RECOGNIZING THE NATIONAL GUARD. Several days ago Adjutant General Barry wrote to Congressman Stark calling his at-tention to the neglect in the new military bili to provide for the National Guard and the volunteer forces, while it empowered the president to reorganize and increase the standing army. In his letter General Barry recommended that the entire bill be killed. Today he received a telegram from Mr. Stark in which he said that the overwhelming sentment was that the National Guard and the volunteer forces were the mainstay of the government and that all of the Hull bill had been killed except that part authorizing the organization of the regular army into three battalions instead of two. The message extended congratulations to General Barry and

War has broken out among the bakers of Lincoln, and as a consequence they are ac-cusing each other of selling short weight loaves. Four arrests have been made for this offense. The five and costs in each case have amounted to \$8. Over a year ago the bakers put down the price of bread, and then when the price of flour went up, to save themselves from financial loss, they reduced the size of the loaves. The present war among them will doubtless bring the weight of loaves up to the required standard and at the same time raise the price.

In the meintime Malone has been elected to the city council and it is the general opinion that under the present city charter he is thus disqualified from holding an appointive posi-tion during the present year.
