## THE OMAHA DAILY BEE: FRIDAY, MARCH 24, 1899.

Wireless Telegraphy.

left of the supposed center line of the beam.

This fact might be applied to the guidance

of ships in thick weather. With reflectors

I have not sent signals more than two miles.

The most attention has been given to the

vertical wire system, but I am of the opinion

that it is possible to go much further in

this way. Between Alum Bay and Bourne-

mouth and later between Poole and Bourne

mouth, distances fourteen and eighteen

miles, respectively, signals have been regu-

larly exchanged, and the experience of four-

teen months showed that no kind of weather

in England could stop the working of the

apparatus. One of the most interesting and

valuable experiments was the installation

fitted up last autumn between the royal

the prince of Wales' illness. This gave op-

set at rest as to the possibility of tele-

even more trustworthy than land wires."

Apparatus Used.

The following is a description of the ap-

paratus used by Signor Marconi in his

wireless telegraphy experiments: At the

transmitting station a vertical wire is sus-

pended to a pole, balloon, kite, or other

lofty object, the upper end being insulated.

The lower end is connected to one of the

brass balls, and to one of the secondary

terminals of the induction coil. The other brass ball is connected to the other second-

ary terminal of the coil and to earth (or, in

tion Society's Promises.

NEW YORK, March 23 .- The twentyseven colored families, numbering 104 persons in all, who are stranded in Jersey City, after having come from the west to go to Liberia, as is alleged; under a contract regard is the sale of two steel steamers, the with the International Migration society, were notified today by the Central railroad of New Jersey that they would have to leave the railroad cars in which they have remained since their arrival in Jersey City. It is claimed that the International Migration society promised to send these people to Liberia and that they have failed to carry out the promise. Most of them are destitute and their condition is pitiable.

Mysterious Struggle Ends in Death. CLEVELAND, O., March 23.-Joseph Hausman, 48 years old, an employe of the Varlety Iron works, was found in a dying pany of the other five steel steamers of the Wolvin fleet that are known as the Zenith at his boarding house, No. 694 Scranton avenue. Blood was spattered about in all directions. There was evidence that a desperate struggle had taken place. Everything within
