Cavaignae then charged him point blank with having forged the letter. The officer attempted further argument, but admitted subsequently that the last sentence in the missive had been written by him at length. When required by the minister to tell the whole truth on his honor as a soldier Henry broke down and confessed he had fabricated entire document. The examination, the which had lasted three-quarters of an hour, was then at an end. Henry was allowed to drive home and bid

fareweil to his wife before being imprisoned, but was accompanied by a military officer who did not lose sight of him.

The wildest excitement prevailed tonight when the news of Henry's suicide became General Gonse, under chief of the signal known. Amid the countless rumors in circulation

Whether General Terry means that twenty-four in the camp of the Eighth New York, or in the entire camp of the sight New more would die the day of his departure cannot be exactly deter-mined by his form of speech. On the day he is quoted as making this remark his the deaths of the entire army encamped here were seven and the deaths in the Eighth New York, two days before his visit (being the last report) numbered only one, which had been the rate for several days. As to the bospitals being unclean and

there being a lack of food and the food being regular army rations badly cooked and other similar conditions, a sufficient answer is found in the critical examination of the hospital of the first division of the Third army corps, General Frank commanding, set forth This hospital, in charge of Major ". M. Drake, is one of the cleanest and most complete which any veteran of the civil war would expect to see and this is the division to which the Eighth New York is attached. In closing I beg leave to express my opin-ion that most of the interviews with chaplains, regimental surgeons and others, both officers and men, now appearing in many newspapers, in regard to this camp are reckless and false except as to the flithy conditions which their own criminal neglect has caused. In my judgment the recent increase in the outcries against water and the per-sistent assertion that the park is unhealthy have been largely and deliberately used to stir up sentiment or influence which would be exerted to secure their relief from service.

Very respectfully, your obedient servant, H. V. BOYNTON, Brigadier General United States Volunteers. REMOVING THE SICK SOLDIERS.

Would Prove Fatal. WASHINGTON, Aug. 31 .- Secretary Alger with Mrs. Alger paid a visit to Fort Myer last evening and inspected the arrange ments at the hospital there for the treatment for the cases of fever coming from

Camp Alger. They were found to be of the first order. The surgeons in charge are supplied with everything conducive to the comforts of the patients that money can buy.

It was a noticeable fact that many o the sick soldiers complained of hunger and this is in spite of the fact that they are given all the food that the nature of their ailments will permit of. Few of the visitors to the army hospital who see the typhoid patients, emaclated in appearance, calling for food, realize that to grant their

desire for solid food would be to condemn the patients to death; that the immediate result of the administration of anything

more than limited quantities of liquid food would cause perforation of the inflamed intestines, hemorrhage and death. Secretary Alger's attention has been strongly directed toward this fact by the reports that come to him from the medical officers of the field and garrison hospitals.

Major Taylor, the surgeon in charge at Fort McPherson, Ga., hospital, has suffered from adverse criticism based on the observation of inexperienced visitors and while he has refrained from answering criticisms hurrying to the scens.

published in the newspapers, he has sub-mitted the facts to the War department. His statements exactly bear out the observations of Secretary Alger as to the mistakes made in assuming that the patients were underfed. Moreover, Major Taylor takes occasion to show by figures just what he has done for the patients in the matter of food and attendance. His bill for milk alone is \$800 per month; he has more ice

LAREDO, Tex., Aug. 31 .- Within the last week four deaths from yellow fever have occurred at Vera Cruz, Mex. The authorities there are making every effort to prevent its spread.

The physicians at Tampico state that the yellow fever has attacked only those persons who do not take proper care of themselves. There is no danger of the fever breaking out here or hardly any other point along the Mexican border, due largely t the climatic conditions and the elevation of the important towns.

Origin of Fever a Mystery. JACKSON, Miss, Aug. 31.—The State Board of Health is unable to locate the the origin of the four cases of yellow fever re-ported yesterday at Orwood, a small vil-
