KEARNEY, Neb., March 10 - (Special Telegram )- The ice is giving way in the Platte river under the influence of the warm weather and considerable damage is being done by the drifting cakes. This afternoon the floating ice was caught in a jam, choking the stream, and the cakes following behind piled upon the blockade, rendering the mass formidable and dangerous The weight of the cakes in the rear finally orced the gorge free and it descended with reat force.

The combined mass of ice crashed into the Platte river bridge connecting Buffalo nd Kearney counties and the structure totered. With the exception of one span the bridge withstood the strain. A length near the center, however, gave way, leaving a chasm in the bridge about thirty feet in

### "Two Heads Are Better Than One."

One, however, is the portion allotted to the average mortal. If this one aches and will not work properly, it is worse than none. When this condition is present, the stomach is blamed, the kidneys come in for censure and the liver is sure not to escape. As a fact, the blood is solely responsible for the condition of these organs.

Let your one head dwell on this fact, because it is the leading point in life and health. The natural blood purifier and tonic is Hood's Sarsaparilla. It has been "tried" and never "found wanting." It never disappoints.

That is the class of farmers that usually have their crop mortgaged in advance or are compelled to sell at once upon harvest-In nine cases out of ten they haul their grain directly from the thresher to the elevator, and the minute it is unloaded into the elevator it loses its identity. Consequently no lien could attach to it. It would be impossible for the thresher to file a lien upon each load as fast as threshed, hence he will find the proposed protection no protection at all from the class of farmers who are in the habit of beating him. Farmers who are able to store their grain pay their threshing bills, as they are financially responsible and can be forced to do so.
