FROM THE FARTHER

GOLD, SILVER AND COPPER Mar mine, which is proving a large producer of the yellow metal.

Alaska showed a gain of \$644,300, almost

Statistics of Production for the Year 1897 and Other Years.

COMPLETE FIGURES ON THE OUTPUT

Production-States and Territories Compared-Silver and Copper from the Great Mines.

The preparation of statistics for the fourth volume of Mineral Industry has been prac- \$470,000. In Washington a small gain is tically completed, and the Engineering and noted. Mining Journal has compiled summaries mineral production in the United States last the early part of 1897 resulted in little or Oregon, bringing with him William Symes, figures show that Colorado is the great gold states amounted in all to \$249,737 in 1897, producing state, and while the totals differ or \$14,573 less than in 1896. There was very operated upon a farmer named Cornwall, was mapped out. It is proposed, however, the various states is not changed. The gold Carolina and the small mines of Lumpkin country and finally located on a sheep ranch output in the United States in 1897, says the and Cherokee counties in Georgia. Alabama near Burns, Oregon, where he was arrested an amount which exceeded by \$6,324,586, or it are conflicting and much more exploration knowledge of further depredations. 12 per cent, the high total of 1896, and by than has yet been made is needed to show \$12,380,595, or 24.6 per cent, that of 1895, its real value This increase keeps the United States at the head of the gold producers of the world, its total for 1897 exceeding the \$56,618,679 reported for the mines of the Transvaul by \$2,592,116; while it was more by \$5,781,636 than the total production of the seven Australian colonies. No other country except Russia approaches these three leading producers in the amount of gold furnished. Our total was somewhat over one-fourth of the entire gold production of the world.

To look back a little we find that the output is now but little below the maximum points reached after the first discovery of gold in California, when a phenomenal output was obtained from the newly opened placers. The statistics of production were not then collected with the care now exercised; but the estimated totals were \$60 .-000,000 in 1852, and \$65,000,000 in 1853 and \$60,000,000 in 1854. In cured in some localities in Montana, in no other year did the mines of the country reach the amount of \$60,000,000, which was lit cannot be said, however, that dredging lit cannot be said, however, that dredging eral years the California placers, assisted by the later discoveries throughout the Rocky mountain region, kept the output not

Results of Industry.

The large total for 1897 was not the result of any such discoveries as those of the ear- with copper and lead ores, are gaining raplier days. The year, indeed, was not marked idly. by any new discoveries. As for several years | The gold reported from the United States, past, the gain has been due to the indus- however, does not represent the total trious exploitation of old mines, the exten- quantity turned out by our smelters and sion of workings, the closer saving of val- refiners. There was a further quantity of ues, and, above all, the improvements in 584,993 fine ounces or \$12,091,599 reported metallurgy which have made possible which came from foreign ores and base bulthe operation of many mines which were lion treated in this country. This brings formerly unprofitable, and the extraction of the total amount of gold refined and put gold from ores formerly held to be too low into merchantable form in the United States in 1897 up to 3,440,559 ounces or \$71,302,394. The following table shows the gold pro- The gold from foreign ores was therefore duction of the United States for three years, about one-sixth of the last total given-

Idaho
Idaho
New Mexico
Nevada
Utah
Oregon We have not forgotten the Klondike discoveries which caused so great a sensation in the closing months of 1897, but it must be remembered that the Klondike production, which in 1897 amounted to \$2,500,000, is credited to Canada. Gold exists also in the gravel deposits of the Yukon on the United States side of the boundary line, and discoveries have been made at various points, and the thorough prospecting of the country will be one result of the Canadian finds. So far, however, there has been but little actual addition to the Alaskan production of gold-in fact, in 1897, the Klondike

boom caused the miners on the lower Yukon

to leave their diggings and actually made

a reduction from what would otherwise have been the American output. Colorado was far in the lead of all the cial price of the metal having been 60.45 states in 1897 as a gold producer. The increase reported from Cripple Creek, the steady gain in the mines of the Ibex company at Leadville, the activity in the old mines of Gilpin county and elsewhere, all contributed to swell the gold output, which table the figures given to us by the United was the largest ever reported for the state, and was very nearly one-third of the total for the country. The gain over 1896 was \$4.511.766, or nearly 30 per cent. The in-

California not only dropped from the leading place, but showed a small decrease, \$235,900, as compared with 1896. The old | deed, was only 8,542,708 ounces, or 13.1 per mines of the Mother Lode and of the other | cent. less than the maximum which was districts continued to be worked steadily and to yield well, but the Randsburg and off only about one-eighth under so heavy other districts in Southern California hardly came up to the first promise and added the last five years is a remarkable fact and comparatively a small amount to the total. is only explained by the large proportion of The lack of water caused a restriction in the metal which is won more or less as a the output from hydraulic mining in 1897.

Merlin second. Michael M. third. Time: 1:45.

Sixth race, mile and one-eighth: Warrenton won. Our Johnnie second. Minassasthird. Time: 1:50%.

LOUISVILLE. May 19.—The Kentucky Oaks, at a mile and a sixteenth, was the principal event on today's card at Churchill Downs, and was won by J. C. Cahn's Linden-Crochet filly Cricket, with the comfortable odds of 5 to 1 against her. The best calculations of the talent were rudely upset, the 4 to 5 favorite Lennen being unable to stand the fierce drive in the last sixteenth, after leading by open daylight the entire journey. Three favorites won, but as the Oaks was the biggest betting race of the day the bookies quit with the balance on their side of the ledger. The attendance was 6,000. Weather clear and track fast. The meeting will come to an end tomorrow, with a good card. Following are the results:

the results:
First race, six furlongs: Onaque won,
Mill Stream second, High Binks third.
Time: 1:15%.

was probably felt more in Utah than in any other state, and in combination with the eight-hour law and other local causes, it has had the effect of closing down two of the large silver mines—the Ontario and the Daly at Park City—though both of them were large producers in 1897. The silver return of Utah in 1898 is likely to show a considerable decrease.

Idaho reports a total of 6,000,000 fine ounces in 1897. The larger part of this was from the silver-lead mines of the Coeur d'Alene and other districts in which the Wilson Breaks a Record.

PROMISE TWO WEEKS OF THE GALLOPERS

Directors Decide out the Project and Begin Working Out the Preliminaries of What is to Be a Square Sporting Event.

Omaha will have a running meet this summer, extending over the two weeks from August 18 to September 3. The board of directors of the Fair and Speed association decided upon it at the regular meeting last night after considering the matter for several weeks. The meet is not to be a gathering of selling platers, but is to be of such a character and with such purses up The attempt to boom some of the southern Sheriff Hickey of Yankton county, after two as will attract some of the best horses on

The major part of the directors' meeting was spent in talking the project over, but nothing but the bare outline of the plan to have a half dozen good races each day special purses of larger amounts scuttered through the meeting. One rule to govern has been settled upon from the start. Everything is to be on the square, and every race from the jump will be on its merits.

The board of directors will set to work at once to make the preliminary arrangements for the meet, but no extensive progress will ing the latter part of June and early July ut of the control of A. E. Peavey & Co. Since the meeting has been determined upon, however, the directors are going into it with their whole souls, and propose to make the first affair of the kind ever held in this city a winner

About all the arrangements for the light harness meeting, which promises to be the most successful ever held here, have practically been made.

SCORES OF THE WESTERN LEAGUE

Adonis Terry Renews His Youth and Shots Out the Saints. MILWAUKEE, Wis., May 19.-Terry struck his old-time galt today and pitched remarkable ball, allowing the Saints bu two hits. The Brewers fielded in perfect form. Score:

Batteries: Milwaukee, Terry and Speer; St. Paul. Fricken, Phyle and Spies, DETROIT, Mich., May 18.—Hahn was in good form today and won his first game of the season, having better success in keep-ing the hits scattered than Cook. Score:

Minneapolis 0 0 0 0 0 0 1 0 0 0 - 1 7 5

Batteries: Detroit Hahn and Twineham;
Minneapolis Cook and Dixon.

INDIANAPOLIS. May 13.—IndianapolisOmaha, no game: rain.

COLUMBUS, O., May 19.—Rain interfered in the first inning, but play was resoured, the game being ended in the fifth inning by rain, Columbus bunching hits in the third and fourth and winning out. Score:
