

GIVES KEY TO THE DOCTORS

Mayor Moore Turns the Key Over to the Eclectic Healers.

ARE FOLLOWERS OF A NOBLE PROFESSION

President Farnam in His Opening Address Recommends Efforts to Secure Uniform State Laws.

The National Eclectic Medical association began its twenty-eighth annual convention in Creighton hall yesterday morning by listening to an address of welcome from Mayor Moore, immediately after the president, Dr. Edward J. Farnam, of Chicago, had called it to order and Rev. John McQuoid of the First Methodist church of this city had offered prayer.

It gives me great pleasure as mayor of Omaha to extend you a cordial welcome to our city. Omaha is a hospitable city, the metropolis of a hospitable state. The west should be the very best of things be the country of good fellowship and friendship; charity and hospitality should pass current here.

Physicians, too, as a rule are exceedingly loyal citizens. In the revolutionary conflict, hardly had the echoes of Lexington and Concord died away when the illustrious Dr. Joseph Warren left his large practice in Boston to give his services to his country.

How similar has been the history of our present war with Spain. Hardly had war broken out when Dr. J. B. Gibbes, a young physician of ability and standing in New York City, gave up his bright prospects to respond to his country's call.

Physicians, too, as a rule are exceedingly loyal citizens. In the revolutionary conflict, hardly had the echoes of Lexington and Concord died away when the illustrious Dr. Joseph Warren left his large practice in Boston to give his services to his country.

tuted the necessary changes in their college curriculum. The colleges are increasing the requirements for admission and the length of the course have likewise added to the fees and other expenses incident to the medical education until the price has surpassed the attainments of those who are in poor or moderate circumstances, and now it is suggested that the course of study be pursued at medical colleges be extended from four to five years.

Several other papers followed, namely, one by Dr. David Williams of Columbus, O., on hip fracture, another by Dr. E. L. Standley of St. Louis on artificial surgery, and the final one by Dr. W. E. Hillis of Berlin, Neb., on the surgical treatment of burns.

In the evening there was a reception and banquet at the Millard hotel, at which the doctors were the guests of local members of the eclectic school and other Omaha physicians and citizens. Many of the visiting doctors were accompanied by their wives and in all about 200 plates were laid.

The afternoon was entirely consumed with discussion of a very technical character, yet it was full of interest, particularly the papers on Bright's disease, pneumonia, appendicitis, the value of oxygen and hypnosis. Both today and tomorrow forenoon will be given over to this kind of instructive labor.

Two sections of the oracular portion of the program were enough for the afternoon. The first was devoted to the study of the medicine. Dr. R. L. Thomas of Cincinnati presiding and Dr. W. S. Latta of Lincoln acting as secretary.

Under the head of the practice of medicine Dr. Finley Ellingwood of Chicago read the paper on Bright's disease in which he said the highly civilized people of the present day eat too much salt, superinducing this very prevalent ailment.

There were more or less difference of opinion in the middle ground between the surgeon and the physician in his treatment of appendicitis, disagreeing somewhat with both of two eminent members of his profession, whose methods were radically different, namely, Dr. Hingston of Montreal, who was opposed to all surgical means, and Dr. Morris of New York, who advocated immediate removal of the vermiform appendix.

The subject handled by Dr. Thomas proved more than usually interesting. He reviewed the mechanical nature of the surgeon and the physician in his treatment of appendicitis, disagreeing somewhat with both of two eminent members of his profession, whose methods were radically different, namely, Dr. Hingston of Montreal, who was opposed to all surgical means, and Dr. Morris of New York, who advocated immediate removal of the vermiform appendix.

suggested that she act as a subject, but she demurred on the ground that "she feared she had too much self-esteem." On the other hand, Dr. Edwin Younkin of St. Louis, who had previously read a paper on an anatomical subject, expressed some skepticism and defied Dr. Carraker by offering himself "as a subject at any time."

Several other papers followed, namely, one by Dr. David Williams of Columbus, O., on hip fracture, another by Dr. E. L. Standley of St. Louis on artificial surgery, and the final one by Dr. W. E. Hillis of Berlin, Neb., on the surgical treatment of burns.

COLONEL BRYAN'S REGIMENT

Company L of the Third Kicks on a Diet of Salt Pork.

RENOVATING QUARTERS AT THE OLD POST

Recruits Cutting Weeds and Learning to Stand Erect and Face About.

Four drills a day and a diet of bread and pork have developed the soldier's customary ability to complain in the recruits who arrived at Fort Omaha from Indianapolis on Monday. When the cook announced last night that fresh beef would be the meat for the troops there was a great deal of cheering and 6 o'clock found 108 hungry volunteers making way with a generous supply of beef, bread and coffee.

Colonel Bryan visited the fort and had some furniture removed to the rooms he is to occupy at headquarters. In two or three days he expects to remain at the fort all the time, and will assist in drilling the men, studying tactics himself meantime. As yet company L makes a strange appearance on the parade ground. Only one member has a uniform and that is one he had several years ago when he belonged to the militia.

CITY COUNCIL PROCEEDINGS

Steps Looking to the Illumination of the City Hall Are Taken by the Councilmen.

The city council held two meetings last night. The first session was a special to close up some unimportant matters that had been hanging fire for some time. The second was the regular weekly meeting for the transaction of general business. The two meetings, taken together, did not last an hour. The councilmen were in a hurry to get through and visit the exposition.

Mr. Lobeck offered a resolution appropriating the sum of \$250 to be used in decorating and illuminating the city hall during the exposition. Some of the members thought that this was too small a sum for a creditable illumination, but before a vote could be reached, a motion to refer prevailed.

Mr. Stuhl came to the front with a resolution instructing city officials not to hire or patronize dealers in beer. He said that the resolution was aimed at some persons he had in mind, but who they were he did not say. The resolution was referred.

The comptroller, by resolution, was instructed to confer with the officials of the Burlington and Union Pacific railroads and ascertain just what they proposed to do relative to paying their respective shares for the construction and repairs of the Tenth and Eleventh street viaducts. The resolution instructed the comptroller to make the most advantageous settlement for the city. At the same time the officials will ascertain when the railroad people propose to pay the expense of maintaining the electric lights that are located at the intersection of their tracks and the streets. There are thirty or forty of these lights. Some two years ago the railroad companies settled with the city for the lights, but since then no payments have been made.

The new Washash solid vestibule train of day coaches, sleeping and dining cars, a train for tourists and all classes of travel will leave Chicago (daily), 12 noon. Leave St. Louis (daily), 9:10 a. m. Arrive New York via West Shore, 3:30 p. m. Arrive Boston via Fitchburg, 5:50 p. m. All agents sell tickets for this train and will tell you all about it. Ask him or write G. N. Clayton, N. W. P. Agt. Washash R. R.

The next meeting of the council will be held at 9 o'clock Thursday morning.

An Honest Crash

If you want a Crash Suit at all you want an honest one. Cotton isn't crash. The store that would sell you cotton for linen would just as soon sell you cotton for wool. We sell you a good honest all linen—pure linen—suit for \$2.50. That's less than anybody gets for as good a suit. We have some at \$2.50, \$3.00 and as high as \$4.50, and they are all honest, all linen—all straight crash. We have nothing at all against cotton when sold as cotton, but we have against cotton sailing under false colors. It's a trick. We don't like tricks. We would call your particular attention today to a line of crash suits we are selling at three dollars. They are good suits. They are made up by a good house and will give as good satisfaction as the average \$4 or \$5 crash. Light weight, dark color—not too dark, but dark enough to look clean a good deal longer than if the color was light. That's a point to be considered when buying a crash suit.

Nebraska Clothing Co

ORCHARD & WILHELM CARPET CO.

The Destruction

of our warehouse by fire has in no way interfered with our Furniture business, for we already have several carloads of new goods in and many more on the way and are prepared to fill all orders with our usual promptness.

Two Dresser Bargains—large size—with two large and two small drawers—level glass—antique finished—must be seen 12.75

A Cheval Dresser—the greatest bargain we ever offered 15.00

Mattings—usually this late in the season matting stocks are pretty much depleted—not so with us now—for we have just received a new importation of Japanese and China mattings; representing all the most artistic colorings and effects at a variety of prices—these make the most desirable summer floor coverings.

Carpets—our special carpet sale has been so successful that we have decided to continue the sale another week and offer for tomorrow and all week many new patterns at the same very low prices.

Special—see our west show window—any article in it for \$1.98.

Orchard & Wilhelm Carpet Co

1414-16 Douglas Street.

For One Week Only 50 new Pianos, in all varieties of woods \$187.50, at \$600 monthly payments. These are new pianos, usually sold from \$275 to \$300. Every instrument fully guaranteed. Chickering Walnut case, \$85. Decker Bros. Ebony case, \$85. L. G. & Co. upright, only \$75. Ivers & Pond. Vose. American pianos at greatly reduced prices. A. C. Mueller, Tuner, Telephone 1625.

Schmoller & Mueller, Exclusive Music Dealers. 1313 Farnam Street.
