Waz Probabilities Overshadow All the Markets.

OTHER INFLUENCES ARE LOST SIGHT OF

Everything Closes Stronger as Higher, with the Exception of Oats, Which Are a Shade Lower.

CHICAGO, March 28.-The question of peace or war overshadowed all else on change today. Assumptions of a peaceful solution of the Cuban question resulted in sharp recoveries from early declines, and with the exception of oats everything closed strong and higher. Wheat advanced Mo for July and 11/2 for May. Corn closed May's higher, oats a shade lower, and pro-

Wisions 24:6124c higher.
Wheat started with an appearance of firmness that gave way almost immediately to one of weakness. There was a mild disposition shown at first to cover short lines on account of the low temperatures prevailing in the northwest. Heavy rains were reported over the winter wheat country, and fears of further damage by the cold, coupled with unexpected strength at Liverpool, where some futures were %d higher, started the market, as far as July and the more distant futures were concerned, at prices a shade better than Saturday's closing. Smaller receipts in the morthwest also offered encouragement to the bulls. But the market turned weak at once. What little demand there was from shorts had been soon satisfied, and as no other support of consequence materialized, the decline for a few minutes was rapid, July selling of from \$33,633,24 its opening price, to \$25,c. Some liquidation was caused by the large world's wheat shipments, which amounted to \$7,73,000 bu. Another source of weakness was the large addition to the contract stocks. Besides the 27 cars received from regular sources, 140 cars and \$6,400 bu, of No. 1 northern were received from regular sources, 140 cars and \$6,400 bu, of No. 1 northern were received from private houses, a total of about 203,000 bu, in all. Chicago receipts were 721 cars. Northwest receipts were 125 cars, against 473 cars last week and \$44 a year ago. After the decline to \$25,c in July, there was a raily to \$25,c and hed around that figure until about 41 o'clock. Then the market began to improve. A decrease in the visible supply—1,565,600 bu.—was much greater than was looked for. But everything else was lost sight of in the consideration of the news relating to the crisis between the United States and Spain. Reports that Spain had accepted suggestions of this government in resard to Cuba, and the tone of the president's message to congress, started a buying demand that increased in volume as the session wore on, and did not cease until the closing bell sounded. Shorts of every description were driven to cover, and investment buying, which has been almost totally lacking for some time, was in evidence. Half an hour from the close July had advanced to \$45,c. but rebounded again very shortly. The close was strong at 8te bid. were reported over the winter wheat country, and fears of further damage by the cold, coupled with unexpected strength at

and did not cease until the closing bell sounded. Shorts of every description were driven to cover, and investment buying, which has been almost totally lacking for some time, was in evidence. Half an hour from the close July had advanced to 84%c. Realizing was quite heavy at this point and the price reacted to 83%c. but rebounded again very shortly. The close was strong at 84c bid. May was traded in very little. It opened by by bar advanced at once to \$1.04, and during the activity on July soid up as high as \$1.05% and closed at \$1.05%.

Corn was fairly active and firm, with the exception of a short time after the opening with wheat. The rally, in wheat and the unfavorable character of the weather turned the market very strong, shorts leading the buying. May ranged from 25%c to 28%d/28%c, and closed %60%c higher at 25%c.

Oats was heavily raided during the market reacted when the turn came in wheat and corn, but the recovery was only to previous prices. Shipping demand was slow. May ranged from 25%c to 25%c, and closed a shade lower at 25%c/25%c.

Provisions, like everything else, were weak during the first part of the session. Heavy hog receipts and talk of yellow fever possibilities in the south resulted in mild iquidation and a decline in prices, but the market very easily recovered on the more favorable Washington news and the rallies in grain. At the close May pork fever possibilities in the south resulted in mild iquidation and a decline in prices, but the market very easily recovered on the more favorable Washington news and the rallies in grain. Report on the Maine Produces a Re-

NEW YORK, March 28.—The familiar spectacle was presented in the Stock exchange today of a violent reaction on the culmination of an event which has been long anticipated and discounted. The facts were that the findings of was Maine board of inquiry were presented to congress and were proved to be exactly as predicted. This is to say, the Maine is found to have been blown up by a submarine mine. Ever since the morning after the explosion of the third of the constant dread that this report would be formulated by constituted officials of the United States. The speculative public assumed that such an allegation would necessitate a rupture between the United States and Spain and the consequent damage to all values of securities which it was attempted to measure by a constant decline in prices since the date of the explosion almost to the present time. Yet the actual publication today of the report resulted in a rebound in prices, which are the high point of a rebound in prices, which are the high point of a rebound in prices, which are the support of the explosion in. Havana harbor. This was brought about by the movement of the bear traders to take their profits. Having been industriously selling stocks for weeks in anticipation of the harm to values to be done by the Maine report, they were warned by the minimence of the actual publication that the lowest prices to be looked for on that account had been reached, and they therefore set about to bus stocks to fill their contracts.

Settlement of the actual publication that the lowest prices to be looked for on that account had been reached, and they therefore set about to bus stocks to fill their contracts in the market at the low level, when the short interference of the actual publication that the objects of the stocks of the department of the bear of the fact of the settlement of the contract of the contrac bound in Prices.

COTTON MARKET.

Dealers Walt the Outcome of the President's Message. NEW YORK, March 28.—Developments in to-day's cotton market were of a sensational nature and trading was very active for these times. At the start both bulls and bears manifested little desire to operate, preferring to wait the outcome of the president's message to congress. At first prices ruled fairly steady, under a few scattered orders and the failure of the Liverpool market to respond to our steadiness of Saturday. Prices improved point by point, however, during the forenoon, on rumors that the political situation was believed in Washington to be less threatening. At noon a gain of 2/33 points was noticed, with the market duil and featureless. Shortly after this hour the pit was filled with excited traders on the report from Washington that Spain had practically agreed to accept the proposition of the administration that there should be an armistice between the Cubans and Spain until October; that meantime the United States should feed the reconcentrados and the Maine report should be field in the committee indefinitely. This sudden change of front in the Spanish-American trouble gave shorts a bad scare, and in the scramble which followed prices advanced 124/15 points from the lowest before a breathing spell was taken. During the belance of the atternoon the market was very active, with trading spanmodic. Senastional rumors were in circulation, among which was a report that the senate would never consent to supporting the president's views, and this caused lively selling, under which prices gave way sharply. At the close the market was steady, a net gain of from 6 to 10 points, with future sales reaching 197,900 bales. The market as a whole did not show material change from list week as regards values and sellers were generally well pleased. All kinds of cattle seemed to find buyers without much difficulty, and practically everything in the yards was sold and weighed up at an early hour.

Beef Steers—As noted above about one-ball of the cattle on sale were confed. Beef Steers—As noted above about one-half of the cattle on sale were cornfed steers. The most of them were common to medium quality, some of them heavy branded westerns with less than a half-dozen really good loads. None could be described as choice or fancy. The early advices from other selling points indicated at best only steady markets, and some gave a hint of weakness. The market here, however, was fully steady. The buyers seemed to want the cattle and they were early in the saddle and soon had the pens cleared. leared. Butchers' Stock—The market on cow

the ten or a dozen loads in were soon sold and weighed up. The prices paid were entirely satisfactory to sellers and it may be inferred from that fact that they were be inferred from that fact that they high.

Stock Cattle—Today's supply of stockers and feeders consisted of some fourteen loads of Minnesota cattle and a few scattering loads of natives and some odds and ends. There was quite a brisk inquiry and the offerings soon found takers at fully steady prices. Representative sales;

Bu, light receipts on a Monday are to be expected, and in consequence do not exert much influence upon the market. What was more to the point was the expectation that Tuesday's receipts also would be light, as a result of Sunday's storm in the country. Under ordinary circumstances the position of the market would have been strong with light receipts in sight and light receipts to come. The market, however, appears to be entirely under the influence of eastern markets, which seem to be tending steadily downward. Provisions were lower Saturday, and this morning Chicago had 8,000 to 10,000 more hogs than anticipated, and prices broke there about 10c. This market followed in the lead of Chicago, in spite of local receipts being light.

CRICAGO, March 28.—Business in cattle was active and a stronger market was witnessed from opening to the close. Even the numerous droves of half fat cattle moved off at steady prices and owners of fat cattle found quick sales at unsatisfactory prices. Beef steers sold on a basis of 43.5694.20 for the commonest to 53.50 for prime to extra cattle, the greater part selling at 44.1095.10, there being the usual scarcity of strictly choice lots. Stockers and feeders ranged from \$2.5695.00 for common to best. Calves were in good demand at a wide range of prices, best grades bringing \$6.5596.90, commoner grades going for \$4.0096.00.

Heavy receipts of hogs forced prices lower and sales were at a further decline. Common to prime droves of hogs sold at \$3.0095.85, the greater part selling at \$3.5095.85,. The range in prices is narrower than at any time for a month past and light and heavy hogs now sell close together. Today's drop was about 10c in heavy and 5c in light.

Trade in sheep and lambs was lively at strong prices. Choice lambs were scarce and sold up to \$5.85, an advance of 25c, and sellers had some Colorados for \$6. The commonest lumbs sold at \$4.40. Sheep sold at \$3.5094.75 and yearlings at \$4.5096.10. Sheep, went largely at \$4.5594.60 and lambs sold largely at high prices.

New York Dry Goods Market. New York Dry Goods Market.

NEW YORK, March 28.—The week in dry
goods opened under unsatisfactory conditions.

Throughout the day there was little store trading and the mail orders received were very few.

The price situation in colton goods is no brighter
than recently. The low prices of print clots
and their duliness has had an exceedingly depressing effect on all lines of staple goods. Staple brown cottons are quiet; print cloths are unchanged.
