favorable reports which stemmed the trad-ing. Standard issues exhibited remarkable selling powers and moved independently at intervals. But the persistent raids else-where robbed the momentary advantages. Then followed a systematic attack and it diverted from one stock to the entire in-dustrial group. Advances for the week ranged up to 32 points in Tobacco, New York Air Brake. Manhattan, Cotton Oil and Leather in this order. Covering elsewhere occasioned un-steadiness. Holders of industrial securities were alarmed during the campaign as knowledge regarding the next point of at-tack was not available, and the province of the interests engaged in the movement impelled conservative operators to with-draw on the first indication of weakness. Railway earnings embracing all the lead-ing lines were in the main encouraged, but returns from some sections showed heavy decreases, owing to well known conditions. The policy of effecting improvements in-creased the ratio of operating expenses, but this action will permit a radical reduction in operating charges later on. Foreign and state politics were discussed to a consider-able extent. This proved to be a back log, as the polition abroad to purchase securi-ties in face of the depression of the local market secured some industrial demand. A continuance of the business expansion which is particularly marked in some lines was considered a fair barometer of the general situation. The steady increase in westhound traffic on the leading lines offset the light grain movement. The latter cir-cumstance must eventually be remedied by increased movements. Belated borrowers of call money had to pay as high as 6 per cent for accommodations, but this rate was only temporary. Average rates were 3 and 4 per cent and time funds and discount rates were decidedly easier. Shipments of currency to the interior showed a notable decrease, and the available funds in the market were increased by the gold arrivals and anticinatory interest payments by the government. The leading futures ranged as follows: Articles. | Open. | High. | Low. | Close. |Yes'dy,

are so changed that the old mills are worthless and cannot help out in a time like this when consumption is rapidly in-creasing. --------------	--	--

There is little of interest to report this week concerning the dry goods trade. The market remains unchanged but local job-bers still say they are having the largest run of business they have ever experienced. The house trade continues to be an important factor and doubtless will be still important factor and doubtless will be still more so this week, and in fact throughout the month of October on account of the large number of strangers that will be in the city to attend the exposition. Fall stocks are now being shipped to all parts of the west as rapildy as possible and every cool day makes country merchants more anxious to get their supplies and bring in a new lot of rush orders. The boot and shoe situation is also prac-

more anxious to get their supplies and bring in a new lot of rush orders. The boot and shoe situation is also prac-tically unchanged, but for all that jobbers are well satisfied. The volume of trade so far this year shows considerable improve-ment over last season with indications pointing to still farther expansion. Trade, generally speaking, is good with country merchants, so they are buying more fully than for some time past and apparently have little anxiety regarding future de-mand. Rubbers are also in good request, more so, in fact, than anticoated. Many of the local dealers are overchyded with or-ders and have all they can do to supply there eustomers. Stocks in some cases have already begun to run low and additional supplies are being rushed here from the east. Taking all things into consideration local dealers have little to complain of. Lumber merchants have about the same report to make as was given out a week ago. The situation is best described by the word quiet, and dealers generally are not looking for much improvement in the near future. Country retailers say there is but little doing, and as practically all of them are stocked up heavier than usual it is difficult for local jobbers to see how they are going to get anything more than scat-tering orders for odds and ends.

are going to get anything more than scat-tering orders for odds and ends.

Fruits and Produce.

Fruits and Produce. Trade last week was not as satisfactory to commission men as it has been during the greater part of the year. Their explanation is that fruits are becoming more scarce and consequently there is little to sell except the regular stape lines. A few California stapes and pears are still on the market, but they will soon be gone. Peaches are also practically out of the market, but what few are left bring from 95c to \$1. Ohio, as well as native grapes, will probably be out of the market by the child of the week, leaving practically only the New York grapes. A few New York grapes have already been foo 16c and natives at from 15c to 13% of the frequence. Chartaloupes are also becoming very harce. One more car, if is reported, is on the total, which will about close the seatent of the apples received is stoadily improving fonthans are now on the market and are selling at \$3.50. The supply of potatoes at seatent is excessive. Commission men as y they have more than they know what.

are expecting a big city demand next week and as receipts are rather light and the loss heavy it is not difficult to keep the price up. Foultry is also firmer than a week ago. Spring chickens are bringing 7½ Gisc and hens 7@7%c. The receipts of game are quite liberal for this time of the year, but there seems to be no home market. There is, however, a good shipping demand. The butter market is also firm at the ad-vance. vance

market were increased by the gold arrivals and anticipatory interest payments by the government. The bond market moved in sympathy with stock fluctuations and showed more ac-tivity on the money conditions. Govern-ment bonds were remarkably well held throughout the week, concessions being confined to ½ per cent in the 2s and 1-8 on the 3s and 4s. The Evening Post's London financial ca-blegram says: "The stock markets here were lifeless today, except Grand Trunk and mines. The former was good on the monthly statement showing a big saving in the New York lead. Investment stocks 1 were the lease and revival of public in-sterest in Americans. Whether it will de-velop depends entirely on politics. The London market discount rate is 23-8 ver cent. The supply of bills presented for dis-count is scarce, which causes case in time money." Shipments. 235,000

Wool Market. 125 64% Union Pacific U. P., D. & R. G.

Wool Market. BOSTON, Oct. 1.-The Commercial Bulle-tin says of the wool market: Some light purchases of territory wool, a limited interest shown in fleeces at low-est quotations, the absorption of a long-carried block of pulled wools and further quiet buying by Canadians of Australian stocks in bond have constituted the mar-ket for the last week. Otherwise the situ-ation has been featureless. The sales of the week are 961,060 pounds domestic and 406,000 pounds foreign, a total of 1,367,000 pounds, against 1,749,000 pounds last week, and 13,745,500 pounds for the same week last year. The sales to date show a dz-crease of 106,197,300 pounds domestic and 116,775,300 pounds foreign from the sales to the same date in 1857. The receipts to date show a decrease of 190,124 bales do-mestic and 281,407 bales foreign. LONDON, Oct. 1.-The imports of wool during the week were: New South Wales, 1,027 bales; Queensland, 2,500 bales; Mel-bourne, 257 bales; South Australia, 39 bales; New Zealand, 525 bales; Cape of Good Hope and Natal. 98 bales; China, 443 bales; Rus-sia, 1,106 bales, and elsewhere, 958 bales. 54% People's Gas 117 Cons.
