Following ire the facts: I traded with Judge James for some property in this city that was in the name of Mrs. James. I never held any talk with Mrs. James as to the transaction; as part consideration I deeded Mrs. James 160 acres of land in Holt county. This land came to me in a trade by a warranty deed and as the parties were responsible I took it for granted that the deed was good and under this impression gave James a warranty During the summer Mr. James sent for an abstract of title and it shows a defeet in the title and as a matter of fact this should be remedied and I have never taken any other position in the matter, as to value or consideration of land. I know little and have never seen it up to the time I traded same to James. F. A. BIXBY.

PROSPERITY FOR SHEEP OWNERS. How Times Have Changed in North-

SAC CITY, Ia., Oct. 18 .- (Special.) -- A northwestern lowa farmer who voted wrong ticket in 1892 declared on the flock industry that he didn't Rebekahs in Iowa were rapidly coming to have the courage to look a sheep in the face. He felt that the wool had been pulled over his eyes pretty effectually. The effect of democratic legislation on the industry is still fresh in the memory of all, and particularly of those directly interested. It "didn't do a thing" to the sheep growers. One of them advised that the only way to lessen the disaster was for the flockmaster to cut the throats of his sheep. This region did not suffer so severely as others more largely concerned, but the sheep industry of South Dakota, which was very promising and had been demonstrated to be adapted

> to the countty, was hit hard, How things have changed is shown in the fact that some democratic papers are no longer afraid to mention the sheep. The Primghar Democrat of a recent date notes the shipment by a couple of local farmers of their spring lambs of 1898 to Chicago. We consider this shipment of such importance as to warrant more than passing notice," say the Democrat, and it proceeds to tell why it o regards it. "Last fall," it goes on to relate, "both gentlemen purchased the tail-enders of a big flock of sheep and each raised about 90 per cent of lambs." For these lambs, 121 in number, the growers received \$3.75 per head. "The ewes sheared \$1.40 worth of wool per head and are now worth \$4 per head." In the opinion of the Democrat "the sheep business has come to stay in this country and men should remember that any good, healthy ewe at from \$3.50 to \$4 is the best investment they can make," for it declares that with decent care "they will bring in 150 per cent profit to any farmer." How different from the time not long ago when the flockmaster was advised to save himself cost and trouble by cutting the throats of his sheep!

But it is not alone sheep that are valuable Democrat, the same authority heretofore quoted, prints this local item:

W. L. Ross, western representative of a great live stock commission firm of Chicago, arrived here last night from the ranges, going away today. He told Williams Brothers of some 2,600 fine yearling wethers, all black faces, out on the range, and they purchased them this morning by telegraph.

That's the sort of calamity this region is auffering from, as appears from democratic news sources. Sheep at 150 per cent profit! Hange cattle at \$4. The best year for feeding in thirteen years, and the best crop in history to feed!

SIOUX CITY, Ia., Oct. 18 .- (Special.)-The judicial ticket of the Fourth judicial district of Iowa is in a sadly mixed up state. gives the cleanliness and even heat with soft coal, as hard coal in Base Burners. The Hot Blast Draft

Soft coal equal to hard coal. I used Cole's Hot Blast, No. 180, from December, '97, till spring. It is as clean as any wood stove I ever used. Often a grape basket full of coal lasted from one evening ill the next. It was steady, even heat. Fire only went out once during the winter and that was our fault. It never smoked and walls and celling are clean as if I burned wood. It is the best stove I ever
