MYSTERIOUS TROUBLES.

Few People Understand or Realize It. A Clear Explanation of Its Nature and How to Avoid It Clearly Shown.

Why is it that we see so many men who look well, but who are miserably weak? Why are so many women, whom we see pale, with parched lips, dark lines under the eyes and a general lack of lustre?

These things seem to be greatly increasing of late and without any apparent cause. We see more men who lack vigor than ever before. We meet more women who seem broken-down than in the past.

The truth is, people are not well; but they should be. They can be if they would only take the means of recovery that are near at hand. In writing upon this subject, Dr. R. A. Gunn, Dean and Professor of Surgery of the United States Medical College, New York, says:

"In a large class of ailments where the blood is an unhealthy state, where there is no evidence of organic mischief, but where the general health is depleted, the face sallow, the urine colored, constituting the 'bilious condition'—the advantage gained from the use of Dr. Cassell's Food is remarkable. I find also that in Bright's Disease it seems to act as a solvent of albumen; to soothe dry and inflamed membranes, and to supply the blood with that which blocks up the urine-bearing tubes."

It is undoubtedly true that Americans, as a people, are in a more or less serious condition, and that there are complaints which have become national diseases. But it is also true that modern science has provided an adequate remedy which is able to fully restore and supply weakness and misery by health and happiness.
