Excellent Cash and Export Demand for Wheat and Corn-Provision Market Unchanged.

CHICAGO, Nov. 9.-With the exception f provisions, everything on change today was strong and made good advances. Strong cables, an excellent cash demand it higher prices and intimations of war developments over night abroad drove shorts to cover in wheat and resulted in strice advance. Wet weather was one of the bullish factors in corn, which advanced 1-894c. Outs advanced 4c. Provisions were weak on large hog receipts and de-

There was plenty of news of a bullish character at the opening in wheat to justify the %c advance with which that market started. The opening for May was per-success. It weakened a trifle shortly after the opening, a few sales being made at 60, 506 3-sc. But this was only temporary. Under fairly strong demand from shorts and a moderate amount of invest-ment buying, the price advanced pretty steadtly for over an hour, finally getting There was a marked scarcity of offerings during this time but at the best the demand was only moderate. The strength was mostly due to an advance at Liverpool of 11-8stlyd over Monday's fig-tures, and mowithstanding the fact that English copsols were strong, traders look d ers over the political situa tion of nacciones over the political situation. Their oclief was strengthened by intimations that Lord Salisbury's speech tonight would be rather sensational. Broomhall cabled that the strength at Liverpool
was purly due to scarcity of spot wheat.

The scabnard reported an excellent export demand and placed sales at over sixty
loads. Cash wheat both here and in the
northwest was strong and higher and the
demand showed considerable improvement.
The increase in the world's visible was
2,000,000 bu. This was less than expected.
Receipts in the northwest were heavy,
even for two days. Minneapolls and Dulight reported, 2,351 cars since Monday, compared with 2,501 last year. Senboard clearances were moderate, 661,000 bu. Primary
receipts for two days were 3,212,000 bu.
Covering for St. Louis shorts was quite
prominent in the trading. After the advance to 55c the market became dull,
though the price was well maintained for
some time. During the afternoon, however, though the price was well maintained to some time. During the afternoon, however, it eased off somewhat, though no weakness developed. May closed at 665-8266%c. Corn was slow but irm. Ther was a good cash demand and this with the wet weather and higher cables made hears cautious. Heavy shorts were good buyers, and the source helps the feature.

weather and higher cables made bears cautious. Heavy shorts were good buyers, demand from this source being the feature of trading. Receipts were \$68 cars. May ranged from 34934 1-8c to 33 7-8c, and closed 1-3044c higher at 33 7-8c.

The market for cats was uneventful. Prices were steady at a small advance, bad weather in Illinois and sympathy with wheat and corn being the leading factors. Trading was very small and the fluctuations insignificant. Receipts were \$63 cars. May ranged from 24436247-8c to 245-8c and closed at 245-89248.c.

Erovisions were duli and heavy throughout A decline in log prices started the

provisions were dult and heavy through-out A decline in hog prices started the market at a small decline and moderate selling pressure from packers with no de-mand of consequence forced prices steadily downward. The market was at its weak-est at the close. January pork closed 15c, lower at \$8.90; January lard 10c lower at \$1.00. and January ribs 5c lower at \$4.60, mated receipts Thursday: Whea corn, 677 cars; oats, 389 cars; hogs, 432 cars; corn, 677 cars; oats, 382 cars, 32,000 head.

Market Feverish and Uncertain, Developing into Quietness.

NEW YORK, Nov. 9—The market was very active and decidedly bregular during the morning session on the Stock exchange and at one time the list took on fulle uniform evidences of strength and moyancy. But by 12:30 o'clock the demand for securities seemed satisfied and the market lell into dulness and a somewhat reactionary tendency, which prevailed to the close. London, in spite of dulness and beaviness of the general market, had marked up prices of Americans vesterday and today, while the New York exchange was not in session. The British interpretation and understanding of the American elections—always more or less obscure and confused—prompted them to do this. The opening here did not fully respond, prices showing below the London parity, and the international arbitrate brokers seized this opportunity to cover sales, made at a signer level in London. New York Dry Goods Market,
NEW YORK, Nov. 3.—Interest in elections interfered with spot business and
store trade in all directions was indifferent in dry goods. The mall order demant
was considerable for a general variety of
cotton merchandise. Western and southern business was prominent. The general
tone of the market showed no change and
no further alteration in prices was ceported
in either staple or fancy cotton goods. Print
cloths were inactive, but steady. Business
in woolens improved gradually, but was
still unsatisfactory in volume and prices
continued irregular.

The market on killing (attle was in peculiar shape. Chicago came very dull and 10%20c lower on steers, which meant that the market down east was demoralized. At the same time the sellers here had one thing in their favor—the receipts of killing cattle yesterday and the day before were very light, so that every one was in need of fresh supplies. As a buyer expressed it, there are five packing houses here and not enough cattle coming to keep two running. The result was that buyers were out early in the morning and picked up a few loads that happened to be what they wanted at steady prices in spite of the very discouraging reports from the east. They

discouraging reports from the east. They paid \$4.95@5.20 for good to choice corn-fed paid \$4.35(65.20 for good to choice corn-fed steers.

While some of the cattle sold early brought steady prices, and while buyers claimed to be ready to pay steady prices for most everything, the market was generally lower after the first round, and a good many sellers reported that they had to take off a dime at least, and in some cases mere. The heavy cattle were the worst survers, handy weight cattle being in the best demand. Grass beef cattle also suffered about the same decline as cornfeds. Taking the market as a whole it must be admitted that it was in exceedingly good shape, considering the way cattle were reported as selling on other markets. Representative sales:

and the market here eased off, closing loc lower than yesterday's general market, the later price for packing hogs being \$3.42\frac{1}{2}8. With such unfavorable news from other markets sellers seemed to realize the impossibility of holding up the market here and as a rule they cut loose early, so that the most of the hogs sold in good season.

A comparison between prices will show that hogs are selling close up to Chicago,
in fact, packers at this point claim that their hogs on some days are costing with a few as much as the droves in Chicago cost.
The reason for this is to be found in the very excellent demand at South Omaha due to there being more buyers than hogs, which keeps the market up to the top notch.

It will be noted from the table of average

... It will be noted from the table of average prices at head of column that the deeling in values made during the latter part of last week and on Monday of this week and puts the market back to about where it was a week ago. Representative sales:

SHEEP-After the famine yesterday there was a pretty good run today, so that in spite of there being no fresh arrivals yesterday the receipts for the week to date are larger than for the corresponding three days last week. There was a good demand for killers today, and both sheep and lambs sold quite readily, if choice, at fully steady prices. A bunch of cornfed Mexican yearlings sold at 14 45 and some choice native lambs brought \$5.25. Nearly everything in the way of killers sold in good season.

The market on stockers and feeders was a little slow, the attendance of country buyers having !cen rather light for a day or two back. As to values there was no material change, as compared with yesterdar.

CHICAGO LIVE STOCK MARKET. Receipts of Cattle Heavy and Prices Down-Good Supply of Hogs. CHICAGO, Nov. 2.—Receipts of eatile were heavy and buyers forced prices down, sales being slow at reductions of from 10c to 20c. Sales were on a basis of \$3.90@4.25 for very common native beef steers, up to

100 Very common native beet steers, up to \$5.0065.50 for good to strictly choice shipping beeves, with the bulk of the cattle going for \$4.7565.25. The average quality was only fair. There was a fair stocker and feeder trade at easier prices and butchers and canners were fairly active at the reduced prices. Calves sold largely at \$4.006.8.75. Straight Texans sold largely at \$4.006.3.70 and cattle from the western ranges sold chiefly at \$3.5564.30 for steers.

Hogs were unexpectedly heavy and pricing were 5500c lower. Hogs sold at an extreme range of \$3.1563.65, prime heavy going at the top, and sales were largely at \$1.4064.55. This was the lowest day of the reason. Pigs sold at \$2.4063.55.

Offerings of sheep and lambs were large, but a good demand prevented any general break in prices, though und strable lots were weaker. Sheep sold all the way from \$2.25 to \$1.75 for inferior lots up to \$4.250 4.75 for good to choice flocks, westerns fetching \$3.5064.35, and yearlings \$4.4064.55. Lambs were wanted at \$4.004.50 for common up to \$5.4065.65 for the best, range flocks fetching \$4.5065.25.

DENVER MINT RECEIPTS.

Evidence of the Prosperous Condition of the Mining Industry. If anything were needed to justify the recent rise in Colorado mining stocks, says the Denver Times, it could be found in the one item of Denver mint receipts. No more reliable indication of actual mining conditions could possibly be found than the figures furnished from this source. They are official and wholly reliable, for they cannot be swelled one penny in the interests of the boomer. They do not by any means represent the total gold production of the state, but by comparison they form an absolutely reliable basis for judging the general ad-

vancement. That this advancement has, during the present year, been beyond all precedent is amply shown by the figures presented by Assayer Brady in charge of the United States branch mint at this place. According to these figures the gold receipts for the present month, the last two days estimated, were \$2,215,364.07, or nearly double the receipts for the corresponding period last year, when they were \$1,149,365.50, a gain of \$1,065,998.48.

A statement of the receipts from January 1 to September 30, 1898, shows \$14,376,351.10, while the receipts for the corresponding period last year were \$8,388,088.56, a gain of \$5,988,262.54 in nine months. An average gain of nearly \$750,000 a month

in mint receipts alone is a record of which Colorado may well be proud, and which is unprecedented in the history of mining anywhere. A very liberal estimate is that the mint

receipts represent two-fifths of the total gold production of the state. Upon this basis the total for the year would be about \$30,000,000, as compared with \$23,000,000 last The probabilities are that the actual pro-

duction will exceed these figures, for the recent rich strike in the Cripple Creek district, together with increased operations in all the important mining camps of the state, will largely swell the production for the last three months of the year. A total production of \$35,000,000 in gold for the year 1898 need not surprise any of Colorado's friends.
