WILL HARNISS PLATTE'S WATERS.

Interesting Experiment to Be Attempted by a Colorado Company.

DENVER, Oct. 26.—(Special.)—Harniss Platte's waters at a point twenty-two miles from Denver from which power will be generated by electricity and then return the water to the stream. The electricity thus generated will be transmitted to Denver by means of wires and will be of sufficient power to turn every wheel in the city, including all the manufacturing establishments and street car lines.

The power company will be able to sell power at a far cheaper figure than that for which coal can be bought. The plans involve the taking of water from both forks of the Platte at points about ten miles above and below the junction.

BANKS SEE BETTER TIMES

Demand for Money Indicates the Prosperity Felt by Business.

ESTABLISHED ENTERPRISES ARE EXTENDED

Plenty of Idle Capital Still in the Omaha Depositories, but the Request for Loans is Constantly Growing.

After a long period of inactivity the demand for loans at the various banks of the city is beginning to increase. During the summer months the supply of money was greatly in excess of the demand, the result being that the large crops throughout the state last year and the good crops secured for them brought about a revival of good times, enabling business men to carry on their business without the need of borrowed capital.

When asked about the condition of the local money market, J. H. Millard, president of the Omaha National bank, said: "We have a good supply of money on hand to loan, more than enough to answer the demand, which up to a short time ago was pretty quiet, but lately calls for loans have been more frequent, and just now we are putting out a great deal of money that is being used in the grain trade. The small demand for money recently has been due to the good times, and the renewed demand for it now is due to an increase in business."

M. T. Barlow, president of the United States National bank, said: "The demand for money by our customers during the last few months has been pretty light and our supply has been accumulating all along. The low local demand is caused to a great extent by prosperous conditions. The crops have been abundant in the last two years, the prices brought by grain and produce have been high, and this, with restored confidence has increased the supply of money to a much greater extent than the demand."

The opinion expressed by F. H. Davis, cashier of the First National bank, was: "The large crops all over the state have brought in a great deal of money. The exposition has brought a large amount of money to Omaha and the state, but it has contributed only incidentally to the supply of money on hand for loans, good crops being primarily the cause of it."

Henry W. Yates, president of the Nebraska National bank, remarked that borrowers were not as numerous as usual. He said: "We have more money on hand than we can loan at satisfactory rates, but the calls are becoming more frequent every day and will continue to pick up during the fall."

C. W. Lyman, president of the Commercial National bank, said: "The demand for money is getting brisker with us. The men engaged in the grain and cattle business are borrowing to carry on the fall trade and the months when the call for money was low are pretty well over."

GIRL DANGEROUSLY BURNED

Jennie Johnson the Victim of a Down Draft and Probably Fatally Burned.

Jennie Johnson, aged twelve years, living at Thirty-third street and Grand avenue, was sent by her mother Tuesday evening at 7 o'clock to build a fire in the kitchen stove. As she was about to put the match to the kindling, the wind blew down the chimney and forced the flame against her dress, which caught fire. She ran out of the door and started for a neighbor's about two blocks away. Before she arrived there all her clothes had been burned from her body and she fell in a swoon in front of the neighbor's house. Her wounds are of such a nature that it is believed to be impossible for her to recover. She was removed to Emmanuel hospital, where she is now lying at the point of death.

SHARP PRACTICE BY THE POPS

Attempt to Keep the Name of Republican Legislative Candidates on the Ticket.

ARMOUR, S. D., Oct. 26.—(Special.)—For the second time in the present campaign the republicans of this part of the state are forced to appeal to the circuit court to obtain and protect those rights that are given them by the statutes of South Dakota. The first time was in relation to the unlawful gerrymander of the commissioner districts of this county, in which the supreme court recently handed down a decision affirming the action of the lower court setting the gerrymander aside, while now the republicans are in court to get the name of their candidate for senator for the Eighth senatorial district and the candidate for representative for Charles Mix and Gregory counties on the official ballot of Gregory county. The last legislative session a law providing for the reorganization of the county, which should be attached to Charles Mix county for legislative purposes. Gregory county was organized last August. The law requires that certificates of nomination shall be filed with the county auditor, while now the republicans are in court to get the name of their candidate for senator for the Eighth senatorial district and the candidate for representative for Charles Mix and Gregory counties on the official ballot of Gregory county.
