

DONE BY THE PHONOGRAPH

Part Taken by Talking Machines in the Affairs of the Country.

HISTORY WILL LITERALLY REPEAT ITSELF

Employed in Teaching, Advertising, Collecting Evidence, as Time Keepers on Race Tracks and in Cupid's Domain.

More than 45,000 talking machines are in use in the United States alone, and the demand for them is so great that the factories are working night and day.

MRS. BALLINGTON BOOTH MAKING AN ADDRESS FOR DISTRIBUTION.

account of a few of the machine's later adaptations. Telephone companies in many cities, it appears, now use an ordinary phonograph to notify customers when numbers called for are busy.

A few weeks ago a talking machine saved considerable expense at a trial in Terra Haute, Ind., where a stenographer who had taken the minutes of the suit refused to transcribe them, as she was to be married and had no time.

THEIR ADVERTISING USES. A great many phonographs are used for novel advertising purposes. Some stores have life-sized ornamental figures holding a trumpet to the lips.

The use of the phonograph in postoffice has been practical to a certain extent, though it is not developing very rapidly.

SETTING TYPE FROM PHONOGRAPHIC DICTATION. sions of them to a phonograph, and sent cylinders across the ocean by steamer every Saturday and Sunday.

DEVELOPING AN IDEA

He was while he was making the model of a letter-pasting machine that he was urged to help out a poor devil whose distressed mind was bent on inventing a writing machine.

There were several heartbreaking failures when the idea was first tried. He was only the beginning of trouble. A machine that would write was well known, even after two centuries of fruitless efforts.

Years before, one bitter night in midwinter, when some legislators had gathered close about the red-hot stove in a lawyer's office.

A WONDERFUL MEDICINE. BEECHAM'S PILLS, taken as directed, will quickly restore females to complete health.

more, who threatened a fight in the Patent office and in the courts. His letters were sent to the inventor, who, in a moment of rage, wrote the inventor a long letter.

At last the inventor retired permanently to his bed. Not that he was wholly unable to move about, but he had a theory. Every person, he said, was endowed with a certain amount of vital energy.

When he had anything to gain he could not be repelled. He seemed to be impervious to the shafts of ridicule and insults that were hurled at him.

When he had anything to gain he could not be repelled. He seemed to be impervious to the shafts of ridicule and insults that were hurled at him.
