Chicago has become reconciled to the establishment of a branch Indian supply depot at Omalia, but wants to get even by capturing the main depot away from New York. As Uncle Sam's Indian wards are nearly all west of the Mississippi, there is no good reason why their base of supplies should be kept on the Atlantic seaboard.

Through the agency of a government board the poor tenant farmers of Irefand have been induced to make use of the honey bee as a rent-raiser instead of the squealing pig, and the result is that some tenants are actually buying the land on which they live. OMAHA IS THE PROPER PLACE.

At the coecial session of congress last year, while the senators and members of the house from Illinois were chasing after the local offices and absent from their seats a bill was slioped through congress making Omaha a depot for Indian surplies. THE ISSUE CLEARLY DEFINED.

The battle for the control of the house the chances of India having to resume of those chances has destroyed the supreme hope on which the cause of international bimetallism rested. That cause, therefore, must be dismissed from further consideration.

The recent address of President Mc-Kinley in New York plainly and unequivocally committed the administration to the maintenance of the existing standard of values and it has been hailed by the sound money press of the country and by all interests which support the cause of sound money as an entirely satisfactory declaration in behalf of the gold standard. It was a "keynote" which, it can be confidently predicted, a very large majority of the republicans in the house of representatives will give heed to and in which a very large majority of republicans and other sound money men in the nation will see a distinct challenge to the free silver forces. The debate in the senate on the Teller resolution made perfectly clear the fact that the silverites intend to keep their cause to the front. All of the champions of free silver proclaim this to be their purpose. They propose to continue their assault upon the public honor and credit, to go on with the fight for a policy the success of which would place this country on a silver basis. These men do not temporize; they boldly avow their policy and their purpose. They offer no compromise and will accept none. They are for the free and unlimited coinage of silver by the United States, at the ratio of 16 to 1, regardless of consequences.

The friends of sound money, the supporters of the existing standard of determined in battling for their cause They must unequivocally declare their policy. There must be no halting, no wavering, in the contest for the maintenance of the monetary standard of the civilized world. The conscience, the integrity, the honor of the American people must be appealed to, as was states of the middle west the loan business, done by President McKinley when he said that "the United States will discharge all of its obligations in the currency recognized as the best throughout the civilized world at the times policy and every consideration affecting the credit of the government and the welfare of the people demands that it be maintained. BIENNIAL ELECTIONS.

1900.

The conviction is general among intelligent students of American politics that we have too many elections, or perhaps more properly too frequent elections. The fall and spring elections which occur every year in many states require, under modern political methods, that campaigns overlap each other and become practically continuous from one end of the year so the other. That rebuke is so clear, direct and palpable that the unrest caused by Senator Wolcott's assurance must be quieted. The president is in full accord with his secretary of the treasury-in fact, the secretary is only the mouthplece of his chief. This startling information will astound the free sliver men, who have been congratulating themselves that the prooldent is spinoless and lacks the moral courage to meet the money question firmly and squarely for a fight to a finish. The silver men had jollied themselves into the complacent conclusion that the administration would remain supine and nerveless while they again marshaled their hosts for a free silver victory. They have deceived themselves again and there will be lamentations in their wigwams and tepeca.

An Opportune Address.

Prisidelphia Ledger.
President McKinley's address at the ting of the manufacturers was so timely sagacious and courageous that it cannot fail to encourage enterprise, strengthen financial confidence and increase the rising ide of prosperity.

No public address from so distinguished an authority could have been more opportune, legislature to impair or destroy the honor and the credit of the nation, by adopting a resolution of repudiation and the debagement of the country's money. He spoke at a time when the most malign political forces were active in persistent efforts to create and maintain a dominating sentiment in favor of repudiating more than one-half in favor of repudiating more than one-half common, most timely. After the significant, language of Mr. McKinley at the New York ligations, and when only the faithful few were resolutely opposing them; at a time when many of the legislative servants, the political leaders of the public, were showing timidity and indifference with regard to questions of the first and greatest sovernment would not permit a doubt to exist anywhere concerning the stability and integrity of its currency," the Wolcotts and Tellers and Chandlers can hardly claim that the president is in secret sympathy with their peculiar financial views. to the entire country.
