Short Stories at Unity Club.

The literature section of Unity club spent

profitable evening at the residence of Wil-

am Wallace Friday night in the considera-

tion of "The Short Story in Europe." The papers were carefully prepared and sug-

gested a very interesting discussion on the development of the short story and the

respective merits of the writers who have achieved the most distinct successes in this field. The program was introduced by an interesting paper on Rudyard Kipling by William Wallace and then Mr. Chatelain dis-

william Wallace and then Mr. Chatelain dis-cussed Guy De Maupassant. Carl Heinrich read a very entertaining paper on Tour-gueneff and this was followed by a general discussion, in which most of those present participated. At the close of the program it was announced that James Wallace Broatch will have charge of the section dur-ing the part was when a similar like of

ing the next year, when a similar line of work will be followed.

Women Under Arrest.

Anna Andrews, 1120 Jackson street, and woman named Mrs. Over were arrested Fri-day afternoon charged with drunkenness and disorderly conduct. The Andrews

woman was detected meeting men at a re-

both her husband and herself. Andrews, who is a teamster for Johnson Bros. Trans-

fer company, says that a package of mort-gages and certificates of deposit in banks to

the amount of \$800, representing his savings for eight years, is missing and he is afraid

#### FLOOD SUFFERERS WANT CORN

best manufacturers of the country.

Two Million Persons Are Starving and Freezing at Chee-Foo, China.

APPEAL FOR HELP THROUGH OUR CONSUL

Interior of Country in Pitlable Plight Because of Yellow River Floods-Shiplond of Corn Would Save Thousands.

WASHINGTON, March 24 .- Citizens of the United States residing in Chee-Foo, China, pirez, who succeeds the late Senor Romero, have made an earnest appeal through Con- arrived in Washington today. He left Mexsul Fowler at Chee-Foo to the charitable in ico City on the 11th, stopping at El Paso America and elsewhere on behalf of the and St. Louis, where he was handsomely sufferers from the appalling Yellow river entertained by the commercial bodies and floods of this year.

These floods have been described by the natives as "China's sorrow," and the petitioners state that never before was the distress so great and heart-rending as now. The most conservative estimates place the number of starving at 2,000,000, and time of his credentials. and the increasing cold weather will undoubtedly augment the distress. The petitioners say that they are daily, almost hourly, in receipt of reports from their countrymen in the interior depicting the condition of the famine refugees, hundreds of villages are submerged, cities surrounded by water, homes, furniture, clothing, in fact,

everything is under water or destroyed. The natives themselves are living it straw huts, many have absolutely no shelter from the winter's cold and snow, subsisting on bark, willow twigs, etc. The summer's crops have been a failure, the seed for next spring's sowing is gone, and there is nothing for these starving millions to hope for in the future.

The committee writes: With our knowledge of the terrible winter prevailing, we venture to call upon the charitable in our home land to assist us in trying to alleviate at least a portion of this

#### Shipload of Corn is Wanted.

Therefore, we shall be glad to receive contributions of money and corn. We earnestly beg the merchants and others on the Pacific coast to contribute a steamerload of corn. The natives of Shan-Tun, unlike those south, subsist on this corn, and we believe that if the grainmen of the west will ship to the United States consul at Chee-Foo, direct from the Pacific slope, a steamer loaded with corn, it will not only be the means of saving thousands of lives, but of opening a market of from 25.000,000 to 30,000,000 consumers later on, as under normal conditions American corn can easily compete with native The new route will run from Valdez through and if corn be sent it is guaranteed that it Copper Center, Slanah Tetling, Seward and will be distributed under the direct and personal supervision of Americans residing in or near the submerged districts.

We ask fer money to be sent to the United States consul, with which food and clothing can be bought, and we guarantee a strict ac-Tun is particularly interesting to American vide sufficient relay stations, reindeer, dog

#### "Ignorance of Law Excuses No One."

This maxim applies with especial force to ignorance of the laws of health. Every man and woman of intelligence knows the physical fact that the blood reaches the remotest parts of the human body. If there is a disturbance anywhere, why should one ignorantly suppose that the seat of the malady is local?

Is it not more rational to suppose that the impure condition of the blood is doing the mischief, as it is? Experience has demonstrated the fact that this is the case in 95 per cent. of complaints.

If your "life's blood" is pure, nature
will take care of the rest. Hood's Sarsaparilla enables you to cleanse your blood of all impurities and make it strong

and wholesome. It never disappoints. Scrofula - "I am 77 years old and owe my good health and steady nerves to Hood's Sarsaparilla, as it cured me of scrofula, rheumatism and catarrh. It has prolonged my life." JAMES BROWN, 83 East View Ave.,

Debility - "I was weak, run down and nervous. Severe pains in kidneys, with heart trouble. Hood's Sarsaparilla made me strong and new. It is an honest medicine." Charles Hendershor, Amsterdam,

Biotches - "My face used to be covered with pimples and blotches and I suffered from continuous headache. Hood's Sarsaparilla quickly removed the cause and my face is smooth. Have no more headache."

F. H. SEIBERT, HAMMOND, Ind.

Catarrh — "Many years suffering from catarrh makes me appreciate Hood's Sarsaparilla which cured me; also of indigestion and kidney trouble. It gave me strength and good appetite." Mrs. O. J. Phillips, Pontaic, Mich.

Weakness-" I bless the day I heard of Hood's Sarsapartlia as it cured me of extreme weakness after grip, built my husband up after pneumonia, cured eczema and blood poisoning in our children." Mrs.

only cathartic to take with Hood's Sarsapartila.

EXPANSION OF INDUSTRIES Wilmington, Del...

or Stock Fluctuations.

IRON AND STEEL TRADE IS STILL BOOMING

Production Generally in All Lines Increases Rather Than Decreases -Grain Markets Are Stronger.

NEW YORK, March 24 .- R. G. Dun & Co.'s Weekly Review of Trade will say to-

Business is not frightened either by the great capitalization of new companies or by the wild fluctuations in Wall street. No matter how much the stock operations in New York may count, the business else-where is large enough to warrant a large expansion of industries, and that is the thing most important to observe. In no considera-ble branch has production diminished, but in practically all it has been increasing dur-ing the last week.

In iron and steel a little lower price for Bessemer pig appears at Pittsburg, with Gray Forge 75 cents higher there and southern iron at Chicago 50 cents to \$1 higher. There is no market for billets, as no works east or west can furnish them at present, but quotations range in price from \$25 at Pittsburg to \$27 at Philadelphia. In finished products the condition is the same. Rails can be bought at \$23 at Pittsburg and \$24 at Chicago, if at all, but small lots have been sold at \$26 at New York. Chicago is taking many contracts for building in Boston, New York and Washington, amounting to 4,000 tons, but makers elsewhere are overcrowded with work. No market can deliver plates within any reasonable time and Pittsburg works are sold to July on sheets-\$2.40 there, \$2.65 at Chicago and \$3 at Philadelphia is paid. Plate mills are all full and there is comprising 118 adults, scattered all over this paid. Plate mills are all full and there is vast province, and to whom we look to assist heavy demand at Chicago for bars, with one us in distributing such relief as we may re-geive. Probably in no other place in the are steadily growing stronger. Minor metals world, and probably not in this generation, are all weaker with the reaction of London are all weaker with the reaction of London speculation, though copper has declined to 17 cents here and is yet so much above Lon-don that exports have been stopped for the week. The February output both here and in other countries was greater than in last year's monthly average, although February is a short month.

Wool is at the doubting point, with large sales ordered from the interior by tired holders and some concessions made to se-cure transactions at Philadelphia and Bos-ton, though quotations show only a moderate lecline and sales at the three chief markets

are almost as large as in 1892. Manufacturers make many inquiries, but the prospect of combinations is potent to hinder transactions. The goods are in rather better demand than a year ago, but no large class of mills can claim to be fully employed. The demand for cotton goods is still strong, but this week has not materially advanced prices. Cotton is decidedly weaker, though many believe that short supplies will in time insure higher prices, but mill and commer-cial stocks are about 600,000 bales larger than last year abroad, and mill stocks here must be heavier, because the mills are buying very little, although crowded with work while the commercial stocks here are quite

stronger, for although western receipts for the week are 3,359,000 bushels, against 2,557,666 last year and for three weeks 2,900. 000 bushels larger. The exports, flour in-cluded, have been for the week at the Atlantic ports 2,290,467 bushels, against 1,824, 569 last year and from Pacific ports 824,183 and his life was almost the counterpart of bushels, against 1,371,860 last year, other the hero of "Uncle Tom's Cabin." He was exports being 350,920 bushels. It is not possible to ignore the importance of so great a demand extending beyond the middle of March, and sober traders realize that it means a heavier outgo than has yet been expected. Western crop estimates are large and such reports as appear of the condition of wheat for the coming year are on the WASHINGTON, March 24.—An all-American mail route in Alaska, from Prince William's sound to Circle City, through the Copper river region, has been determined south and the knowledge that stocks on hand re large enough to meet the demand. Failures in the United States are ngainst 251 last year, and twenty-four in Canada, against twenty-one last year.

Grape-Nuts §

Ask your grocer for the new food.

~~~~~~~~~~~~~ A famous woman in Chicago says: "I am so much in love with Grape-Nuts that sort, 1319 Jackson street, by her husband I presume I often bore people telling them and after his refusal to live with her any about the new food. You certainly will longer she went to their home and demol-make an everlasting fortune from the sale ished all the furniture, threatening to kill about the new food. You certainly will make an everlasting fortune from the sale of Grape-Nuts. The article is destined to become the best known cereal on the mar-

It can hardly be called a cereal, for is not like the common rolled wheat or rolled cats, but it is in the form of granules, his wife has destroyed them. ranging from the size of a pin head, up to twice or three times that size.

It is thoroughly cooked at the factory and requires no preparation whatever, but can be served instantly with hot milk or hot to two very entertaining lectures on "The cream to make a hot mush, or cold cream Energy and of Fuel. Water and Steam."

The subject had been divided between John a very delicious crisp food is the result. Not only is the taste fascinating, but the Not only is the taste fascinating, but the nutritive value of the food is very great, as shown by the improved condition physically and mentally, of those who use it ten lost from coal and giving the reasons for the days or two weeks.

coal contains engineers have not as yet been able to get more than 8 per cent of it. The rest of the energy is wasted. The subject was very ably handled and the speaker gave evidence of a thorough knowledge of the

Mr. Anderson spoke of the energy of water and steam and explained how so much of it was lost through incomplete combustion. He told of the different methods that had been invented at different times to make the combustion more complete. Of these he only knew of one that had attained success. This is the system invented by Captain Reynolds of Omaha, the engineer for the water com-pany at Florence. The association is doing good work in the instruction of young engi-neers, who are enabled to receive the benefit of the experience of the old and practical engineers of the city.

ENLISTING VOLUNTEER IMMUNES. Department's Ruling Regarding Serv

WASHINGTON, March 24.—The War de-partment has been asked if the volunteers (immunes) could be enlisted in their entirety. It is said some of these regiments desired to be sent to the Philippines. It reply the department says such enlistments cannot be made.

The temporary re-enlistments provided for under the army law are to be made from volunteer troops now serving in the Philip pines who will be subject to immediate muster out as soon the ratification of the peace treaty is proclaimed. It is expected that General Otis will organize a brigade or more of these men. The organizations will be entirely new and no semblance of the former state regiments will be maintained. It is possible that some of the volunteer officers of the state military, who have shown great aptitude in military matters, will be given commands in the temporary \*Not included in totals because containing other items than clearings, \*\*Not included in totals because of no comparison for last regiments to be organized in the Philippines. These new regiments will not be kept in service very long, unless the situation in the Philippines becomes much worse. The WEATHER RETARDS DISTRIBUTION. belief is expressed that this is not likely as the reports from General Otis for a week or ten days have indicated an early collapse of the rebellion in Luzon. # Paine's Celery Compound.

STRONG

[PHOTOGRAPHED BY GLINES.]

HARVARD'S

Strong muscles and strong nerves go together.
Carl G. Herbert is the best developed man at Harvard today, according to Dr. Sargeant, the university's professor of physical culture and director of the gymnasium.
Mr. Herbert believes Paine's celery compound to be the most wonderful preparation to the world for strengthening the body and enabling it to withstand great mental and physical exertion. He has consented to the publication of the following letter:

CAMBRIDGE, Mass, Jan. 16, 1899. Wells, Richardson & Co.-I feel constrained, owing to the benefits I have derived from your incomparable remdey, Paine's cellery compound, to write and tell you in what manner I have been benefited by it. As you are doubtless aware, an athlete's success is due very much to his condition or form, and that perfect condition or form depends much on the condition of his stemach. I fe el, and know by experience, that Paine's celery compound is the ideal remedy for that purpose, as it not only strengthens the nervouus system, which i s so essential to good health, but we find that it regulates the entire system and renders it in a condition to withstand either great mental strain or physical exertion. I stand, at present, at the head of the list of the Sergeant test of Harvard college, and am about to compete again this year. As a preliminary to the actual training I have taken two bottles of Paine's cellery compound and know that with its aid I shall beat my own record this year, as I am now able, with no other training, to lift many pounds more than before I commenced taking the compound. Possibly you may be interested in the forthcoming test and I will take pleasure in informing you of the outcome. In closing I will again say that I owe you my sincere thanks for the inestimable good that Paine's celery compound thas done for me, and rest assured I will lose no opportunity of recommending it to my friends and brother athletes. Very truly, CARL G. HERBERT.

To the reader: You would be strong and well. Paine's celery compound will enable you to be both. It will strengthen the nerves, purify the blood revive the lost energy-in a word, it will do more to counteract the oncoming of Ill-health, sickness, disease, than any other medicine in the world. There can be no possible reason for not testing the results in your own case.

# The Greatest Most Startling Fire Sale

Ever Held in Omaha.

All visitors to Omaha should visit the store at 1321 Douglas street, where the large and well known stock of the Model Clothing Co., which was damaged by smoke, fire and water on February 12th, 1899, is being sold at a very low fraction of its value. All damages having been adjusted by the insurance companies, the finest makes of clothing, gents' furnishing goods, boots, shoes, hats and caps are offered for sale at such ridiculously low prices that nowhere in the city the outside buyer can find such opportunities. Crowds are enormouscome early and avoid the rush, Below find list of few bargains.
