NEW COLONIAL POSSESSIONS

Interesting Illustrated Lecture by Rev. J. H. Roy of Chicago.

DELIVERED IN CONGREGATIONAL CHURCH

About One Hundred Stereopticon Views Are Given—New Possessions, Good Field for Educated Southern Negroes.

"Our New Possessions—Porto Rico, Hawaii and the Philippines," was the subject of a most interesting illustrated lecture delivered last night at the Congregational church by Rev. J. H. Roy, D. D., of Chicago, representative of the American Missionary association. The stereopticon views of which there were about 100, were very fine. Dr. Roy is of the opinion that the new possessions would prove a valuable field for the educated negro of the south.

The speaker, who was also the author of a book on the subject, said that the United States owes Cuba a great debt in recognition of a wrong done in 1898. Following our successful revolution in the states of South America became also independent and the tide was flowing back across the isthmus when Bolivia proposed the releasing of Cuba from Spain and the emancipation of its slaves. A convention was proposed to meet at Panama in the year named, and upon instructions, John Quincy Adams nominated commissioners to the same, but our senate so loaded down the vote approving the delegation that the scheme was a failure and all in the interest of slavery in the United States.

Domestic soap whittens the clothes. Wadsworth goes to Des Moines. City attorney Wadsworth went to Des Moines last evening where he will argue the case in the Phillips-Reed city warrant case will be represented by W. S. Mayne. Special attention this time will be given to the argument to the new law applied to Council Bluffs, a matter which was overlooked in the former case and led to the unsatisfactory ruling of the supreme court and the necessity of instituting a new suit.

Cinderella ball, given by Mrs. Hande under the auspices of Unity guild, at Dohany's opera house, Wednesday, May 24.

Domestic soap sold by all grocers. Long Line of Litigation. Then commenced the long line of litigation. Actions were commenced in the federal court to appoint receivers for the Northern and Southern lines of the Credit Commutation company of Sioux City, owning the assets of the defunct Union Loan and Trust company, laid claim to the properties sold to Ted & Co. and finally the court appointed a receiver for the Sioux City and Northern one for each interest. Judge Warwick Hough of St. Louis was the representative of the commutation company and S. J. Beale of St. Paul for the other interests. All along the line of the Credit Commutation case has been felt, as he is said to own one-fourth of the Northern stock. In the foreclosure proceedings the question of ownership of the securities pledged to the Teds came up. The Sioux City company contended the collateral had been wrongfully hypothecated, and Judge Shires of the federal court held to the contrary. This case went to the United States court of appeals and here Judge Shires was practical at all times. Then the case went to the United States supreme court, with the same result.

RAILROAD PUT UP AT AUCTION

Sioux City, O'Neill & Western to Be Sold to the Highest Bidder.

SALE IS TO COME OFF NEXT FRIDAY

To Be Disposed of Under Foreclosure Proceedings on a Mortgage Held by the Manhattan Trust Company.

SIoux CITY, May 21.—(Special.)—At South Sioux City, Neb., Friday, May 26, a railway is to be sold to the highest bidder. This is the Sioux City, O'Neill & Western, commonly known as the Pacific Short Line, the road built by the late Donald McLean, who met such a tragic death in the Palmer house, Chicago, recently. This road and its sister, the Sioux City & Northern, have been the cause of almost endless litigation in the United States courts in the last seven years. Thousands of dollars have been spent in attorneys' fees and costs to settle title to the properties, and now it would seem that at last the Pacific Short Line is to pass into the hands of the Sioux City people. The road runs from South Sioux City, Neb., to O'Neill, Neb., a distance of 130 miles. The road is to be sold by E. S. Dundy, J., of Omaha, master in chancery, and will go to the highest bidder. It is expected J. Kennedy Tod & Co. of New York will come into possession of the property. The Tods now hold three-fourths of the stock of the Sioux City & Northern line. The Short Line is being sold under foreclosure proceedings in the case of the Manhattan Trust company, trustee for the Northern and Southern lines of the Credit Commutation company, against the Sioux City & Northern company and the three-quarters interest in the stock of the Sioux City & Northern. These were then pledged to J. Kennedy Tod & Co. to secure a loan of \$1,500,000. Finally, the Tods failed to pay the securities, and the Sioux City & Northern one for each interest. Judge Warwick Hough of St. Louis was the representative of the commutation company and S. J. Beale of St. Paul for the other interests. All along the line of the Credit Commutation case has been felt, as he is said to own one-fourth of the Northern stock. In the foreclosure proceedings the question of ownership of the securities pledged to the Tods came up. The Sioux City company contended the collateral had been wrongfully hypothecated, and Judge Shires of the federal court held to the contrary. This case went to the United States court of appeals and here Judge Shires was practical at all times. Then the case went to the United States supreme court, with the same result.

There are said to be only two leech farms in this country—one in this city and one in San Francisco. Their locations are kept secret to prevent complaint from residents in the neighborhood. A prominent physician, who fully denied the least knowledge of the whereabouts of the metropolitan establishment, informed the writer that there are as many as 50,000 leeches squirm carelessly around, over or through swamp lands, incessantly searching for some hapless unfortunate that chance may have fitted to furnish a feast for them. These leeches are mostly brought from France. In the surroundings of Bordeaux there are large areas of black, light ooze, in which leeches multiply without interference. When leeches are desired to send to New York or San Francisco men are hired whose poverty compels them to accept any chance. These men walk barelegged into the humidity of the swamp and their legs are immediately covered by the crawlers. But before they can move from place the skin they are swept off into pouches, from which they are counted out into boxes of wet moss and their native ooze. Imbedded in that way and carefully sealed they are transported in safety to any distance.

Work on Northwestern Extension. WALL LAKE, Ia., May 21.—On Thursday afternoon work on laying track for the new line of railroad, the Boyer Valley line, from Wall Lake to Denison, was commenced at this place. At 6 o'clock G. S. Wright, representative of the Iowa Leech & Spine and immediately afterwards a force of 100 men started to work laying the track.

Immunizing Allcock. There are many who have pains in the back and imagine that their kidneys are affected, while the only trouble is a rheumatism of the muscles, or, at worst, lumbago, that can be cured by the few applications of Chamberlain's Pain Balm or by dampening a piece of flannel with Pain Balm and binding it on over the affected parts.

CAPTURING LEECHES. Fifty Thousand of the Animals Collected in New York. It may not be generally known that Greater New York possesses a colony of 50,000 leeches. Leeches are not "good to eat." The slimy creatures are not "pretty to look upon either," and while it is true that they have a clinging disposition they can hardly be considered harmless household pets, says the New York Herald.

Still, leeches have their virtues. They come in handy in the treatment of bad bruises where quantities of cast-off blood have collected beneath the skin. Many a black eye has been checked through their kind offices.

Awful thought! Suppose the whole 50,000 now held in bondage at the New York leech farm should break loose at night and with their glutinous, blood-hungry insinuating crawl through cracks and crevices into the sleeping apartments of neighboring dwellings! This is just what happened to the waking tenants who lived near the San Francisco leech farm only a few years ago.

Hundreds of them crawled up the walls and tried every window and crevice, seeking an entrance because of some instinctive knowledge that in the houses they could find pasture upon the occupants.

A few found their way into sleeping chambers. One got out of the 6,000 which made up the population of the "Frisco colony." But even that number of snaky, black and green, creepy worms distributed about a couple of large tenements sufficed to terrify the inhabitants almost into fits when they felt the eager suction of the leeches and awoke to find themselves fastened with the ugly prolegs of the swampy ooze.

Paine's Electric Compound

is the Best Spring Medicine In The World.

It makes the weak strong. We sell and recommend it. Sherman & McConnell Drug Co.

I STAND ALONE!

Dr. Bennett's Electric Belt is the Only One in the World Absolutely Guaranteed to Cure in Every Case.

When manhood's characteristic energies have been dissipated by vicious excess, excessive worry, etc. Electricity is the only sure and permanent cure. Any conscientious physician will tell you this. Dr. Bennett's Electric Belt, a powerful and invigorating device—simply temporarily stimulates—they oppose not aid nature. Scarcely impregnated with electricity, it may be said, and permanently overpowered by the current of a good, strong, steady, never wavering, penetrating, and invigorating electric current.

DR. BENNETT'S ELECTRIC BELT you get just such a current, my belt supplies electricity in its purest form. It does not act for far as do galvanic belts. I have electric belts, but they do not burn and blister as do the bare butly galvanic belts. I have electric belts, but they do not burn and blister as do the bare butly galvanic belts. I have electric belts, but they do not burn and blister as do the bare butly galvanic belts.

spunge electrodes that keep open the pores of the skin and allows all the current to penetrate with other belts, the current is retained on the surface—hence the burn. I worked hard and studied for years to perfect my Electric Belt, and the result is what you see. It will do—therefore unhesitatingly guarantee a cure in every case where I recommend it. The treatment of my belt, if you do not get a good one, you will not get a good one. I will give you a good one. I will give you a good one. I will give you a good one.

Write or call upon me today—your case may reach the incurable stage before you know it. If you give out of an electric belt, you will find my New Hook About Electricity, a book that will give you the full story. Consultation and advice without cost. Remember, if my belt will not cure you I will tell you so. If you want to try one of the others I will loan you one. My belt is not sold in drug stores nor by agents; only by
