CURRENCY NEWS IS READY

Report of Banking and Currency Committee is Complete. COMMITTEE HAS A MEASURE OF ITS OWN Lays the Burden of Redeeming United States Demand Notes on the Banks-Requires No Bond Issue.

WASHINGTON, March 23.—The report of the committee on banking and currency was laid today before the full republican membership of the committee. This subcommittee, which was appointed a month ago to report a general banking and currency measure, consists of McClary of Minnesota, chairman, Mr. Prince of Illinois and Mr. Mitchell of New York. The bill they have reported is entitled "A bill to provide for strengthening the public credit, for the relief of the United States treasury and for the amendment of the laws relating to national banking associations and the redemption of the greenbacks is not by direct retirement, but by the substitution of a legal tender note, which the banks are required to assume and for the redemption of which they are to require the gold so long as they are conducting a solvent business. The principal provisions of the bill are as follows: 1. A division of issue and redemption is established in the treasury for which the secretary of the treasury is authorized to set aside such amount of the national debt as may be required to meet the demand of \$200,000,000. This excess on March 1, 1908, is \$178,352,322. United States notes received by this division for redemption are to be cancelled and retired in proportion as substitute currency is issued. No note received by this division is to be redeemed or redeemed except on exceptional conditions. 2. National banks are required to assume the redemption of legal tender notes and demand notes in order to obtain circulation on their commercial assets. A new class of notes, called "substitute currency," is to be issued in lieu of legal tender notes and these reserve notes are to be redeemed upon demand by the banks out of the reserve fund, as the banks are not treated as their ultimate redemption. 3. The basis of national bank circulation will be the commercial assets of the banks, but this will be reached only after a 6 per cent reserve of national debt is issued to them in return for deposits of United States notes. 4. National banks are to be permitted to issue currency notes upon their commercial assets, but the amount of the issue is to be limited to 60 per cent of the capital of any national bank and 6 per cent of the reserve fund of the bank. The national bank currency notes based upon commercial assets are to be secured by a bank's good-will fund made up of the contribution in gold of 6 per cent of the entire circulation of national debt. This fund is made for replenishing the reserve fund within certain limits. 5. The entire circulation of national debt will be legal tender until liquidated into the treasury from failed and liquidating banks, which in the event of their failure will be issued on the authority of the government and they will be redeemed and cancelled. 6. The gold and silver dollars are to be redeemable in gold, but silver certificates are redeemable only in standard silver dollars. 7. Silver certificates are hereafter to be issued only in denominations of \$1 and \$5. Legal tender notes, reserve notes and demand notes are not to be issued in denominations below \$5. 8. National banks are required to pay a tax on the amount of 1 per cent of the total on their capital, surplus and undivided profits. 9. National banks are permitted to establish branches under regulations to be prescribed by the secretary of the treasury. 10. THE COMMITTEE SAYS IN explanation of the provision regarding the assumption of legal tender notes by the banks that they have endeavored to adopt a system which would be subject to none of the criticism made against the issue of interest-bearing bonds or the taxation of the people for the payment of this demand debt. The proposed bill imposed upon the banks the whole burden of carrying and sustaining the debt. There is no profit or return to the banks thus carrying the national debt and they are required by the bill to assume the entire obligation as compensation for the national debt. The committee says in explanation of the provision regarding the assumption of legal tender notes by the banks that they have endeavored to adopt a system which would be subject to none of the criticism made against the issue of interest-bearing bonds or the taxation of the people for the payment of this demand debt. The proposed bill imposed upon the banks the whole burden of carrying and sustaining the debt. There is no profit or return to the banks thus carrying the national debt and they are required by the bill to assume the entire obligation as compensation for the national debt.
