

SCHURZ TALKS ON EXPANSION

Addresses Chicago University Faculty and Students on the Subject.

INSISTS THIS COUNTRY IS LARGE ENOUGH

Twenty-seventh Anniversary of the Institution Finds It Possessor of Gifts Aggregating \$403,000.

CHICAGO, Jan. 4.—President Harper of Chicago university announced tonight at the twenty-seventh convocation of the university that gifts aggregating \$403,000 have been made to the institution.

Martin A. Ryerson, president of the Board of Trustees, donated a tract of land adjoining that not occupied by the university. The value of this is \$34,000. John D. Rockefeller had promised to duplicate the gift in cash, thus making \$68,000. Marshall Field of this city gave a tract of land adjoining that given by Mr. Ryerson, and which has been used by the university as an athletic field. The value of this land is estimated at \$135,000. Mr. Rockefeller agreed that when this was given to the school he would give \$25,000 for the building of a gymnasium and the equipment of the athletic grounds. The university has, therefore, received \$156,000 in land value and will now receive from Mr. Rockefeller \$234,000 in cash.

Hon. Carl Schurz made the convocation address, his subject being "American Imperialism." His remarks were a discussion of the expansion idea and strongly against it. He contended that the United States should annex any of its conquests during the war with Spain, and predicted much trouble for the country if it annexed Porto Rico and the Philippines. He said in part:

"Had the famous peace message of the czar of Russia, with its protest against imperialism and its plea for disarmament, reached us a year ago it would have been hailed with enthusiasm by every American... We have claimed only that to our republic, and not to the Russian monarch, belonged the place of leadership in so great an onward step in the progress of civilization."

"But came the Spanish war. A few vigorous blows laid the feeble enemy helpless at our feet. The whole scene of peace and order—without a struggle—was changing us—seemed to have suddenly changed. According to the solemn proclamation of our government, the Philippine islands were to be returned to their original owners as a gift of humanity and not of conquest. But our eyes were turned inward, and the Philippines were left to us. We were to keep them, not to give them back to the people of the Philippines. The Philippines were to be kept, even the Philippines on the other side of the globe, and that as a territorial acquisition. Why not? Why not? What is the career of the republic almost from its very beginning but one of territorial expansion? Has it not acquired Louisiana, Florida, Texas, the vast countries that came to us through the Mexican war, and Alaska, and has it not digested them well? Were not those acquisitions much larger than those now in contemplation? If the republic could digest the others, why not the new? What is the difference?"

Difference in New Acquisitions.

Only look with an unclouded eye and you will soon discover differences enough warning you to beware. There are five of decisive importance:

1. All the former acquisitions were on this continent, and, excepting Alaska, contiguous to our borders.
2. They were situated, not in the tropics, but in the temperate zone, where democratic institutions thrive, and where our people could migrate in mass, and there, in fact, without any special preparation, they could be digested as territories in the usual manner, with the expectation that they would presently come into the union as self-governing states with populations substantially homogeneous to our own.
3. They did not require a material increase in our navy, either for their protection or for the purpose of their defense against any probable foreign attack provoked by their being in our possession.
4. Compare now with our old acquisitions as to all these important points those at present in view.
5. They are not continental, not contiguous to our present domain, but beyond the Philippines many thousand miles distant from our coast. They are all situated in the tropics, the people of the northern races, such as the Anglo-Saxons, or generally speaking, people of Germanic blood, have never migrated in mass to stay, and they are more or less densely populated, parts of them as densely as Massachusetts—their populations consisting almost exclusively of races to whom the tropical climate is congenial—of the people of the islands in the West India, and Malay, Tagals, Filipinos, Chinese, Japanese, Nigrites and various more or less barbarous tribes in the Philippines.

When the question is asked whether we may hope to adapt those countries and populations to our system of government in the tropics, the people of the northern races, such as the Anglo-Saxons, or generally speaking, people of Germanic blood, have never migrated in mass to stay, and they are more or less densely populated, parts of them as densely as Massachusetts—their populations consisting almost exclusively of races to whom the tropical climate is congenial—of the people of the islands in the West India, and Malay, Tagals, Filipinos, Chinese, Japanese, Nigrites and various more or less barbarous tribes in the Philippines.

SOUTH DAKOTA LEGISLATURE

Little Session Has Been Transacted Up to Date.

SENATE COMMITTEE ANNOUNCEMENTS

Complaint in the Governorship Contested Will Be Served This Morning—Talk of Impeachment Fills the Air.

PIERRE, S. D., Jan. 4.—(Special Telegram)—In the house today the absence of yesterday were sworn in and a committee on rules appointed, consisting of Bras, Dwight, Chiesman and Varnum and Peterson of Brookings. A committee of five on compensation of house employees is Harrington, Chiesman, Lien, Pusy and Purdin. A message from the senate declared that body to be ready to meet the house in joint session. The drawing of seats was proceeded with and before this had been completed the senate had adjourned for the day without waiting for the house to complete its work. On motion of Russell the speaker was instructed to add to the committee list a committee of seven as a committee on live stock. A messenger was then sent to notify the senate of the readiness to meet in joint session and reported the adjournment of that body. The house then adjourned.

The senate the only business transacted was the drawing of seats, which were generally agreed to on account of the length of the governor's message it would be received in joint session and not read, but made a part of the Journal; but the action of the senate in adjourning without waiting for the house to complete its work has been taken. A motion for adjournment was not completed that action will, without question, be carried out tomorrow.

While it was definitely announced this morning that the complaint in the governorship contest would be served today, this action was for some reason deferred until tomorrow and it is now reported that the service will be made in the morning. The complaint is a bulky volume of itself, alleging irregularities in many precincts over the state and comprises 1,300 printed pages. The case will be one of the hardest fought of such magnitude in the history of the state. This bill has been brought in the course of the session. The committee on the principal committees of both houses will be announced tomorrow.

Talk of impeachment proceedings has been floating for several days, starting from a populist source, the alleged scheme being to place Kean in the chair until the end of the session. This bill has no foundation and has not been considered by the republicans.

Following is a list of the chairman of important senate committees which will be announced tomorrow: Judiciary, Lawson; Appropriations, Stewart; Ways and Means, Cooper; Railroads, Loomis; State Dispensary, Stiles.

Guaranty Company Refuses Risks.

The refusal of the guaranty company to take risks on elective officers leaves Treasurer-elect Schamber in an annoying situation. While there is no question that he can easily secure the required personal bond, he had hoped to give the greater part of his bond through a surety company, and supposed that all arrangements had been completed for that purpose, when he learned Sunday that the company could not accept risks on elective officers. He at once started for his home to secure the required personal bond, and while he will be in shape to present it within a few days, it will be impossible for him to secure it and return here in time to be sworn in at the same time with the other members of the legislature. Adjutant General Humphrey will attempt to secure at the coming session a sufficient appropriation for the military department of the state, to put the National guard on a better footing than ever before, as soon as it is reorganized, as he expected to be taken as soon as the Dakota legislature turn home, an event which is looked for early in the coming spring.

The question of future measures has as yet received but little consideration, all the time being taken up with the organization. The first measures to be taken up will probably be some measure toward providing for the dispensary amendment and probably the first use made of the referendum amendment will be to submit any bill passed covering the dispensary amendment.

Outside of the secretary of the senate the Black Hills section and the northern counties of the state took everything worth having in the way of appointive positions. The members from the hills section came here with a claim that they were entitled to the position of the populist majority, but two years ago, they were entitled to something good, and made the chief clerkship of the house their special claim. They not only secured this, but also assistant sergeant-at-arms and two good places in the senate.

ROOSEVELT SPEAKS HIS MIND

New Governor Congratulates His State on Its Part in the War.

POLICE SYSTEM MUST BE REFORMED

Administration Will Weed Out Incompetents from the Service and Enforce Honesty and Industry Among Public Servants.

ALBANY, N. Y., Jan. 4.—The state legislature convened today. In the senate the republican caucus nominees were elected. Fred Dixon of Chautauque county was made speaker of the assembly and Archie Baxter of Chemung was chosen clerk. In the senate T. E. Elsworth of Niagara county and James E. Whipple of Cattaraugus county were elected temporary chairman and clerk, respectively. After a brief address by Lieutenant Governor Woodruff the annual message of the governor, Theodore Roosevelt, was read.

The governor's message opens with a reference to the sincerity with which New York responded to the call for volunteers to engage in the war with Spain. "We are Americans," the governor continued, "and the interests of all Americans are equally dear to the patriotic citizen, whether we grow into a mighty nation which, whether it will or not, must inevitably play a great part for good or for evil in the affairs of the world at large, the people of New York wish it understood that they look at all national questions of foreign policy from a national standpoint. The territory we have taken must never be allowed to lapse into anarchy. War is a grim thing at best, but the war through which we have passed, has left us not merely memories of victory won on land and sea, but the even more blessed heritage, the knowledge that it was waged from the highest motives, for the good of others, as well as for our own national honor. Above all, we are thankful that it brought home to us the fact that we are one people, and that we are bound together as one when serious danger confronted it. The men from the east and west, the north and the south, the sons of those who wore the blue and of those who wore the gray, stood shoulder to shoulder through the same hardships and won the same ultimate triumphs."

Commerce of New York.

Governor Roosevelt recommends a continuance of the commission appointed under the preceding state administration to examine into the causes of the decline in the commerce of New York City. It is essential to the state no less than to the city of New York that our commercial supremacy should be maintained. With this end in view the canal should be administered economically and with an eye single to the welfare of the whole people. Any man, whether public servant or contractor, who in any way does not do his duty for the benefit of the people of the state to his private gain must be dealt with as rigorously as the laws will permit."

Governor Roosevelt discusses the subject of state labor laws at considerable length. Under this head he says: "In dealing with the interests of the laboring man, it is essential that the interests of labor we must always keep in mind the fact that ultimately each man's salvation rests mainly with himself, and that no amount of legislation or combination can supply the lack of individual energy and honesty, thrift and industry. Yet this capacity for individual self-help can and should be generally supplemented by that form of self-help that follows on organization and association, has been shown by the careers of many of the trades unions and labor federations, and sometimes even by the success of our regular army. If our regular army is as it should be, increased to 100,000 men, the hard necessity of retaining in the service the volunteer organizations which ought not to be retained will disappear."

"The lamentable result of keeping the guard armed with archaic weapons utterly unfit for modern warfare was shown very conclusively in the late contest with Spain. It is an understatement of the case to say that a single first-class regiment, armed with Krug-Jorgensen's, is worth three regiments armed with a bad powder, single-shot, black-powder piece like the Springfield."

After mention of subjects of exclusively state interest, Governor Roosevelt says: "In New York City, even more than in the state, there is need of cutting down the salaries of certain officials, or forcing others to do more work and of altogether getting rid of yet others. The evils of the police system in New York have become very serious. I may find it necessary to communicate with you again on this matter."

ILLINOIS DEMOCRATS FAVOR BRYAN AND THE VOTE IS A SURPRISE.

SPRINGFIELD, Ill., Jan. 4.—The democratic state central committee tonight declared itself for the Chicago platform and for William J. Bryan. Mr. Bryan was present and made an address, thanking the committee for the personal compliment and congratulating the organization on its declaration in favor of free and unlimited coinage.

EMBERS CHICAGO PLATFORM.

The adoption of the resolutions endorsing silver and Mr. Bryan by unanimous vote was something of a surprise, for it was expected that several of the members of the committee with leanings to the gold standard would oppose any declaration in favor of the platform of 1896. C. K. Ladd, proxy for Ben T. Cable, who is generally regarded as a strongly anti-silver man, voted with the majority and stated that he did so at the request of Mr. Cable.

Aside from the declaration of party policy at the meeting of the committee was of interest because of the contest concerning its organization between the Mayor Harrison and ex-Governor Altgeld. The Mayor Harrison men elected their candidate, Dr. Walter Watson of Mount Vernon being chosen state chairman and Fred Eldred of Chicago secretary.

ILLINOIS LEGISLATURE ORGANIZES.

Franchise Fight and Subjects in SPRINGFIELD, Ill., Jan. 4.—The two houses of the Illinois legislature were organized today, Senator James Warder, republican, being chosen president pro tem of the senate and Lawrence Y. Sherman, republican, speaker of the lower house. The street railway franchise fight began at the first session, three bills on the subject being introduced today.

Governor Tanner devoted the greater part of his message to a discussion of state issues. He referred at length to the much discussed Allen street railway franchise and said more legislation on the subject is necessary. The street railways, he said, should pay their full share of the taxes, according to value, and there should be a reasonable and equitable reduction in street car fares.

Referring to the local mine riots at Pana and Virden, the governor said that the over-production of the mines of the state was responsible for the trouble. He recommended an amendment to the present arbitration law making it obligatory on the part of the contending forces to submit their grievance to an arbitration board.

TERRIBLE EPIDEMIC OF LA GRIPPE

Is Now Raging in All Parts of the United States, Striking Down Its Victims Everywhere.

HIGH AND LOW, RICH AND POOR, GREAT AND SMALL, ARE FALLING, ONE BY ONE.

The Greatest Scourge of the Century Is Feared.

La Grippe has always been a peculiarly fatal disease. Its ravages are not so alarming as diphtheria, or so much dreaded as smallpox, but its number of victims is greater than either.

Silently—invisibly—it gathers in its fearful harvest of precious lives. It does not spread from man to man like a contagious disease, nor does it belong to limited localities like malaria. It is in the air everywhere. It is of climatic origin. No man can escape from it, no woman is safe from it.

La Grippe is epidemic catarrh. La Grippe is acute catarrh excited by peculiar climatic conditions. It sweeps across a continent in a single week, like the blizzard of a winter or the hot wave of summer. It does not depopulate whole villages like the black plague, nor desolate a home like malignant diphtheria, but it counts single victims here and there incessantly, night and day, week after week.
