lutions and policies have been adopted by today: the Philippine Congress, They looked for a cable at any time in response to inquiries. which would show just what the present status of affairs was.

but they were without official verification

counted dow that inactivity

Senator Chandler of New Hampshire, who is taking a personal interest in the Philippine question, and General Greene, who accompanied Agoncillo on his trip here, had was no doubt the president would receive the delegation, the delay being due to the desire of the delegates to get full information on the condition of affairs at home. They had come a long way and the senator felt that they were in a position to give the authorities here much intelligent information on the people and affairs of those with whom we are now brought into such

close relations. Asked to sum up the desires of the Philippine delegates, Mr. Chandler said: "The first and most essential purpose is to have the treaty of Paris-the final treaty which will stand for all time-contain an article terminating absolutely the rule of Spain over the Philippines. It is not alone the termination of Spanish sovereignty over the island of Luzon or Mnalia that they desire, but the end of Spanish rule over the entire group of islands. And it is conceded that if Spanish sovereignty is to be brought to an end over the island of Luzon, it should also be brought to an end over the whole archipelago, for it, would not do to. dispossess Spain of the island of Luzon and leave it free to transfer adjoining islands to Germany or other foreign powers. The lisappearance of Spanish rule from the Philippines baing assured, the next purpose of the Filipinos, as I gather from their delegates, is to have an opportunity to try their capacity for self-government under American protection, if need be, during the transition period, or, if that seems inexpedient, then they want this government to assume the direction and control of affairs by annexing or such other method as may best meet the condition of affairs. They seem to feel satisfied that the ques

tion of future rule can be solved without difficulty after the first great aim of terminating Spanish rule is brought about."
