was something admirable in his fighting in that everything that fell to the lot of the navy was done quietly, without confusion and with absolute success.

In the army it did not. It must, in all cases, be admitted that the work of the War Department was much the heavier. It had to multiply the army twofold and it had to do so quickly on a large scale that it had only the barest of time to do so.

Woman's Pains

and woman's ill would fill a whole page of this paper if we attempted to describe them. Poor Woman! Truly she has much to bear. The burden of living falls heavily on her. The suffering which motherhood entails, the pain, the weakness, the loss of blood, which the necessities of modern life impose on her frail frame, are sometimes almost unbearable. The torturing duties which are thrust upon the poor woman are too often the cause of dangerous chronic diseases.
