COUPLE SUDDENLY DISAPPEARS.

No Known Reason Why They Should Have Gone Away.

SIOUX CITY, Ia., Jan. 27 .- (Special.)-There seems to be considerable mystery about the disappearance from Sioux City of Mr. and Mrs. Rupert Kurtzreiter. The police are looking for them, and so are their relatives and friends. Just why they have eft so suddenly no one can explain. They eft no debts, and so far as known they had had no trouble. When last seen at their cosy little home they seemed to be perfectly happy and did not appear to have a rouble on earth. They were only wedded December 31 at Correctionville, Ia. hey came to Sloux City, where the husband had employment and rented a house. The first thing known of their going away was when their landlord received a note from the man saying he could take possession of their house, as he did not need it any longer. The landlord was told he could take the furniture and other belongings and he could sell them if he could get anything out of them. But just before they left Sioux City, their relatives in Yankton, S. D., received a letter from the bride saying they would 'great falsehood." No intimation was given as to what this meant, and neither did they say where they were going. The science of osteopathy was discovered by Dr. A. T. Still of Kirksville, Mo. Dr. seeks to avoid. Westrope died last spring is health; and disease is the effect of local or general disturbance of the blood; that to excite nerves causes muscles to contract and compress venous flow of blood to the heart, and the bones could be used as levers to relieve pressure on nerves, veins and ar-

teries. A slight strain or a sudden jolting may easily cause a displacement of bone, muscle tendon or organ, and a consequent pressure on the nerves, thus breaking the nerve wave between the brain and the part injured. and we then may have as a result any of the numerous ailments caused from lack of nerve supply to parts. Seldom is there permanent cure until the machinery is righted. Hence we treat headache (all kinds), weak eyes, catarrh, hay fever, enlarged tonsils, goiter, asthma, bronchitis, deafness, irregularities of the heart, neutalgia or rheumatism (of any part), spinsi curvature (all kinds), dislocation of joints, all kind of stomach, liver, kidney, bowel and spleen troubles, bladder and urethral troubles, uterine, female irregularities, as painful, suppressed or excessive menstruaion, leucorrhoea, milk leg, etc.
