Weather Affects the Ienn and Steel Output-Exports of Wheat Do Not Pall Below Last Year's Pigures.

NEW YORK, March 19 .- R. G. Dan & Co.'s Weekly Review of Trade will say to-

By far the best assurance of good business in the enture is found in the general rise of wages. The general advance in carnings of cotton mili operatives, in bost cases to per cent, of iron any steel workers, generally 10 per cent, and tipplats and sheet workers, from 5 to 10 per cent, and of coal miners in some large districts, about as much, has set a pace which most catablishments will follow which have reduced wages in the last years of depression.

Those who fall to comprehend what such

a change may mean have only to consider that a tenth increase in the wages of all labor would put into the markets a new buying demand in amount about three-quarters of the entire value of exports to all ters of the entire value of exports to all countries. The volume of business shows no signs of decrease and for the first full week of March has been about 51.7 per cent greater than in the same week of last year and 60.9 per cent greater than in 1892.

Most people would not expect the production of pig iron to be affected by the weather. Yet in the Pittsburg district alone the furnaces running are said to have prothe furnaces running are said to have produced 13,000 tens per week less than their January output, so that the decrease in weekly production of all furnaces, 228,191 tens March 1, against, 237,639 tens February does not mean anything more than had weather. The shrinkage of supplies of Iron weather. The surfixinge of supplies of iton in February, just when increased supplies were expected and needed, contributed much to the extraordinary advances in prices, \$2.75 in anthracite No. 1. February 1. \$2.50 in Bessemer pig at Pittsburg and \$2.75 in grey forge. The unsold stocks were also reduced in February 46.413 tons, so that the apparent consumption was 977,979 tons in the short month. Nearly all the work in the short month. Nearly all the work done, of course, is at the comparatively low prices made in the great contracts three to four months ago, but the three works still able to contract for early delivery are charging what they please, and these quotations appear in the published statements. In many cases \$1 to \$5 per ton premium In many cases \$1 to \$5 per ton premium, is paid for delivery within sixty days. Plates are in especial demand and higher, but in rails, cars and structural forms the demand and prices are not yet much changed. Tin is firm at 23.85 cents, with consumption of 2,500 tons monthly, and copper is scarce at 17.75 cents, with lead layer at \$4.00. lower at \$4.50.

The trust refuses quotations for tin plates. The demand for coke exceeds the exporting capacity of the Connellsville region, but the formace being quoted at \$1.60 and foundry output has been 168,679 tons for the week, The woolen manufacturers have been

hampered with doubts about the price of wool. A big combination of worsted producers has been formed, with several other combinations proposed in goods of other kinds, but these do not encourage buying and the season continues disappointing. In wood markets sales are barely equal to the ordinary consumption of the mills dependent upon them, but prices are rather Cotton goods have been advanced about 4 per cent during the last month and are still rising, although the advance in

raw cotton has stopped.

Exports of wheat do not fall below last year's, as many have for some months expected, and the Atlantic exports, flour in-cluded, inve been for the week 3,309,092 bushels, against 2,899,879 bushels last year and Pacific exports 603,187 bushels, against 1,280,516 bushels last year, with other exports of 407,569 bushels.

Western receipts were 4,071,017 bushels, against 2,752,915 bushels for the same week last year and the output from the country goes far to check apprehension as to the deficiency of the crop. The price is about 2 cents lower for spot and corn is about 1 cent lower, with western receipts 4,559,404 bushelss, nguinst 5,487,203 bushels last year, while exports have been for the same week 3.537,887 bushels, against 2,957,851 bushels

Failures for the week have been 182 for the United States, against 248 last year, and thirty-seven in Canada, against thirtysix last year.

BRADSTREET'S REVIEW OF TRADE.

Industrial Activity is Still the Pre-Eminent Fenture. NEW YORK, March 10.-Bradstreet's tomorrow will say:

Industrial and trade activity is still a pre-eminent feature of the general business situation. Price strength, too, is notable, especially in view of the midwinter rise of Pebruary, except in the case of the leading cereals and wools.

In manufacturing lines the situation is one of great activity. Additional advances in wages announced this week seem likely to swell the number of workers whose wages are reported advanced close to 175,-The iron and steel trade is excited by feverish demand, inadequate supplies and further advance in the quotations. Shut-downs for repairs and other reasons have reduced the pig iron output materially and current production is said to be considerably below that of January 1. The number of old furnaces being furbished up and out in operation is steadily increasing, but the effect on production is not yet very marked The easier tendency in wool is one of the disappointing features of the week, the outgrowth particularly of unsatisfactory demand for men's wear goods, but also a reflection of reports of projected combinations In the finished goods trade. The demand for cotton goods is very active and not advanced to the same extent as the cruder makes. Cotton remains steady and the re-duced movement at the south is making the minimum estimates the more fashionable.

Lumber is active at most of the markets
and prices are firm because of well cleaned
up stocks. Raw and refined sugar have
altke moved upward, partly because of unfavorable Cuban crop advices and also in sympathy with the improvement going on in European beet markets. Refined has been marked up, notwithstanding the trade war now going on. Wheat is weaker, notwithnow going on. Whent is weaker, notwithstanding crop damage reports, and other cereals are in sympathy, chiefly because of
the growth of bearish views of supplies
held by farmers and a tendency to discount
the generally expected heavy government
estimates of wheat in farmers' hands.
Reports from leading markets east and
west are of an active spring jobbing demand, particularly for dry goods, but shared mand, particularly for dry goods, but shared in by clothing, shoes and other staples. On the Pacific coast business is fairly good.

except at San Francisco, where general trade is below the average, owing to uncer-tainty regarding the crops. Wheat, including flour, shipments for the seek aggregate 4.398.821 bushels, against week aggrogate 4,398,821 bushels, against f,815,586 bushels last week, 4,484,761 bushels in the corresponding week of 1898, 1,599,482 bushels in 1897, 2,041,209 bushels in 1896 and 2,791,160 bushels in 1895. Since July 1, this season, the exports of wheat aggregate 173,111,755 bushels, against 168,941,514 Corn exports for the week aggregate 3,- critically ill with erystpelas in this city.

It has been given out from department headquarters that the War de-Bellingham's Ruy Lopez on the ninth board against Neuman was a success. partment is desirous of recruiting for the cavalry service in the Philippines and also Twenty-eight moves were made on this

On the tenth table the Spanish game was played by Baird against Trenchard. At first the Britisher had decidedly the better position. In the middle game stage, however, the American played good chess and evened up the position. Thirty-three moves

were recorded. It will thus be seen that the chances unwarrantable interference with the city and state governments, infringing the principle for the Americans winning the contest and the trophy are very bright, and only a miracle seems to be able to save the Britishers from disaster tomorrow.

At the Other End.

LONDON, March 10 .- Between 200 and 200 persons were present at the Hotel Cecil this afternoon at the opening of the fourth international table chess match between the eading players of the United States and Great Britain. Cordial messages were received and exchanged between the players here and the Brooklyn Chess club and a

feeling of great satisfaction prevailed. The all-round strength of the American play was recognized. Great interest was aken in the contest between Locock and Johnston. Locock's Ruy Lopez development was considered ugly, but the spectators quickly recognized his weakness in failing with his queen toward the end of the game. Mortimer and Gunsberg early reached the conclusion that the British had lost the game. Marshall's steady play was recog-

The contest, as were the three previous ones, is being played for a magnificent trophy presented by Sir George Nawnes, president of the British Chess club.

KID'S BROTHER SAVES HIM Referee McDonald is Forced to Give Decision to Smith on a Violation of Rules. SAN FRANCISCO, March 10.-Billy La-

vigne, brother of "Kal" Lavigne, jumped into the ring in the fourteenth round of the Smith-Lavigne fight tonight and Refered McDonald was forced to give the decision

Smith-Lavigne fight tonight and Referes McDomald was forced to give the decision to Smith.

The end came so suddanly and unexpectedly that the big crowd was for a time at a loss to understand the situation.

The cause of Billy's action was that George had received a couple of solid blows from Smith on the jaw and was parpably rattled and somewhat groggy. His brother seeing his condition and fearing a knockout, out of brotherly sympathy and family pride jumped through the ropes and placed his arm about his brother's shoulder, declaring he would never see George humiliated by a knockout. As this was a clear violation of the rules Referee McDonald had no other alternative than to decide in favor of Smith.

While Lavigne was getting the worst of the mixes he was not out of it, and might have stayed through had his brother not interfered. In the very beginning of the fight Smith violated the agreement not to strike in the clinches, fouling repeatedly. He was warned again, Referee McDonald finally telling him if he violated the rules he would give the fight to Lavigne.

After this Smith was more cautious, but both struck in the clinches throughout the fight. Lavigne had the advantage by a slight margin up to the final round. He did all the leading and while he did not break ground readily, he waited for Smith's leads and count red hard with rights on the body, giving particular attention to the kidneys,

is a preparation of the Drug by which its injurious effects are removed, while the valcable medicinal properties are retained. It possesses all the sedative, anodyne and antispanmodic powers of Oplum, but produces no sickness of the stomach, no vomiting, no costiveness, no headache. In acute nervous disorders it is an invaluable remedy, and is nended by the best physicians.
