Afflicted Persons Take No Precaution to Prevent Spread of Disease.

ACTION OF ERNEST PEYCKE CRITICISED

Daughter Shows Symptoms, After Which the Father Takes His Child and Goes Out Among the People -Vaccination Orders Issued.

The smallpox situation in Omaha has be come decidedly serious, and the physicians of the local health department make no concealment of their apprehension that an epidemic of considerable extent is impending. There are four known cases of the disease in as many different sections of the city, and at least two of these have been either unknowingly or knowingly exposed. sufficient to make it very probable that other cases will be reported in the near future. The only ray of comfort that the health department can extract from the situation is that the disease is as yet of comparatively mild form-varioloid. The health icials are taking energetic efforts to prevent the spread of the disease. Superintendent Pearse has issued a general order, requiring all school children to be vaccinataed as a requirement for attendance at the public schools.

The following are the cases that are re ported and are being cared for under the direction of the city authorities: The Mc-Coy family, on the far northern end of the Florence boulevard, reported a couple of weeks ago; the Newton family, 3924 North Twenty-eighth avenue, about a mile southwest of the former case, reported Sunday the 18-year-old daughter of Ernest Peycke, 213 South Thirty-sixth street, reported Monday: Peter Kennedy, 1214 South Sixth street, reported Tuesday.

Next to the anxiety caused by the report of the new cases of the disease the city physicians are most mentally disturbed by the actions of Ernest Peycke in connection with the case in his family. Mr. Peycke has taken steps to avoid the disease and to escape quarantine in a manner that the physiclans 'do not hesitate to declare criminal, and they threaten to make it warm for him in case that they can locate him

### Peveke Leaves Town.

The afflicted member in the Peycke household is the 18-year-old daughter. She has been ill for a short time and on Saturday the rash of the disease broke out upon her. Monday the disease was declared to be smallpox and Mr. Peycke and his little son left the house. Where the two have gone, neither the family nor the physician will tell. At the office of Pevcke Bros., inquirers are told that Mr. Peycke has gone out of the city. If he is located in the city the health officers say that they will take energetic action against him: if he has left the city, they are powerless.

Monday Mr. Peycke ordered a telephone to be put into his house and was very anxious that it should be installed during the afternoon. Not knowing that a case of smallpox existed in the family, the telephone company complied with the request and a man was set to put in the instrument. This employe of the company will be closely watched and if any symptoms of the disease should appear he will be isolated.

In the Kennedy case, a number of people have been in contact with the victim, but unknowingly. Kennedy has been sick for a couple of weeks, but he thought that he was afflicted with chicken pox and had no medical attention. A physician accidentally discovered the nature of his disease when he was in attendance on another patient in the same house. Since Sunday the city physicians have found that a dozen different people have been in close contact with Kennedy, many of them children, and these per-

sons baye been put under surveillance.

T. J. Mullen. This was, according to the complaint, sold to him by I. Schwartz. Fried holds that the officers went to his place at 2403 Leavenworth street and took coffee from the bins and filled sacks with it. He says it would be impossible for an expert to select coffee under similar circumstances, because the bins contained different kinds. He insists that he has been guilty of no wrong-doing. His attorney, Jeffries, raised the same point concerning the search warrant as was emphasized last week in the gambling cases-that is, that the warrant must set forth the exact location of the building to be searched, the floor of the building and the city and county in which it is situated. In the gambling case Judge Gordon held the point well taken, denied the writ and ordered the return of the tables, cards and chips which had been confiscated at the time the gamblers were arrested.

, Tuesday afternoon Attorney Jeffries insisted upon taking up the complaints upon which Fried's two stores had been searched. Judge Munger then sentenced Brown to of the search warrant. This meant the removal of all the ma-

terial evidence against Fried. Deputy County Attorney Thomas protested, but an order was written by Mr. Jeffries informing the police that they should turn over his property they had taken. This order was disobeyed by Captain Donohue and the court was about to cite him to appear to answer to the charge of contempt when the captain three years at Sloux Falls in addition to a changed his mind. The coffee and sugar fine of \$100 and costs. Roben is 73 years were delivered to Fried and he was permitted to place the sacks in his wagon. Then he was rearrested and the two men. ### Vaccination to Be General.

The cases in the Peycke and Kennedy familles are connected. Kennedy was an employe of Peycke Brothers and had the discase two weeks ago. It is believed that the Peycke girl got the disease from him when she visited the firm's establishment. How Kennedy got the disease is unknown, but it is believed that he brought it to the city. as he was in the employ of the Peycke Brothers but a short time. Other employes of the firm were in contact with him.

The children of both the Peycke and Kennedy families attended parochial schools and these institutions have required that the other pupils must be vaccinated. All public school children must also be vaccinated. As a precaution, City Physician Spalding requested Superintendent of Schools Pearse to issue a general vaccination order. the latter immediately complied. No child will be allowed to attend any public school of the city unless he or she presents a certicate of vaccination from a physician. Children who cannot afford the cost of vaccination will be vaccinated at the expense of the city.

While the situation is serious, City Physician Spalding does not believe that a pest house is as yet necessary, although he has made arrangements for one. Regarding this, he mays:

"All the cases so far reported are of mild form and can be properly cared for in the homes. We have been able to sufficiently isolate them. In case that it is necessary to remove any person from his or her residence, however, I have made arrangements to secure a smallpox hospital or pest house upon twenty-four hours' notice.

The auditorium committee has decided to ask the public to send propositions for sites for the structure to H. H. Harder. The limit of the boundary in which the site must be located is as follows: Capitol avenue on the morth, Howard street on the south, Tweifth street on the east, and Twentieth street on the west. The east, and Twentieth street on the west. The site must occupy a half block, or a tract of land 132x264 feet. The propo-sitions will not be made public, but are to be submitted to the general committee charge of the project for action.
