FROM THE FARTHER WEST

Valuable Discovery Made in Vicinity of Pine Ridge.

LARGE DEPOSITS OF HEMATITE IRON

Likely to Do Something Toward Re deeming the Bad Lands_Late News from Different Mining Enterprises.

LEAD, S. D., March 11.-(Special.) summer one of the geoloof the United States survey considerable time in the bad lands in the vicinity of Pine Ridge agency and western Nebraska, the main end in view being to ascertain the underground re- LARGELY INCREASED ACREAGE. sources for water in that region. It is now learned that several unexpected discoveries were made, which may, to a certain extent, relieve the bad lands of the name of worthlessness. Extensive deposits of hematite iron ore were found near the agency buildings, which, the geologist thinks, will some day prove valuable to work. Extending southward from the agency, across Into Nebraska, was also found an extensive be fifteen feet thick and covers a large area. The sand is a fine quality and is sharp grained. It is valuable for polishing powder and is also used quite extensively for tions which indicate that an excellent arte- material increase over the acreage of last sian water supply is available. It is cal-culated from the way the formations are in arched that the artician basin is near the surface, and that when tapped a strong pressure flow will be forthcoming. There has been considerable difficulty experienced has been considerable difficulty experienced. at the agency and on the reservation in getting a supply of good healthful water, and It is expected that, on the strength of the Investigations and discoveries of last seeson,

J. D. Karr of Chicago, who is interested in the Summit group of mines near the Horn-blende camp, is in the Black Hills looking after the interest of his property, which is considered valuable. The shaft has been sunk 100 feet and crosscuts have been made in opposite directions which show four ledges The ore is free milling and will average \$15 a ton gold, besides carrying large per cent of concentrates, some of it being worth \$30 a ton. It is the intention of the owners to build a smelter as soon as the ledges are properly developed. There is also a good smelting proposition of iron on another part of the ground. The new hoisting plant of the Golden Hill

Mining company at Two Bit has been started. The shaft is ninety-five feet de ., in highly mineralized porphyry which a.says well.

The Golden Reward Development company.

composed of employes at the Golden Reward chlorination plant, has a shaft in Spruce gulch that is down over 200 feet. The material at this depth has changed to a sand rock that is highly mineralized with pyritic ore which is considered a good indication. OBTAINS A JUDGMENT.

D. Rossiter of Deadwood recently obtained from the circuit court a judgment against the Black Hills Gold and Silver Extraction Mining and Milling company for \$17,912.53, and the property of the company will be sold on March 26 to satisfy the judg-The company owns the cyanide plant in Deadwood and the claim is for money advanced and services rendered for a period

PROPOSITION FALLS THROUGH. It is reported that the proposition of the

care of his health during youth and maturity he may live to a green old age, and still be able to say with absolute truth, "I am a child myself." a green old age, and still be able to say with absolute truth, "I am a child myself." Youth is not a matter of years. Happiness is not a question of experiences. Youth is happiness and health is youth. The healthy person, young or old, will be a happy person, young or old, will be a happy person. It is a simple matter to get the body into a healthy condition and then to keep it there. Dr. Pierce's Golden Medical Discovery is the greatest of health makers and health savers. It is the great blood-maker and flesh-builder. It makes the appetite keen, the digestion and assimilation perfect, the liver active, the blood pure, the muscles strong, the brain clear, the nerves steady and every vital organ in the body healthy and vigorous. It makes firm, healthy flesh, but does not make corpulent people more corpulent. It does not make flabby flesh like cod liver oil. It purifies the blood and drives out the poisons of malaria and rheumatism. It is the best remedy for blood and skin diseases. It cures 98 per cent. of all cases of consumption. Grateful patients, who had been given up to die, have permitted their experiences, names, addresses and photographs to be reproduced in Dr. Pierce's Common Sense Medical Adviser. The sufferer who wishes to investigate may write to any of these. The 'Golden Medical Discovery' is sold by all medicine dealers, and only unscrupulous dealers will try to induce a customer to take some worthless substitute for the sake of a few pennies added profit. Send 21 one-cent stamps to bover cost of mailing only, for a copy of Dr. Pierce's Common Bense Medical Adviser," in paper covers.

MINING IN THE BLACK HILLS syndicate was to have the owners of the property deed to them one-half of the property for the construction of the tunnel. The proposition was considered at several meetings and nearly terminated success-sibly illegal, but in desperate cases desmeetings and nearly terminated successfully. Several of the property owners held back, however, and it is said that the greatest hindrance to be deal was the exorbitant price asked by the owner of a piece of ground on Spearfish canyon which was wanted for the site of the tunnel dumping ground. It is said the price asked was 170 000 for tweeter. The Kilestick and

ing ground. It is said the price asked was \$20,000 for two acres. The Kilpatrick syndicate will operate somewhere else in the hills. It is the general belief that the tunnel plun was practical and would have settled beyond doubt the question of there beling an extensive ore body at the base of Ragged Top. To reach the ore body from the surface would require a shell accepts. surface would require a shaft 1,000 feet

deep.

The main tunnel in the Penobscot mine has been run over 200 feet with the formation and the face at the end is twelve feet wide and ten feet high, all solid ore with scarcely any waste and an average sample stall a service of their own. The improve-ment company has within the past few days lands in the vicinity of Pine Ridge agency shows a value of \$36 per ton gold. A cross-in studying the goology of South Dakota cut tunnel is being run toward the west to explore another shoot of ore known to exist.

South Dakota is Preparing for

SOME OF THEM ARE MAKING RAPID GAINS

There is No Restriction to Any Line of

Industry.

Railways Show Remarkable Strength and the Demand for Products of All Great Industries is Increasing.

NEW YORK, March 11 .- R. G. Dun & Co.'s Weekly Review of Trade will say is its issue of tomorrow:

its issue of tomorrow:

It is most gratifying that no industry or branch of business shows any restriction or hindrance, but some dave been rapidly gaining for the last week and month. The rallways are even, gaining while speculators are selling their stocks and the demand for products for all the great industries is increasing. More gold is coming from Europe than is needed, \$10.888.000 having been ordered during the last week and money markets are nowhere alarmed or stringent, though reasonably more cautious. The country rests assured that its industries, almost all of its business, the foreign demand for its products especially, and all its resources are beyond the reach of any foreign power and that its honor and foreign interests are in safe hands.

The greatest of all industries is sending grain forward as if there were no limit to the supply. Wheat exports have been 4.187,497 bushels, flour included, against 1.168.171 bushels last year, from Atlantic and Pacific ports, and for two weeks 7,462,730 bushels, against 3,156,546 bushels last year, Exports of corn, in spite of the smaller yield, have been 7,47,000 bushels in two

bushels, against 3,16,546 bushels last year.

Exports of corn, in spite of the smaller yield, have been 7,474,690 bushels in two weeks, which far surpasses all records.

Cotton declined an eighth, sales of fertilizers indicating less reduction of acreage this year than was expected.

Exports of principal products in February were \$51,634,691 in value, with an increase over last year of about 50 per cent in breadstuff, in cotton 25 per cent and 25 per cent in the aggregate. in the aggregate.

The weekly output of pig iron was 228, 338 tons February I, but 234,439 tons Marel I, and the increase of unsold stocks in February was only 5 852 tons weekly for exports or consumption, against 218,457 tons in January and 215,249 tons in November 1885. ports or consumption, against 218,457 tons in January and 215,219 tons in November, 1895, the month of greatest consumption before this year. For four months production has gained a little, but consumption still more, and if preparations for war last, only a few weeks they will add much to the demand. Other consumption for railroad cars, for vessels on the lukes, for elevators and oil pipe lines, for agricultural implement works and for sheets is beyond precedent, and structural and rall works are crowded with orders, though now receiving few. Iron bar works are depressing prices because some are not fully employed, while the steel bar mills at Milwaukee have to put on three eight-hour turns daily to keep up with orders. Prices are very strong, except for wire nails, which dropped because the great wire combinations fell through, though a similar agreement is expected and in some western dispatches is said to have been formed. The minor metals are generally strong in demand, a sale of 4,00,000 pounds of copper being reported at 12 cents, though the usual quotation is \$11.57, and the product last year was 205,251 tons, against 219,950 tons consumed in this country. Tin is strong at 14.25 cents and spetter at \$1.25, lead weaker at \$2.374; tin plates it \$2.85 for the best, against \$4.00 for foreign.

at \$1.574; the plates at \$2.85 for the best, against \$4.00 for foreign.

Sales of wool for this week have been the smallest since the week of greatest alarm in August. 1896, but not because any mills have stopped work. Cancellations are frequently falled to have stopped work. Cance lations are frequent and jobbers have evidently falled to sell as much us they expected at the advanced prices asked, but then those would not be possible had wool cost the millers current market priker. Little wool can be moved with a new clip near and heavy stocks still in mills without further reduction. Goods are manylower in quantities, though unchanged in standard grades. Forcism goods have a large distribution and prices are generally sleady though in outside dealings print cloths are a shade lower. Prints are in better demand.

Failures for the week have been 248 in the United States, against 256 last year, and thirty-six in Canada, against sixty-one last year.

of Russia's attitude in China. The decision of the supreme court of the Nebraska maximum freight case in favor of the railroads had comparatively little effect. In fact throughout the week the influence of the far eastern question on London was reflected here and aided in unsettling specularity feeling and in increasing additional caution. Prices steadied quickly on Mon-day, but falled to regain their decines and the trading degenerated into a dull pro-fessional affair.

On Tuesday there was general, though

not very large, recovery, due principally to the prompt and unanimous passage of the \$50,000,000 defense appropriation by the house \$50,000,000 defense appropriation by the house of representatives and the more pacific attitude Spain was alleged to have assumed. Irregularity was followed in strength on Wednesday on the ready acquiescence of the senate in the house resolution, but was lost later in the day on reports that the president contemplated action which would bring on a crisis in regard to Cuba.

On Thursday the market was dull and weak, in sympathy with the unsettled forcing markets and vague Washington rumors about the intentions of the president and the possibility of an unfavorable report on the Maine disaster.

BRADSTREET'S REVIEW OF TRADE. should be run across the inlets and not fol-Continued Activity in the West and Northwest. NEW YORK, March 11.-Bradstreet's to-

morrow will say: Continued activity in hearly all lines of distributive, trade, but more particularly at the larger cities of the west, south and for northwest, continues to be the most favorable feature coming under notice. That the denand for dry goods, groceries, hardware, from and steel and its various forms and building material is relatively most active at the west seems evident from the slight tone of disappointment in reports from leading eastern markets, where business is reported moving less rapidly than at the interior.

Less favorable features are few, number-Less favorable features are few, numbering chiedly a weaker tone in prices of a few
staples hitherto marked by extreme firmness, but chiefly perceptible in quotations

and sugar.

smaller, amounting to only 3,285,055 bushels, against 5,054,000 bushels last week. ALASKA BOUNDARY IS SETTLED.

Decision is Something of a Gain for the United States. NEW YORK, March 11.-A dispatch to the Press from Ottawa says: Sir Julian Pauncefore, the British ambassador, has informed the Canadian ministry officially that he has arranged a convention with the United States whereby the Alaskan boundary dispute has

been settled. Under the terms of the convention the British government has conceded the claim of the United States that the three marine leagues should be measured from the chore of the main and, and should proceed along the shores of the inlets, which are thus recognized as arms of the ocean, and not as rivers.

The contention of the British and of the Canadian governments was that the three league limit should begin on the ocean side of the island, and the delimitating line low their shores.

These inlets are numerous and extend into the mainland a great distance, and the deci-

sion therefore is of much importance to the United States.

The United States has agreed to the British retaining the boundary on the limit of the Chilkoot pass and the White pass, because

that the surrender would be so sweeping as

other favorable features include the heavier foreign demand for wheat and flour, as indicated by increased exports over last week and last year, and bank clearlings heavily exceeding corresponding periods of previous years, though smaller than in remember of the Alaskan boundary dispute are ment of the Alaskan boundary dispute are ment of the Alaskan boundary dispute are incorrect, no treaty having been signed es yet, and the matter still being a subject of negotiation. The department will say nothing regarding the details from Ottawa as to an agreement that the boun dary line shall be computed from the shore line, following it in all its sinucsities, and that the tops of mountain peaks shall mark the limits of American territory, but it is
