Serious Endeavor to Acquire the Art of Fascination-Cardinal Rules of Affinity-Quaint Collection of Eyes.

itself aristocratic investigate for instance the jewel boxes of many fine women and you will dishover that their favorise ornamenta have a deeper significance than it denire for decoration. To substantiate this It is easy to cite the honeymoon chains, the crystal lockets and the cameo brooches that appear so popular. A honeymoon chain is sure to adorn the neck of every newly married woman, especially when she cames back from her bridal trip. Mrs. George Vanderbilt, Mrs. Clarence Mackay and Mrs. John Livermore, all have them, the links of gold and the stones, three, seven, nine. fifteen, nineteen or twenty-one in number and widely varied.

Mrs. George Vanderbilt had the first chain and the lovely stones in it are, some of them. very precious and beautiful, some mero brown pebbles. They all commemorate a day of special happiness in her hencymoon travels, and her husband gave her every stone. There was a day in Vienna that is marked by a rich emerald, there was one on the shores of an Italian lake registered by a tiny round shell-white pebble and one at Capri recalled by a ball of the heaviest turquoise. When Mrs. Vanderbilt came home with her chain all the doting young husbands adopted the prefty idea and some of the chains are of gold punctuated with beautiful polished hits of black or pink marble, granite, crystal, agate, moonstones and river pearls reaped from a bridgl tour through our own states. Memorial Jewelry.

Queen Victoria established the procedent for the cameo bracelets and brooches, for it is the good widow's custom to have the head of every one of her beloved children in jewels before their marriage, so in case -
