

CONDITION OF OMAHA GRAIN TRADE

Values Strong on Nearly Every Kind of Merchandise.

JOBBERS ALL TALK IN CHEERFUL TONES. Consumer Most Generally Compelled to Pay the Tax-Jobbers Object to the Extension of Express Companies.

A large attendance of out-of-town people gave the city a lively air last week and without exception business men are giving very satisfactory accounts of the condition of business in all departments of trade.

Among the visitors there was a considerable proportion of country merchants, who made their presence known to the local jobbers, and who left many pleasant reminders of their visit in the shape of liberal orders filed for future shipment.

The bank clearing for the week made a most excellent showing, the average being considerably above \$1,000,000 per day and the gain over the corresponding week last year in excess of 50 per cent.

The going into effect of the new revenue law has made very little difference with local merchants, at least jobbers. As a general thing the cost of the tax has been included in the purchase price of the goods so that the consumer pays the tax and the merchant has little concern regarding the matter.

Heavy Trade in Groceries. Trade in wholesale groceries continues to be very heavy for this season of the year. The improved condition of the market when comparisons are made with previous years.

The market remains firm on nearly all lines, but in a few cases advances are noted. The heaviest advance last week was on sugar, which advanced 1/2 cent to 10 1/2.
