

The investment demand for securities though encouraged by the low average of prices, is comparatively nominal. In the speculative market there is an absence of outside active operators. The uncertainty about the final outcome of our relations

with Spain holds general buying in absolute suspense and favorable factors appear to have little effect. On their intrinsic merits rallroad stocks are certainly cheap at current prices; but even investors defer buying them, in view of the possibility of serious Cuban developments. The supreme cour decision in the Nebraska suit-one of the

decision in the Nebraska sult-one of the most important judgments that has yet been given on the important questorn of the power of the states to fix rates of freight and which, under ordinary circumstances, would have produced a considerable rise in prices-passed almost unnoticed and pro-duced no visible effect upon valus, which is an expressive illustration of the absolute stagnancy of the market. Meanwhile, a series of factors are adding to the intrinsic value of stocks, which, when the market is relieved from its present political trammels, will be likely to find expression in very much higher prices. Those, therefore, who are independent of margins and are satis-fied that we shall see the Cuban question settled without war should be able to expect an ultimate profit on purchases at even the present scale of prices. At last the large floating foreign balance

street:

At last the large floating foreign balance due to this country has proved too ponder-ous to yield to the various arrangements for postponing its settlement and gold is therefore flowing in from Europs in large provide the settlement and gold is therefore flowing in from Europs in large provide to the low rates of exchange indicate no the low rates of exchange of produce bills, but the by large supplies of produce bills, but the by large supplies pears to lie in the fact that in the cases match. If it were to be measured by the mount due to us the imports of gold manchal convenience. How far the ray en-mate for the post of the moderate provide the settlement of the mover mate, if it were to be measured by the supplies now on hand and the existing the work on a hand and the existing the work on a future state of the sold in anchait of the moderate probability would be many the sold of the supplies now on hand and the existing the work on a future state of the sold in anchait of the moderate probability would be many to the moderate probability would be many to the moderate properiod to a further existing the sold of the same time, it is to be considered that we have new reached a picthon, a the same time, it is to be considered that we have new reached a picthon supplies to be immediate, no could they be expected to the sold that could thom may be expected to have a certain influence in that direction the face of the possibilities of a foreign way. CONDITION OF NEW YORK BANKS.

They Are Stronger Now Than They

Were a Week Ago. NEW YORK, March 12.-The Financier says: So far as relative strength is concerned the New York clearing house banks are in a stronger position now than at the close of business one week ago. The policy of retrenchment seems to have been rather generally followed by the larger institutions and the loss of \$10,232,400 in loans, as shown by the statement of March 12, corresponds closely with the reduction of \$10,535,00 in deposits. Early in the week the liquidation in loans was a marked feature, as a num-ber of the banks were below their reserve requirements and desired naturally to in-crease their cash holdings. The unsettled stock exchange conditions have also con-tributed toward the falling off shown in the averages. The banks appear to have lost \$14,465,400 in legal tenders, but the re-clipts of the first gold imports swelled the specie item \$2,338,700, so that the actual loss in cash for the week was only \$786,700. The reserve requirements, owing to the de-crease in deposits, were reduced \$2,634,625, and taking from this the actual loss in cash, the result shows that the banks have added \$1,857,925 to the excess reserve re-ported one week ago. There is now en-gaged or en route to America over \$12,000,000 in gold and as this will find its way into New York banks, excepting, of course, the \$500,000 odd for Chicago, the outlook must be regarded as reassuring. It will be seen that this center can stand a heavy drain withcut weakening the position of the local banks, although why there should be a continued movement of funds to the in-terior, with bank reserves at nearly every principal center heavier than usual, is a matter that cannot be explained easily. The local money rates during the week have reflected an easier feeling, falling off some-what at the closs. Many of the larger banks steem to be out of the market on commercial paper, but out of town institu-tions, which are not affected by the with-drawal of money, have been doing consid-erable business at this point. If is, of course, impossible, in view of foreign com-plications, to predict how money will turn within two weeks, but it will require a very severe crisis indeed to bring the mar-ket to an acute stage. A continuance of bod imports of retrenchment seems to have been rather generally followed by the larger institutions ket to an acute stage. A continuance of gold imports would operate against its ex-istence for more than a brief period of time.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing

Prices on Saturday. CHICAGO, March 12.—The break in Wall street made another bad "quarter of an hour" in wheat today, causing July to break about 2c. There was another struggle in May between the Leiter and Armour interests, but Leiter managed to maintain the former price. Leiter applied to the directors

May between the Leiter and Armour inter-ests, but Leiter managed to maintain the former price. Leiter applied to the directors for a marginal price on May wheat, which tended to relieve the tension toward the close. The day's decline in July was B.c. Everything else on the floor showed weak-ness, especially provisions, declines of 74.96 So being recorded in that market. Corn closed a shade lower and oats lost 46.96. When started as if a ruly after the weak-ness of yesterday were to take place. Hold-ers were encouraged by the steadiness shown by foreign markets, especially Liver-pool, in the face of yesterday's tumble in prices here. It was also known that Leiter had placed additional shipping orders of nearly 150,000 bu. Offerings at first were a good scattered demand was apparent. Bids were made for July at the opening at \$35.96 \$35.6. This was ½c over yesterday's closing price and the buying demand was enough to add another small fraction to the price in a very short time. The market heid fairly steady for sometime at around that price, but finally the weakness in Wall gireet, giv-ing rise to apprehensions of liquidation in everything else, brought longs into the mar-ket to unload. It also resulted in an almost total cutting off of support and professional shorts, taking advantage of that fact, ham-mered the price down rapidly. For about fifteen minutes the market was eccep-tionally weak, July selling down without a stop to \$56.c. a break of 28.5c from the high-est point. The decline brought a good many stop bas orders and considerable sell-ing was also done through fear of another attack on May by the big bears. In this holders were agreeably disappointed. Plent'y of May was offered, but there was nothing like the concerted attempt to break the market which took place yesterday, and Leiter's brokers had comparatively little dif-ficulty in keeping the price at \$1.04. An-other influential factor was the New York ank statement. The market, after getting outher so break for July, gradually grew quit

relieve the tension. This action had a favor-able effect on the market and resulted in a further advance in July, that delivery finally getting up to \$7%c, where it closed. May closed at \$1.04. After the session closed it became known that Leiter had sold 2.000,000 bu, of contract to Counselman & Day. The price was not stated, Leiter merely saying it was disposed of at "mar-ket price." Corn was weak with wheat. There was more or less liquidation of long lines all day and with the exception of a little strength at the start prices were lower. The

strength at the start prices were lower. The ate rally in the start prices were lower. The late rally in the major market had a favor-able effect, prices recovering to a point only a shade under yesterday's final figure. May ranged from 304/030%c to 30c and closed at 30%030%c. The market for oats reflected the action of wheat and corn though outles a sound

The market for oats reflected the action of wheat and corn, though quite a good business was done. Liquidation was heavy during the weakness in those markets and a sharp decline resulted. There was good buying on the break, but cnly part of the loss was recovered. May ranged from 26% to 26c and closed %@%c lower at 26% 26%c. Provisions were weak from the outset. The decline in stocks and grains was re-sponsible for very general selling, many stop loss orders being received. The de-mand was only moderate and prices broke easily, the market ruling heavy to the close. May pork closed 25c lower at \$9.55, May lard 7%c lower at \$5.12% and May ribs about 10c lower at \$5.02%65.6 Estimated receipis Monday: Wheat, 135 cars; corn, 300 cars; oats, 313 cars; hogs, 30,000 head. London Money Market. LONDON, March 13.—The money market in the bank rate is mooted. The American demand for gold has exceeded all expecta-tion, and in addition to all the bar gold about 1400,000 in Japanese yen has been bought for New York. This with the with-drawal of eagles, has induced the Bank of England to raise the price of Japanese, French and German gold coins to 16 shil-tings 5 pence per ounce. The stock ex-change is unsettled. Settlement was only for over with considerable assistance of the "iame ducks." which, coupled with the political uncertainty, keeps the market very nervous. The sharp advance in Madrid ex-change is index helps. The situation in Brazit is also making holders very uncom-gortable. Foreigners, generally, are de-
