Out since discretion's left to each, We take our chalce about it;
On chicken, walles, the and cake, We are forbid to tead; sten waters, com events. And pranes are all we need,

It grieves us much our friends to view So reckless in their dit;
Our wholesome menu we pursue,
And beg of them to try it;
Ital appetite's ungodly sway
Tacir nature so entiralls.
We cannot get a guest to stay
Within our healthful walls!
