ELECTRIC WIRING MENACES PROPERTY

Lights Put in for a Temporary Display Allowed to Remain Until They Threaten to Destroy the Building.

LINCOLN, March 2 .- (Special.)-The apparatus for lighting up the rotunda and lower hallway of the capitol building, which was put in to help furnish the display at the Bryan reception in July, 1896, still remains in the building and is a constant menace, not only to the property of the state, but to the lives of citizens. The wires were run down from the dome and a temporary wooden frame was put in, to which was attached eighty incandescent lights. The wires are strung along the pine frame and in many places the insulation or covering of the wires gether and succeeded in agreeing on candits gone, so that when the current is turned dates for the offices of exciscmen, members on, as it is at every banquet or reception, there is danger of firing the woodwork of the building. A fire started there would rise rapidly to the dome, which is mostly built of wood, and would be almost inaccessable to the firemen. This situation is the more serious when it is remembered that the state carries no insurance on the building or contents. A few minutes of fire and water in library alone could cause a dam-

age of \$70,000. Besides the danger of conflagration the electric wires strung in the building are ver-itable man traps and it is a wonder that there have not already been accidents from this cause. On the second floor within reach of anyone leaning on the railing of the rotunda are bare wires which when charged touching them. The attention of the custodians of the building has been called to the electric firetrap, but so far no move has been made either to remove the apparatus or to put it in a less dangerous condition. FIRE INSURANCE BUSINESS.

In 1897 the risks written by fire insurance companies in this state amounted to \$98,425, 592.53, the premiums received amounted to \$1,380,734.56, and the losses paid by the companies amounted to \$439,094.06. Of this business the two Nebraska companies wrote \$10,620,427 in risks, collected \$158,865.35 in premiums and paid losses amounting to \$43,-094.52. The largest business by an individual company was done by a Brooklyn institution while the next largest was by an Omaha company, showing the loyalty of Nebraskans to home institutions. The following is the showing made by the fifty-three farm mutual companies as compared with the forty-nine

Application was made today to the supreme court for a writ of habeas corpus for the release of Cherles Ream, who was recently sent to the penitentiary from Cuming county for cattle stealing. The writ was allowed and made returnable March 15. The basis of the application is that the act to define and punish cattle stealing, which was pussed in 1895, was improperly passed and is unconstitutional. The claim will be made that the act as signed by the governor was not the same in form as when passed by the legislature, the amendment including hog stealing in the act not having been entered

in the enrolled copy of the bill. The seven town mutual companies now doing business in the state had at the close of 1897 risks in force amounting to \$3,374,931 total income for the year was \$32,-; expenses, \$21,266.35; losses paid,

The supreme court has announced a radical change with reference to motions. Here reads as follows, will be strictly enforced:: Section 625b. Costs may be allowed on a motion or demurrer in the discretion of the court or judge, not exceeding \$10, which shall be absolute against the losing party on such demurrer or motion; provided, that this provision shall not apply to verbal motions and demurrer ore tenus during the course of the trial.

Heretofore the time of the court at each session has been largely taken up consider ing motions. These motions in many in stances have been exceedingly frivolous. I is thought the enforcement of the provisions of the section of the statute above set out will have the effect of lessening the numbe of motions that will be filed very materially. The clerk of the supreme court is sending out copies of the amended rules of the court. The rules in which important amendment have been made are Nos. 2, 6, 9 and 12, STATE HOUSE GOSSIP.

DON'T NEGLECT

COMMON CASE OF PILES. It May Lend to Serious Results.

When people generally understand that all such fatal diseases as fistula, ulcer of the

rectum, fissure, etc., almost invariably begin in a simple case of piles, they will learn the wisdom of taking prompt treatment for the first appearance of trouble in this quarter. The Pyramid Pile Cure will certainly cure every form of piles, itching, bleeding, protruding or blind piles, and hundreds of lives have been saved by using this cheap but effective remedy right at the start, because at such a time a single package will effect a cure, while in the chronic, deep seated cases, several packages are sometimes necessary before a lasting cure is affected.

Physicians are using the Pyramid Pile Cure in preference to surgical operations and with uniform success. The remedy is prepared by the Pyramid Drug Co., of Marshall,

Mich, and for sale by druggists everywhere The firm receives hundreds of testimonial letters from cured patients and publish ; fresh list every week. This week we take directors' meeting held later on the same pleasure in presenting the following: From day H. E. Babcock was re-elected president Mr. M. A. This will be a very happy solution of the municipal problem, which many thought would be further complicated by the organization of the new republican clubs.

Omsha's Club in the Western League Has Started Well.

WANTS ONLY A GOOD SECOND BASEMAN

Manager O'Brien Greatly Pleased with His Success in All Things but the Scenring of Grounds for the Club.

Manager O'Brien of the Omaha Base Pall club arrived yesterday from Chicago and will now remain to Omaha and give his undivided attention to the necessary preparations for the season. Aside from the unfortunate situation in regard to grounds, he is well pleased with the indications for a successful season and is satisfied that when one or two lines that are now out are drawn in he will have a team that will be able to hold its own. The men have signed contracts with a few exceptions and the signatures of the remainder are expected in a few

Manager O'Brien is especially pleased with his success in securing Chauncey Fisher from Brooklyn and George Hemming from Louisville. He thinks that they will be the crack The young blacksmith, Herman Risse, who pitchers of the Western League, and with Hagerman and Sullivan, he considers the team already in good shape as far as pitchers are concerned. Fisher and Hemming have not signed contracts yet, as the time limit has only recently expired, but there is no serious doubt that they will come in the fold very shortly. The only thing that is troubling the man-

agement in this particular is an alleged ser-ious effort on the part of the Chicago management to draft Tommy Tucker away from Omaha. It has been said on presumably reliable authority that Burns wants Tucker first base and captain the team, but with Decker and Everett both available for the position the story seems somewhat im-probable. In any case Manager O'Brien proposes to hold on to Tucker if possible.

The second base matter is still open. It

has been impossible to secure Stafford, and Roat is still the only man now available for the position. But Manager O'Brien is negotiating for two National league second basemen and has an excellent prospect of securing one of them. With a first class second buseman, the team will be practically complete, although another good pitcher may be signed if it should develope that Sullivan will not be fast enough for the Western League.

Several of the Western league clubs would like to get McKinney, but there is no intention of letting him go. Loftus and Vanderbeck have both indicated an anxiety to make a deal for the Omaha third baseman, but as he promised to be just as valuable to Omaha it is considered advisable to retain him. Eustace is at Hot Springs getting in condition for the summer and Manager O'Brien thinks he will show up fit to play better ball than last year. The entire team will report at Omaha about April 1 and Man-ager O'Brien wants to have the grounds in shape for practice at that time.

In order to do this it will be necessary to close final arrangements for grounds at once and begin fitting them up not later than March 10. The grounds question will be pushed hard now, and unless some arrangement is made by which the university grounds can be secured within a very few days the Vinton street grounds will probably be chosen as a matter of necessity. Speaking of this matter Manager O'Brien says he thinks that the Omaha business men who take an interest in base ball should assist him in securing grounds that will be satisfactory alike to the management and the public. It is a matter in which all are interested, and it is undoubtedly true that a little pushing from some of the local peowill assist very materially in bringing the matter to a focus. The management is very naturally anxious to secure a location that will be satisfactory to its patrons, but as only a little over t. month remains be-fore the season opens it is imperative that the matter should be adjusted without addi-

SCHEDULE OF NATIONAL LEAGUE. Cinbs Will Make Four Eastern and

Western Trips This Year. ST. LOUIS, March 2 .- Very little was done luring the short morning session of the baseball magnates and they did not really get down to business until 2 o'clock this afternoon. The afternoon business was of a perfunctory character and there were no sensational developments. The time was devoted wholly to making changes in the rules and adopting the schedule of games. The majority report submitted by James A. Hart and A. J. Reach was slightly amended, most of the changes being included in the minority report submitted by Edward Hanlon of Baltimore. The changes were adopted unanimously. Most of them were verbal and of a minor nature. The more important were made to conform to the new rule relative to the suppression of rowdyism on the field. The most important change was the new rule substituted for rule 57, which reads as follows: "The umpire shall perform all the duties devolving upon a single umpire except giving decisions on first, second and third bases and deciding points of play in running such bases, which shall devolve upon the assistant umpire, except as re-gards third base, when any other base is occupled by a base runner, in which event the umpire shall decide all points of play at third base. It shall be the duty of the umpires to assist or advise each other in rendering any decision when asked by the other

To rule 61, which relates to the suspension of a player, is added a provision that the term of suspension shall not exceed three days, including the date of removal, Section 2 was added to rule 51, as follows: The umpire shall immediately after the suspension of a player give the president of the league a full statement of the facts as to the cause for the suspension. In flagrant cases he shall report to the president by telegraph."

cases he shall report to the president by telegraph."

After the playing rules had been revised the league adopted the schedule as prepared by President Young. The schedule differs from that of former years in that the clubs make four eastern and western trips, instead of two, as formerly, and that New York and Pittsburg will play on Sukday valle abroad. The schedule follows.

THIS PAPER.

58-60 Wabash Avenue, Chicago, Ill., Feb. 28th, 1888.—To the Omaha Bee: I have discovered a remedy which is a proven cure for catarrh and catarrhal deafness, consumption, and all diseases of the air passases of the head, throat and chest. It is a product of the X-ray and has been declared by a board of eminent chemists and physical and an instrument for good, unsurpassed by any other methcal or sclentific discovery; of modern times." Prof. J. H. Seelye, M. D. LL. D., says: "This is not simply a good melcine it is more than a medical wonder—ti so no of the scientific wonders of this age of sclentific discovery; a discovery worthy of an Edison, and one destined in control of the property of the human race for all time."

This discovery or mine is the first barrier errected by science against the onward march of the property of the human race for all time."

This discovery or mine is the first barrier errected by science against the onward march award, which clouds millions of homes today, and it will be a sure salvation to all who will accept it. Cure cold in the head and award, which clouds millions of homes today, and it will be a sure salvation to all who will accept it. Cure cold in the head and carerth will never come.

My remedy not only cures deep-scated discases by travents discase by removing the causes which produce it. It is not a naive couse melicine. It is the only remedy that can be yet the simple act of the masal passages. Hence, it is the only remedy that can be yet the simple act of the masal passages. It's our daily thought to win trade.

It's our constant study to make the best garments for the least money.

Nicoll's stores are conspicuous in nearly every principal city in the United States. A half hundred stores requires a tremendous stock. The cloth makers of the world offer us flattering inducements to get our trade. We in turn offer them to you. Any wonder that we do the larg-

est tailoring business?

Yes! You see the same prices elsewhere, but they have a decidedly different meaning—when Nicoll's name is alongside. The name is a guarantee for best tailoring.

We mean to be generous with you. If we cannot please you in every detail—we won't take your money.

LETTERS FROM SOUTH AMERICA

WILL BE PRINTED IN

THE OMAHA SUNDAY BEE.

Mr. Carpenter, the well known newspaper correspondent, is making a trip of over 25,000 miles through the frequented and unfrequented parts of South America. He will describe for The Bee what he is seeing, tell of the incidents of his journey, give interviews with men prominent in all walks of life-in a word give a series of graphic pen pictures of life and its conditions in the countries to the south of us. Old readers of The Bee know what Carpenter's letters are-new subscribers will need read but the first letters to become enraptured with his style and subject. These letters, commencing during March, will continue regularly each Sunday for a year.
