COLONIES AND THEIR PEOPLE

England's Example and United States Policy Contrasted Together.

COMMERCIAL AND POLITICAL CONQUEST

How the British Empire Has Been Built Up and Why This Nation Should Avoid the Policy of Expansion.

With a good attendance present the Young Men's History club found the occasion of its second meeting at the Castell Street Presbyterian church a very instructive one on governmental policy from two points of view, widely different though not necessarily opposed.

The topic for the evening was the "English Colonies." This was discussed at length in an interesting paper by Prof. John Gordon of the Presbyterian logical seminary and it naturally suggested the talk which followed from Edward Rosewater, who had been invited to give his well known views on the expansion craze which has come over the United States since the war with Spain.

The main idea of Prof. Gordon's paper was to show the classification of the English colonies under the three heads of responsible, irresponsible and crown colonies and the diverse methods by which England governs her colonies.

India Prof. Gordon considered the most fascinating study of all colonization movements. It began in 1600 with the incorporation of the East India company, a company of merchants with only \$150,000 or \$200,000, yet it had resulted in appropriating the territory of millions of people.
