After a medical report is made by the physicians, the state board inquires into the case and allows the patient to be paroled tive, for the period of ninety days, the state during this time being relieved of all ex-penses. At the end of the ninety days the patient may be returned to the hospital if the derangement is such as to make him un-manageable or unarford at the manageable or unarford at the delay of the public section and another ten years will particular. manageable or unsafe to be left unrestrained. If no application is made for a return to

the institution, however, a final discharge is given. When patients are brought back at the end of the parole term the expense must be paid by the outside parties up to the time that the patient is received back the time that the patient is received back into the institution. The release of pa-tients on parole before final discharges are made often has a good effect in bringing about a complete cure. . But there are instances where the parole

system is abused. One has just come to the attention of the management of the asylum, which required prospt action. The case is that of a Swede girl who lived in a county in the central part of the state. She a county in the central part of the state. She became mentally deranged, but only in a mild form. After being confined in the asylum a few months she was paroled to her brother-in-law, a farmer living in the same neighborhood from which she was sent. The man gave good references to the board, and seemed anxious for the future weifare of the girl. Nothing further was heard from the case until a few days are when comof the girl. Nothing further was heard from the case until a few days ago when com-plaint was made to Superintendent Abbott that the girl was not receiving good treat-ment. People in the neighborhood said she was abused, forced to work in the fields like a man, and was not allowed to leave the place on any excession of the leave the place on any excuse. Dr. Abbott in-quired into the matter, found out that the reports of ill-treatment were true, and today telegraphed the authorities of the county to immediately take the girl away from the custody of the brother-in-law and provide for her until further arrangements could

be made. The letters received by Dr. Ab-bott in response to his inquiry showed that the brother-in-law had secured the parole of the girl in order that he might have her take the place of a hired hand on the Daughters of the American Revolution are

Auburn Man Hangs Himself.

AUBURN, Neb., April 16 .- (Special Telegram.)-Samuel Smith, an old resident of this city, committed suicide by hanging Friday about 10 o'clock a. m. Despondency from day about 10 o'clock a. m. Despondency from continued ill health is supposed to be the cause. This morning he went to the stable, telling his wife that he was going to hitch up the team, but instead of doing so took one of the horses out of the stail and hitched it to the fence outside. He then climbed upon the manger, tied a small rope around his neck, fastened it overhead and swung himself off. Soon sfort this Mrs. swung himself off. Soon after this Mrs Smith, seeing the horse hitched to the fence went to the stable to see what was the mat-ter and on opening the door found her hus-band in the position indicated and fell in a swoon. Some of the neighbors seeing Mrs. Smith fall ran to her assistance and then discovered Mr. Smith and promptly cut him down, but life was extinct. He was about 45 years of age and leaves only a wife.

Farmers Will Raise Broom Corn. WYMORE, Neb., April 16 .- (Special.)-The cultivation of broom corn by a number o the farmers of this vicinity will be one of the new features in the agricultural line during the coming season. This staple product requires a great deal of care and at-tention in the ralaing, but more than com-pensates the grower for his trouble, as it brings from \$40 to \$50 per ton. There has been but a very small acreage grown in Gage county, owing to there being no near market, but the recent establishment of good broom factories at Brairice and Lin-coln will create a brisk demand and the farmers of this county propose to furnish farmers of this county propose to furnish their quots. It is predicted that those who try the raising of broom corn will meet with profitable results.

The city council here at its last regular meeting passed an ordinance giving the sal-aries of city officials a sweeping reduction. It is said that some of the incoming officers It is said that some of the incoming officers will note qualify, as they do not care to as-rume the responsibility and labor their offices will require for the mere pittance now offered in the salaries. It is questioned whether or not the old officers can legally change the salaries of the newly elected men-on the eve of the election of the latter.

Exhibition of School Work. EDGAR, Neb., April 16.-(Speckil.)-An exhibition of the work of the pupils of the Edgar public schools was given yesterday afternoon in the High school room. The exhibition began at 1 o'clock p. m. and continued till 6 o'clock, and consisted o' specimers of writing and composition, ex-trading through all the grades, with col-lections of specimens, showing methods of study is all branches, including map draw-ing, both in colors and relief. The speci-mens in minerology and botony were espe-cially fine and abundant and attracted much attention. The young women of the High school served lunch to all visitors. UNIVERSITY BOYS NOT STRONG ENCUGH

Diangreeable Circumstances Surround the Contest, Making Good Work on Either Side Impossible...Hard Hitting and Loose Fielding.

LINCOLN, April 16 .- (Special.)-The ball game this afternoon between the Omaha and University of Nebraska teams was played under adverse circumstances, a hard south wind making it difficult for the pitchers to do good work, while a great deal of the terrific batting was due to the help of the

wind. The work in the same should not be taken as a sample of what either team can do, as there is no doubt that favorable weather would have permitted good playing on both sides. As it was, the game was

slow and at times positively dreary. The work of the new Omaha team was watched with much interest, and the opinion of the spectators was a favorable one The field work was good whenever the wind and dust permitted, and the throwing was good at all times. The men showed up well

at the bat, Griffin probably being the favor-ite with the crowd on account of his ability to hit every ball that came within reach. Roat also did extra good work with the stick. Turner pitched the first half of the stick. Turner piched the first half of the game, and while he sometimes had difficulty in getting the ball over the plate at crit-ical times, still he held the university boyn down fai:ly well. Hagerman went in the box for the last four innings, and his swift delivery made it very difficult for the uni-versities to connect with the ball. The opin-tion of the arread fundie around the the

ion of the crowd freely expressed is that Hagerman is a "crackerjack." The university team did some good batting, but the team work was not always good, and a number of costly errors were made. Gordon

was in the box, and while he had good con-trol of the ball, the Omahas had little dif-ficulty in hitting. A little more organized work and plenty of practice for the university

team, and it would have made a bette showing

showing. The game opened with Omaha at the bat. Griffin accepted the first ball that was thrown and made a three-bagger, and immediately afterward scored on McKinney's base hit. Camp flew out to Reeder and McKinney got caught in the double play at second. Mc-Wibher attack out Kibben struck out. In the first inning the university team

started with good luck on account of the three-bagger by Wells and the grounder which netted Bliss a home run, although McKinney could have stopped the ball if a cloud of dust had not prevented. After the first two or three innings the crowd lost in-terest in the game, on account of the dust storm. The attendance was about 500.

OMAHA TEAM LOSES HEMMING. President Schuman Talks of the Plans

for the Season. President W. R. Schuman of the Omaha Base Ball club came in from Chicago yes-

terday and will remain long enough to attend to some business details that require his attention. He says that Barnett will certainly be here Monday. He sent McAuley his transportation several days ago and he

will be here early in the week. President Schumen says that the information that was given out the other day to the effect that Hemming has signed an Omaha contract was due to a misunderstanding and it now looks as though Hemming would not play in Omaha. We are pretty well fixed for pitch-

The Redick and Seth Drake of this city. The race was for the price of the birds and the championship of the United States and sev-eral other states, and by the terms of the match Carmichael was to kill as many birds with his two barrels as his competitors could with their double battery. The result was a damling victory for Carmichael, who killed forty-seven birds out of fity, while Redick and Drake were only able to grass forty-four out of their 100. That this was a backaet for the bookmakers goes without saying. Mr. Redick is one of the best shots that ever happened, and it is understood that the only reason he didn't shoot better on this occasion was that he was afraid that if he showed this real form the governor would want to send him to he was afraid that if he showed his real form the governor would want to send him to Cuba at the head of a regiment of sharp-shooters. Omaha. We are pretty well fixed for pitch-ers without him, however, and the manage-ment is now negotilating with two or three strong players who will very likely be an-nounced within a few days. President Schuman expressed much regret that he had been unable to get the entire team on the ground earlier in the season. The failure to do so was due to the numer-ous difficulties encountered, and which could not be disposed of sooner. First, the loss of Tucker left the management in the lurch, and then a lot of time was wasted in the futlle attempt to get George Decker. Finally this plan also had to be given up, and by that time it was well toward the opening of the season. He expressed the opinion, how-ever, that Fisher will make a very satisfac-tory captain, and that the Omaha people will be pleased with the work of the team. "We want to play winning ball right along." added President Schuman, "and if the team is not strong enough, we will make it stronger. We have two or three good men on the string now, and although we think we have a team that will keep its end up, we don't propose to stop there, but will strengthen it as often as we have the op-portunity."

that could be wished for as far as weather was concerned and 6,518 persons passed the turnstiles to witness the contest between the Orioles and Senators. McJames pitched masterful ball for Baltimore and had he been given proper support would have shut out the visitors. Their eight hits were scattered through six innings and in the first Manager Hanlon's acquisition to his pitching corps struck out three batsmen. Weyning was easy in the first two innings and off nine hits for a total of ten bases the home team garnered six runs. After this disastrous opening 'ae settled down and he and the team behind him played winning ball in the first inning after having been presented with a diamond ring by his for-mer associates and retired in favor of Far-rell. There was an entire absence of wanging and 'kicking' throughout the game. Score: BALTINORE WASHINGTON.
