Kindergarten and Primary School. Mrs. Orietta Shields Chittenden, supervisor of the Omaha kindergartens, handled The Relation of the Kindergarten to the Primary School" in a most interesting manner, saying in part:

The thoughtless have looked upon the Ogden kindergarten as a nursery for the children of the indolent or of those so engrossed in the indoient or of those so engrossed in the duty of providing for their families that the care of their children is impossible. The kindergarten is not a nursery, but the be-ginning of a system of education. It is a home to train little children mentally, mor-ally and physically and to give such train-ing in the form of play instead of work ing in the form of play instead of work. Play is an activity which is its own reward. Work is an activity which has a definite obwork is an activity which has a definite objective aim. The kindergarten is the medium between the two, because in it work
constantly passes into play. The child
learns and grows physically, mentally and
morally as he plays. His play is serious

Situation in the Congressional Dislieve They Will Elect All Their Candidates.

DES MOINES, Nov. 5 .- (Special Telegram.)-Chairman Hancock of the republican state central committee this afternoon issued the following statement in regard

from fifty-eight of the ninety-nine counties in the state. These polls show a net remates of majorities in thirty-one of the remaining forty-one countles of the state. Esthe basis of the vote of 1897, shows a majority for the repulbican ticket of 47,654. From these polls and estimates, which have been carefully collected, the republican state central committee believes that the repubican state ticket will be elected by at least 50,000 majority over the fusion ticket, in case as large a vote is cast on Tuesday as the indications now seem to warrant. The situation in the congressional districts is brighter than it was some days ago, and there is no question but that the republicans will elect their entire congressional ticket.

There was a time when to get a first class pair of shoes for men or women it was necessary to pay five dollars or more just as the retailer felt about it. And those same retailers try to make you believe it is necessary to pay the same price now. But it isn't. There is no branch of manufacturing that has been perfected so much as shoe-making. The improvement in shoe machinery has cheapened the cost of production and improved the character of the work until now you can buy as good a shoe for \$3.50 as you used to have to pay \$5.00 for.
