# Improving Prospects of Russian Grop Tend to Lower Wheat.

8

PORTION OF THE DECLINE IS RECOVERED

Other Grains Do Not Show Much Activity, Corn Ruling Dull with Fluctuation the Principal Feature in Oats.

CHICAGO, June 19 .- Reports of rain in Russia broke wheat 140 today, but good support resulted in a recovery of all but Sac of a decline. Corn was but slightly affected, closing unchanged Oats declined Provisions were irregular, but closed 255910c higher.

The confidence of wheat traders who have been buying on the belief that the Russian crop had been ruined by drouth was staggered at the opening by cables reporting good rains in some parts of the drouthstricken districts and by a break of 1%d at Liverpool. The news took 1c off the price of wheat on the curb and opening quotations of the regular session showed more decline, September starting at 77%9 77%c, compared with yesterday's closing price of 75%c. A brief recovery to 78c took price of 75%. A brief recovery to 132 100K place under buying by scalpers and moder-ate covering by shorts, but the decidedly bearish tone of domestic news soon checked buying. One of the most important factors was the enormous receipts at primary west-ern points-1.022,000 bu, against 103,000 the corresponding day of 1885. Minneapolis and Doluth receipts were 846 cars, compared with 956 hast week and 87 a year ago. Chi-cago receipts were 847 cars, seven of con-tract quality. The weather throughout the west and northwest was reported favorable. Clush demand here was rather slow and New York reported only twenty-eight loads worked for export. Scaboard clearances bi6,009 bu. Private advices from Russia said the reported rains came too late for any material benefit to the crop. The vis-lible supply showed an increase of but 326,-999 bu, a third of what had been expected. The huge primary receipts kept the market weak until late in the afternoon, when re-ports of hot winds in Kanaz and Nobraska caused some apprehensioh, on which Sepplace under buying by scalpers and modercaused some apprehension, on which Sep-tember rallied to 78% and closed at that

Corn as a whole was dull. The market Corn as a whole was dull. The market opened weak with wheat and liberal re-relpts and favorable weather. There was a good demand from all sources, however, and in the absence of any especial selling pressure prices soon recovered and the mar-ket ruled steady to the close, Country ac-ceptances were liberal. There was a good export demand, the seaboard reporting 150 loads taken for export. Receipts were 371 cars. September ranged from 34½c to 35%c and clored unchanged at 25%c. Oats was irregular; firm for July, but weak and lower for September. September was freely offered on the fine weather and the weakness of wheat. July was influ-enced y the moderate stocks and the good cash demand and closed ½c higher. Cash business of 250,000 bu. was reported here. Receipts were 24c cars. September ranged from 21%c to 22½/022%c and closed ¼0%c lower at 22%c. as a whole was dull. The market

lower at 22%c. Provisions, though dull, with the excep-

trovisions, though dull, with the excep-tion of a few minutes around the opening were steady later, but lower hog price had some effect. There was buying early by packers and later in the day local short covered moderately. Prices advanced a around, September pork closing 10c higher of \$50 December pork closing 10c higher vered moderately. Prices advanced all ound, September pork closing 10c higher \$5.50, September lard a shade higher at 1565,17% and September ribs 5c higher

at \$4.8714. Estimated receipts Tuesday: Wheat, 155 cars; corn, 1,040 cars; oats, 335 cars; hogs, 24,000 head

In the doldrums, with not enough headway to indicate in which direction its course shall be finally shaped. Dealings today con-tinued protoundly duil and outside of move-ments of a few special stocks which were influenced by individual causes the day's events were inconsequential. As is only natural in a market where the buying de-mand is practically nil, the drift of prices was downward, even with a very small body of offerings to weigh on the market. There was in addition the sympathetic ef-fect of an active liquidation, coupled with bear pressure in Steel and Wire. The net results for the day are losses in almost all cases and in quite a number of cases amount to as much as a point or over. Steel and Wire showed its weakness from the opening and dropped by successive stages without any determined support be-ing manifest to a level nearly M per share below the price of Saturday. The confu-sion and uncertainty as to the declaration of a dividend at the coming meeting, due to the conflicting utterances of those con-nected with the property, showing the ex-istence of a dispute among the directors themselves, are responsible for this weak-ness. Heavy lines of this stock were taken on by operators on the confident assump-tion that a dividend was to be declared. Tederal Steel and other stocks of com-panies in the steel trade dropped in sym-panies in the steel trade dropped is succharges was an influence and the bears sold trac-tice trailway strikes might spreat. The Baltimore & Ohio stocks were rather forse dropped of over 2 points. The temporary strength displayed by Sugar also served as a sustaining influence. The early dropp in het wheat market stiffened the grangers fo

narket. Prices of railroad bonds tended to fall.

The Commercial Advertiser's London financial cablegram says: "There was general depression in the markets here today and bear points were numercous. The Berlin discount rate was raised from 4 to 4½ per cent. The Transvaal news was distingent of the external debt. Spanish financial to cover sales of African mines and times, f They closed at 63. Americans sagged att for the state of the state o

and bear points were numerous. The Ber-lin discount rate was raised from 4 to 4½ per cent. The Transvaal news was dis-quieting, the emperor of Austria was ill. Paris was flat on the Spanish financial proposals for a tax on the internal debt and the attempt to impose the same tax on the external debt. Spanish 4s fell to 62%, but recovered to 63% on Paris buying to cover sales of African mines and tintos. They closed at 63. Americans sagged all day, closing at the worst. Batimore & Ohlo was notably weak on the bad April statement coming before the settlement, but there was good buying on the fall. Tintos were 44% on Paris sales, based on a rumor that the output will be taxed. Ana-condas were 107-16. Two nundred sixteen thousand pounds sterling of gold was bought from the bank; £45,000 arrived from Holland. Paris is still absorbing bars at 75e 944.

# folland. Paris is still absorbing bars at increased from 4 to 41/2 per cent. 78 9%d. The following are the closing quotations for the leading stocks on the New York exchange today:

# Cotton Market.

Cotton Market. NEW YORK, June 19.-On light Liverpool buying the cotton market opened steady in tone, with prices unchanged to 1 point lower. As the session progressed trading narrowed down to operations of scalpers and an effort of the prominent Wall street houses to dispose of July headings for re-investment in January. At no time during the day could speculation have been called active, nor did the course of values give the least idea as to the tendency of senti-ment generally. It was what brokers term 3.1133 4 59 the least idea as to the tendency of senti-ment generally. It was what brokers term "a 1-point market." Initial English cables reported well sus-tained prices for spot cotion at Liverpool, but less activity than expected and a nerveless sagging future department. The reverse was cabled from Manchester, trade being reported as heavy at strong prices. Domestic news held out no inducement of account to possible investors, indicating little if any change in the situation as a whole. With the weather south favorable the crop was said to be doing famously, though a superabundance of rain came to hand. Cotton goods were moving freely and spinners only controlled the cloth market. After a momentary flurry of activity, dur-ing which prices broke under liquidation, the local market for futures closed barely steads, 2 to 4 points lower.

BEGINS WAR ON SMALL FIRMS.

American Glass Company Seeking Ex-

termination of Minor Factories.

Notice has been served on distributors and

000,000. The notice, containing, as it does, a veiled threat to all jobbers and manufacturing consumers, such as sash, door and blind makers, that they may not buy this season out side of the combination, is attracting a great deal of attention in the trade and is creat ing a great anxiety on the part of all interests handling the product. To an outsider there is nothing in the communication except the ordinary honeyed words of the merchant hoping to extend his trade; but to those who are familiar with the matter there is no chance to mistake the fact that the combination is swinging a large club in a vigorous, determined and merciless man-

The club, which is not concealed from the trade, is in the granting of special rebates to these who begin with the opening of the 1899-1900 "fire" September 15 next, by buying all of their glass of the combine and continuing up to July 1 of next year. It will be observed that the rebates are with held for a period of nine and one-half months, so that the managers of the com-

bine will be in perfect position to know whether the buyer has kept faith with It or not. Better still-and here is the point that is giving the trade its anxiety-the tied-up rebates may represent the distributors' en tire profits for the trade year. While the combination allowed the dis

tributor who bought its products exclusively during the last year a fair margin of profit there is no guarantee that it will do the same this year. In fact, with the jobbers' capital in its own coffers, there is no reason why the combination should consult any

body except itself in this little matter, and this is one of the points over which the trade is doing some very painful wriggling. For the jobbers to go to any one of the few independent manufacturers of window glass for relief is to invite complications of a business nature that may turn out seriously for any distributor with the hardihood to break away from the combination Should the independent factory be unable to keep up with the trade requirements of the inbher-whose wants are usually too diversified to be met by any one factory-the jobber would be absolutely unable to fill orders and would have to turn his trade over to his competitors. To attempt to import is futile,

as the tariff gives to the home manufacturer a protection of 144 per cent. The freight rates make the difference even greater to trade centers well removed from the sea beard.

In order that the control of the market during the next year may be as absolute as it was last and that the speculating public may also contribute its capital to its sup port the officers of the American company are now arranging for a contolidation of all of the factories, independent and otherwise into a trust along the improved modern lines. For this purpose options have been eccured on 80 to 85 per cent of the capacity and these options are said to run to Octobel It will be observed that this is fifteen

days after the earliest date that glass making for the fire of 1899-1900 can be resumed and this of course leaves the present com pany a little leeway in which to operate toward the further confusion of its enemies The contemplated capital of the new or ganization is \$24,000,000, of which half will he common and half preferred stock. Th? capitalization will cover property that could be easily duplicated for \$1,000,000.

WASHINGTON, June 19 .- The Industrial

commission has somewhat changed its plan

for the work of the sub-commissions during

the appointment of special commissions to

investigate the elevator trust and the mining

ndustry west of the Mississippi river, and

instead authorizing all the regular sub-com-

missions to sit during July and August. Un.

der this arrangement the agricultural com-

mission will take up the elevator question,

going to the northwestern states for this

purpose, and the mining commission will go

west for the purpose of looking into the con-

ditions affecting mining in that region. The

latter commission will hold its first meeting

mission on manufacturers will make a tour

James Barrett, vice president of the

Georgia State Agricultural society, was the

only witness before the commission today. He spoke upon the agricultural conditions in

the south, saying they were worse today than they had ever been in the history of the country. He said the cotton interest was es-

pecially depressed, prices last year amount-

ing to a little over 4 cents a pound. At this

price a man could not save himself if he paid

wages amounting to more than \$3 a month. Planters generally pay about \$6 a month for

wages, and at such prices they could not

prevent loss if they received less than 6
