For governor the democrats will in all probability renominate Governor Alva Adams. The popthey will have to accept him under their fusion agreement, and I think we will be able to beat Adams. The silver republican state central committee has got together and invited all the silver parties to join with them. This the democrats and the populists will not do, so there is a break in the fusion strength to begin with. I cannot say just now who will be the republican candidate for governor, as under our laws we do not nominate until within sixty days

of the election. "With the legislature our prospects are not so good, because you see the threecornered fight does not apply to it. It will be a mixed legislature, with no party in control. At the election two years ago the four parties combined on national politics, the democrats, populists, national silver party, as it was called, and the silver republicans, but on state politics the demo crats and the silver republicans pooled their issues and the populists and the national silver party combined. What could you expect in the way of good government from such a mixed up mess as that? Arapahoe county, in which Denver is situated, sent an entire national silver party delegation to the legislature. The populist choice for governor, Judge M. S. Bailey of Canyon City, has gone back on the party. He has come out in a letter saying there is no need any longer of the party; that there is no need of any other silver party than the democratic party, although he was elected district judge by populist votes."

# ORDERS ALL THE MINES REMOVED.

Harbors and Rivers of United States to He Cleared of Obstructions .. WASHINGTON, July 12 .- The mines have been ordered removed from all rivers and

harbors in the United States.

This action was decided upon at today's cabinet meeting. For weeks past, in fact, almost since the beginning of hostilities, the War department has been deluged with protests from the commercial centers of the country against the continuance of these mines, which operated to the great detriment of commerce. In certain cases influences were brought to bear that secured an abatement of the rules, but this only in creased the dissatisfaction in localities where they were rigidly applied. Practically it has been impossible for any ship to enter or leave any harbor of the United States within the last two months between the hours of sunset and sunrise. The decision of the cabinet to remove these mines now is one of the most signal manifestations of supreme confidence of the government in the future and of the exemption of United States ports from attacks at the hands of any hostile power. Men at Santiago to Go When that City is Captured.

RESERVE CAMPS TO BE DRAWN ON HEAVILY

Given Out that General Miles is to Lend, with General Brooke as Second in Com-

mand.

NEW YORK, July 12 .- A special to the Times from Washington says: The movement of the American army on Porto Rico may be said to have begun. No troops have yet left these shores openly consigned to the island, but the continued forwarding of additional regiments to Santiago, when it is recognized that General Shafter has as large an army as he needs to take that town, is in reality the laying of the foundation of the Porto Rican expeditionary force, and the hurry orders that have been sent to the southern concentration camps, making ready mark the preparation for the superstruc-

The determination of the War departeral Shafter was sent away from Tampa.

The expedition to go against Porto Rico will consist of between 25,000 and 30,000 men. According to the Spanish army register for 1898 the total strength of the Spanish regular forces in the island of Porto Rico is 7,219. Of these, 5,214 are infantry, not hostile to Governor Tanner, has not the armed with Mauser rifles, 732 artillery and guard, which is a sort of custom house guard, and the police force. There are in the island, according to the information help of the fleet, will be ample to take the eral Miles, who will organize it at Santiago after the fall of that city, will draw heavily on the nucleus of the regulars, who have borne themselves so splendidly at Santiago. For the rest of the force he will take his choice of the reserves at Tampa, including 12,000 infantry, 3,800 cavalry and 1,000 artillery; of the six regiments at Miami, the twelve regiments under Lee at Jacksonville, of the great mass of volunteers at Chickamauga, where more than forty regiments are awaiting orders to go to the front, and

of the big force stationed at Camp Alger. Plenty of Men. There will be no lack of men, and efforts ment to see that there shall be no lack of equipment. Materials to complete the outfit for the First corps under Major General Brooke, which is expected to form the the regulars, are being forwarded to Chickamauga by express. This corps is expected to be ready to move within a week, and if Santiago falls as soon as it is expected to has been any change in the plan to have General Brooke lead the Porto Rico force, as Shafter did that to Santiago. General Miles, as the general commanding the army is expected to be in supreme command, however, with General Brooke next to him,

The officers who are to command in Porto Rico are making exhaustive studies of the island, and the army's bureau of information, which has elaborate data concerning it on file, is being drawn upon heavily. Detail maps of the island and of its principal towns are being supplied to these officers, and the information which they are most in need of will be forwarded to them as fast as practicable.

It is thought not improbable that the army will have a harder time on the northern south coast of Cuba. The Porto Rico coast line has few of the inlets and indentations harbor near San Juan like Guantanamo to furnish a coaling basis for a fleet. The landing may be made at Ponce, where the defenses are said to consist chiefly of some very fine mountain howitzers on the hills back of the town. The shelling of San Juan itself is expected to be a comparatively easy task, if it becomes necessary, as the town would be more easily reached by the big guns of the fleet than Santiago.

### TAKING CERVERA TO ANNAPOLIS. He Will Be Kept There Till the Close

of the War. PORTSMOUTH, N. H., July 12 .- The auxiary cruiser St. Louis, which brought the Spanish prisoners into this port on Sunday, was busy coaling today. It is expected that the cruiser will leave for Annapolis tomorrow morning with Admiral Cervera and the other Spanish officers who have been ordered to that station to await the final operations of the war.

The Spanish captives who were landed on eavey's island have made themselves at home and most of them spent the day in playing cards or other favorite games. The men have good appetites and have apparently become contented. The food being supplied them is of the best quality. Two of the cooks of the Cristobal Colon have been detailed to assist the twelve Americans in this work and the men have a much better prospect for good living than they have had in a long time.

The sick among the Spaniards have been placed in the two hospitals on the island. It has been found necessary to furnish additional quarters for all who are on the sick

The government tug, which visited the cruiser today, reports Admiral Cervera as feeling much improved.

Outlook for the Cricket Tourney. Although perhaps the strongest team in the Northwestern Cricket association wi not be entered in any not be entered in any of the materies of that day, next Monday, the opening day of the tournament, will see a couple of warm games. They will be between the Omaha and Minnesota and Denver and Chicago teams. These teams are considered to be about evenly matched and a warm time will therefore result. about evenly matched and a warm time will therefore result.

Denver is something of an unknown quantity in the association, but the critics look for an aggregation to be something of a surprise. Chicago, however, is fit to run up against anything. Omaha and Minnesota up to the present time have about broken even on all games played and the chances between them are believed to be about even. Omaha has materially strengthened this year with the addition of such men as Bate. Dougal and Tuffield, while the balance of the club has done excellent work. client work.
