WOMEN ARE TO TAKE A HAND

May Institute a Boycott Against the Northwestern Railway System.

ALLEGE AN UNJUST DISCRIMINATION

Federation Clubs of lows Declare that Female Clerks Are to Be Discharged in Order to Make Room for Men.

The equal suffragists of Iowa are trying to arrange a boycott against the Chicago & Northwestern Railroad company. The Polk County Equal Suffragist association of Des Molnes has passed resolutions to that end. This was in deference to the request of President Ellen Henrotin of the General Federation of Women's Clubs of the United States. The complaint of the members of the organization is that the management of the company is discriminating against women in the way of employment. The local officials of the road regard the matter rather in the light of a joke and hardly credit the report that the women of that organization are taking the action attributed to them. They admit that if they should do such a thing it might serious. Though nothing officially is known of the alleged discrimination against women by the Northwestern, the report has gained circulation that all women who have not been in the employ of the Northwestern for more than two years will be relieved and men put in their places. The same rumor is to the effect that in future no women will be employed by the company. There is no disputing the fact that in the past a great many women have been employed by the Northwestern system and up to the present the local officials have not heard of any of them being discharged.

General Agent Kuhn of the Northwestern while at beadquarters recently, heard considerable chaffing of female employes on account of the rumored order against future employment of women, but if there was anything to the discriminations it did not seem to be known at Chicago.

When asked what action, if any, the Omaha Woman's club will take in the matter a number of the local members stated that it has not been considered. It is impossible to say how the Omaha women regard the proposition, but one or two of the most prominent figures in the club suggest that they are personally inclined to take the position that Omaha is not directly con-

ATTRACT LITTLE ATTENTION NOW.

Fast Trains on Northwestern and Burlington a Regular Feature.

The fast trains from the east continue to arrive ahead of time in spite of the fast schedule arranged by the Northwestern and Burlington companies. The race, however, no longer attracts much attention among the local railway men, though the eastern railroad world continues to wire daily for information as to the time being made. London officials of railroads ask daily for the time of both trains and seem much interested in the new schedule. Yesterday the Northwestern arrived at 8:10, five minutes before it was due, while th Burlington came in at 7:47, eight minutes ahead of time. The Burlington has arrived at exactly the same minute five times out of six.

Tonight the Rock Island flyer will start on its initial trip out of Chicago for Omaha, with a passenger equipment. This will be made quite an event in local railway circles and will probably mark a permanent break in the implied agreement that

IMPROVEMENTS OF RIO GRANDE

Portion of Line to Be Made Standard DENVER, Jan. 7.-President E. T. Jeffery of the Denver & Rio Grande railway, who has just returned from the east, announces that the company will spend this year \$1,500,000 for new trackage and equipment. Sixty miles of the San Luis valley line will be changed to standard guage, twentyseven miles of entirely new roadbed being constructed. The company has ordered 8,000 tons of steel rails from the Colorado Fuel and Iron company. The Colorado & Southern company has also contracted for thirty miles of steel rails, which will be laid between Witchita Falls, Tex., and Fort Worth.

Work on Union Pacific Depot. Contractor Grace of Chloago, who has charge of the erection of the new Union depot, is in the city looking after miner details of the work. He expresses satisfaction with the progress being made and declares that the work will be completed on time without trouble. Men are rapidly rushing the first story to completion in spite of the very cold weather that has prevailed for so long. While the cold weather has been bad in one respect, in others it has helped the work, other than that requiring the use of mortar. As soon as the work is far enough advanced, a much larger force of men will be employed. Mr. Grace says everything is proceeding in a very satisfactory manner. The trouble threatened at first with the labor organizations has passed without work being suspended in any department and all lines employed on the job appear to be satis-

Addition to Riverview Park. The residents of the South Side will hold a mass meeting at Mueller's hall on Vinton street next Friday evening to discuss the addition of the Murray property to Riverview park. At the regular meeting of the South Side Improvement club Friday night the report of the Board of Park Commis-sioners, which favors the condemnation of thirty-two acres, was discussed and the general expression was in favor of appropriating the entire sixty acres. The matter was laid over without action until the larger meeting next week. Councilman Stuht, David Cole and E. J. Cornish were appointed as a committee to get out a full representation of the south side taxpayers at the mass meeting.

CONVENTION FOR NEBRASKA

Effort Being Made to Bring the National Creamery Butter Makers' Association Here Next Year.

The dairy men of the state will make a strong effort to secure the next convention of the National Creamery Butter Makers' association for Nebraska. Looking toward this end an association has been formed and a committee appointed to carry on the work. This year the convention meets at Sioux Falls, S. D., and the committee is doing its utmost to secure a large attendance of the Nebraska butter men. "The general public has very little idea

of the vast proportions of the butter and egg industry of this country," said George M. Weaver of the committee. "There is more money invested in eggs every year has held so long by which fourteen hours | than in grain and the investment in minbetween Chicago and Omaha should be the erals is not so great as in butter. We are fastest time made by a passenger train on going to make an attempt to bring this convention to Nebraska next year. Nebraska is one of the great dairy states and it is about our turn. I was at the convention held at Topeka last year and it opened the eyes of a great many people as to the butter and egg business. There were more than 3,509 delegates last year, but I expect there will be nearer 5,000 at Sloux Falls for this convention. New York will send over 100 men, Chicago will have more than 200 and the representation from Minneapolis, St. Paul, Boston and Philadelphia will be large. There is no reason why Nebraska should not have the convention next year and we mean to make every effort to secure it."
