BOND ELECTION MAY FAIL

Board of Education May Abandon Its Special Election Proposition.

UNEXPECTED OPPOSITION DEVELOPS

Some Members Profess to Think the Move Unnecessary, While Others Come Out Openly Against the Plan.

A cloud has arisen to darken the prospect that the proposition to vote \$250,000 school bonds will be again submitted to the voters of the city by the Board of Education at a special election to be held in the near future.

The law requires that the proposition may be submitted only on the vote of ten members of the board. A canvass has demonstrated that three members are emphatically opposed to the idea, seven are favorable to it and the other five are not decided.

The formal memorial service was then held. The opening memorial address was delivered by Mrs. Cornelia B. Forbes of Connecticut, who was followed by Mrs. Narcissa W. Kenney of Oregon, Mrs. Margaret Ellis of New Jersey, Mrs. Mary A. Dunham of Iowa, Mrs. Lucy B. Thurman, colored, of Michigan, Mrs. Helen M. Bullock of New York, Miss Matilda Carso Pitts and others.

Following a five-minute respite for physical exercises, conducted by Mrs. Mary A. Blood of Chicago, the reports of the national superintendents were presented. These included: "Peace and International Arbitration," by Mrs. Hanna J. Bailey of Maine; "Franchise," by Miss Marie C. Brohm of Illinois; "Child Labor," by Mrs. M. J. Leggett of New York; "State and County Fairs," by Mrs. J. N. Guild of Missouri; "Parlor Meetings," by Mrs. Mary D. Tomlinson of New Jersey; and "Purity in Literature and Art," by Mrs. Emily D. Martin of New York.

That is, the candidates mentioned and one in addition. The latter is Heas, but up to the present time his support consists of himself and possibly Van Gilde. Thomas is a candidate of prominence and is said to have five or six votes of the holdovers pledged to him. Buchanan and Penfold are the other two mentioned and represent the opposition to Thomas. The latter is not after the office, but he has been put forward as likely to be as fair and impartial as any member of the board in his rulings.

Thus at present the president cannot be elected by the holdovers, and unless some combinations are formed in the future the assistance of one or more of the new members must be secured to elect the officer. Just what the latter will do is questionable, and they have assumed an attitude that is not promising. One of them says: "I for one consider that the ticket that was elected is intended by the voters to thoroughly expunge all politics from the school board, and I believe that all the other candidates elected are of the same opinion. Consequently I do not propose to run for any political office."

In the appropriation of the money that will be presented to the council next Tuesday night will probably appear items for the payment of the registrars and judges and clerks of the election who served this fall. A few of the former have failed to properly close up their books and will be required to do so before they get their money, but the salaries of the majority will be allowed at once.

Deaths—Mrs. J. H. Ralner was consumed by fire today, together with four horses, three new buggies, a large quantity of hay, oats and corn and about 500 bushels of wheat. Cause of fire is unknown.

FED THEM ON PLAIN FOOD

Omaha Restaurants Gave Exposition Trade Small Choice of Rations.

COMPLAINT OF THE MARKET GARDENERS

Normal Demand for Vegetables Cut Off by the Rush of Hungry People to the Cheap Caravansaries—Restoration is at Hand.

The peculiar effects that sometimes accompany unusual trade conditions are illustrated by the complaint of the market gardeners relative to the effect of the exposition. The market place has made prodigious strides since it was first inaugurated by the city council and has become an important feature of local trade.

They see the necessity of mills for treating low grade ore, and realize that the only thing lacking is the factor surface and in a position to state that several eastern capitalists are planning for the construction of big mills. One is already in process of erection, with a capacity of 500 tons of low grade ore a day.

Loved by all who appreciate real luxuries. Londonerry Lithia Water appeals to the fastidious because of its delightful flavor and sparkling purity.

Gain for Western Rivers and Harbors. CHICAGO, Nov. 11.—The News-Washington special says: A western man will probably be at the head of the rivers and harbors committee this session, which means a gain of considerable in the way of appropriations for that section. Representative Warren B. Hooker of New York, who is chairman of the committee, has just been appointed circuit judge by Governor Black to succeed the late Judge Green. Mr. Hooker, who had just been re-elected to congress, will resign. The next member on the committee is Cooper of Wisconsin, who, it is thought, will become chairman. He is deeply interested in the west and especially in the deep waterway channel.

State Investigates an Oil Concern. COLUMBUS, O., Nov. 11.—A special from Lima, O., says: The investigation of the Buckeye Pipe Line company began here today. Attorney General Monette is trying to oust the company from the state on the ground that it is a part of the Standard Oil trust. The Solar Refining company will also be investigated. A public meeting will be held here today to show the disapproval of the citizens of the action, as the company pays out millions of dollars here annually.

Employers and Workmen Confer. PITTSBURGH, Nov. 11.—A conference of the window glass manufacturers' union and the Burns faction of the Window Glass Workers' association from the northern, eastern and western districts has been arranged for tonight, when an effort will be made to settle the wage differences. If successful, a general resumption will take place at once, about half the factories in the center are now in operation, many workers having refused to obey President Burns' orders.

Burned by Gasoline. Wednesday, while cooking a gasoline stove at her home, 2125 North Fifteenth street, Mrs. J. L. Thompson was badly burned by the explosion of the stove. She was attended by physician Dr. H. B. Ward, but no report of the accident was given to the police until this morning, when the woman's husband applied to the police to have his wife sent to St. Joseph's hospital. He stated that she was in a precarious condition and feared she was going to die. Mrs. Thompson was removed by ambulance to the hospital. While her condition is serious, it is not thought she will die.

Admission to Exposition Grounds. Since the close of the exposition the admission to the grounds has been 50 cents to all at all times. Yesterday, however, at the meeting of the executive committee, the admission question was brought up and the price reduced. From this date seven cents will be charged 25 cents and children 15 cents.

Differences May Be Adjusted. ST. LOUIS, Nov. 11.—A special to the Post-Dispatch from Virden, Ill., says: Indications strongly point to a settlement between the coal miners and the Illinois Coal company. Edward Cahill, president of the miners' union, has left for Chicago in response to a telegram from T. C. Loucks, president of the coal company.

Navy was Well Supplied. Provisions and Clothing for 103 Vessels Furnished at Time and Place Required. WASHINGTON, Nov. 11.—In an unostentatious way the pay department of the navy played a most important part in the war, as appeared from an annual report of Paymaster General Edwin Stewart. Aside from the mere disbursements of funds in wages and salaries, the pay department is charged with the procurement of all supplies for the navy. The paymaster general says that the outbreak of hostilities found the supply department of the navy organized under a system that for more than eight years had been in process of thoughtful and painstaking development.
