Harris Resolution of Inquiry Causes a Spirited Discussion.

IT IS FINALLY PASSED IN AMENDED FORM

Asks the Attorney General Why He Changed His Plans Concerning the Kansas Pacific

WASHINGTON, Feb. 15.—A resolution of inquiry offered yesterday by Senator Harris of Kansas precipitated a spirited discussion of the Pacific railroad question today. The resolution called on the attorney general for the reasons which induced him to abandon his plan of redeeming the first mortgage bonds of the Kansas Pacific branch of the Union Pacific and having the road operated by a receiver.

Mr. Foraker explained the view taken of the matter by the administration, showing the president was convinced the reorganization committee proposed to pay for the road all it was worth.

The resolution was finally passed in amended form. Mr. Pettus (Ala.) offered and secured the passage of a resolution requesting the president, if not incompatible with the public interest, to inform the senate that action has been taken in reference to the proposed sale of the Kansas Pacific branch of the Union Pacific.

Mr. Harris (Kan.) directing the attorney general to furnish the senate information regarding the agreement made by the attorney with the reorganization committee of the Union Pacific railway concerning the Kansas Pacific branch was laid before the senate.

Mr. Chandler said he had no objection to the resolution, but did not approve of the preamble, which included a press dispatch. Mr. Harris replied that he had made a statement. The Union Pacific, he said, for a long time had attempted to influence congress and officials of administration to scale down the debt of that company to the government about 50 per cent.

When the present administration came into power the situation was grasped and the government finally obtained every cent due from the Union Pacific on the road line. "We were all very glad," said Mr. Harris, "that the government should get just due and nobody else should cordially congratulate the present administration that it had won the successful negotiation of that transaction."

It was also pointed out by Mr. Harris that the government would get the full value of the debt from the Kansas Pacific branch. In case of reorganization committee should pay the full value of the debt, but the government would redeem the first mortgage bonds and have the road operated by a receiver.

Mr. Harris maintained the Kansas Pacific road was worth the last cent of the government's claim, and it ought to be demanded by the government. Mr. Morgan, referring to the effort to pass a bill in the senate giving powers to the administration to become a bidder for the Kansas Pacific road, said he thought the senate ought to take the measure up and pass it.

Mr. Ball (Tex.), from the committee on rivers and harbors, reported a resolution calling on the secretary of war for information for creating a channel 100 feet wide at the mouth of Double Bayou, Galveston bay.

Mr. Williams (dem. Miss.) suggested that the debate be extended until March 3. The suggestion was accepted and the order was read.

Mr. Lusk then called up a bill reported by his committee requiring prepayment of postage on all first class mail matter, but after a brief debate it was committed.

Secretary Wilson Gives Results of His Observations—Growers Know Little of Science of the Industry.

WASHINGTON, Feb. 15.—Secretary Wilson of the Agricultural Department has returned to the city from a week's visit to Florida, where he went at the suggestion of the president to study the production of that country. In an interview concerning his observations there the secretary spoke as follows:

The most striking development I found in Florida was the growth of the tobacco interest. Within the last few years 40,000 Cubans have come over from their native country, many of whom had been life-long tobacco growers and understand the art from the planting of the seed to the marketing of the cigar.

The Americans "caught up" in the business very rapidly. The state statistics show that the Cubans sold last year 69,000 cigars and the sale of all tobaccos brought Cubans \$12,000,000. The United States still pays \$100,000,000 to Cuba, Mexico and other countries in cigars.

Mr. Little (Iowa) introduced a resolution inquiring into the tobacco industry. Secretary Wilson said he was forcibly reminded of the work done in the past years by the agricultural experiment stations in Florida, which had been under the influence of the tobacco growers.

Annual Convention of the Nebraska Division Now in Session.

ORDER IS IN EXCELLENT CONDITION

Reports of Officers Show Its Affairs to Be Very Prosperous—Commander Davis Makes Some Recommendations.

The end of the first day's session of the Nebraska division, Sons of Veterans, which is in annual convention in this city, found all the delegates in very good spirits. This hilarity, which was shown only in very proper form, was produced by the fact that the last year has placed the order in the best condition in every way that it has ever enjoyed in its history.

All the reports were delivered at the first meeting of the convention, which was held yesterday afternoon. At 2 o'clock Commander Davis called the body to order, about fifty delegates being seated before him.

The meeting was largely occupied with the preliminary work of the convention—in appointing committees and listening to the reports. The division commander, the chaplain, the adjutant and the quartermaster each gave a resume of the year's work in their respective lines.

According to the reports of the officers good progress has been made during the last year. The delegates were especially well pleased with the financial report. This report showed that the division is completely out of debt and has money in the treasury.

The report of Commander Davis contained a number of recommendations. Among the most important of these were the adoption of an insurance department, the commander also recommends that the per capita tax be increased so as to replenish the treasury.

Direct from Distiller to Consumer

Saving Middlemen's Profits, Preventing Possibility of Adulteration.

We are distillers, with a wide reputation of 30 years standing. We sell to consumers direct, so that our whiskey may be pure when it reaches you. Adulterated whiskey is dangerous, abominable, yet it is almost impossible to get pure whiskey from dealers. We have tens of thousands of customers who never buy elsewhere. We want more of them, and we make this offer to get them:

We will send four full quart bottles of HAYNER'S Old Double Copper Distilled Rye for \$3.20, Express Prepaid. We ship in plain packages—no marks to indicate contents, unless you request them. When you get it, test it. If it isn't satisfactory return it at our expense, and we will return you \$3.20. Such whiskey cannot be purchased elsewhere.

We are the only distillers selling to consumers direct. Others who claim to be only dealers. Our whiskey has our reputation behind it.

After a long squabble the Missouri avenue sewer assessment has finally been settled, and many of the residents of the district appear to be perfectly satisfied with the graduated assessment arranged by the city engineer. When the plan was first proposed, before assessing each lot in the district an equal amount was suggested, a great many protests were filed, and the council called upon Engineer Hoel to consult with residents of the district and ascertain just what would be satisfactory. As a result the graduated assessment was suggested, and then some of the objecting property owners filed protests, claiming that the old way of assessing all alike was best. After deliberating over the matter for several weeks the council adopted the graduated plan. Some of the dissatisfied property owners assert that they will take the matter into the courts in an attempt to have the plan rescinded.

Nearly all of the machinery to be used in the new sausage factory at the Cudahy plant has arrived, and Superintendent Cameron stated yesterday that he expected to start the new factory in operation the latter part of the week. All the machinery is of the latest improved pattern and is propelled by either compressed air or electricity. The capacity of this plant will be 100,000 pounds of sausage a day.

The new soap press for the Cudahy soap factory has been accepted by the company, and is now in daily operation. With the machinery recently added to the factory 1,000 boxes of soap are turned out every day.
