

PUBLIC CALLED UPON TO INSPECT IT

**Opening Will Be Made the Oceasion** for a Jollification Over the First Anniversary of a Bad Fire-Music by a Band.

LINCOLN, June 20 .- (Special.) - The new building of the Beatrice Creamery company, probably the largest and best equipped creamery establishment in the United States for the occasion and if the opening is attended by as many people as attended a similar event over a year ago the day will be a memorable one in the history of the company. The Beatrice Creamery company was organized in 1894 as a corporation with Messrs. Haskell and Bosworth as principal and controlling stockholders. At that time the office of the company was located in Beatrice, but the superior advantages of Lincoln in the way of better railroad facilitles induced the company to move the butter making plant to Lincoln.

building on North Tenth street, but the and Indianola. In 1880, just after the B. & business of the company expanded so rapidly The that another change was necessary. large Fitzgerald building at the foot of P street was leased and remodeled, fitted with improved machinery and arranged expressly of the B. & M., with headquarters at Linfor the concern. A month or so later the building was entirely destroyed by fire, together with all of the costly machinery. The debris was cleared away and the construction of the new building was commenced about eight months ago. Both the Wymore and the southern division hope to lot and the building are now owned by the company.

Nearly eighty skimming stations are operated in connection with the plant in this city. At these stations milk is purchased from farmers, put through machine separators, the cream sent to Lincoln and the milk returned to the original owner. Farmers realize about 2 cents per pound more by selling milk to the creamery than by making the butter themselves, and at the same time they are relieved of the necessary labor of churning. The output of the Beatrice Creamery company amounts to about 14,000 pounds of butter daily, or about five carloads per week. In addition to the manufacture of butter the firm also deals extensively in eggs, shipping from two and a half or three carloads of candled eggs per week. The plant and building are estimated to be worth about \$60,000.

The skimming stations operated in connection with the creamery are located in Nebraska, Kansas and Colorado. Nearly all of them are owned by private or separate companies, but are directly controlled by the Beatrice company. One man is employed at each station and at a few there are several men regularly employed.

#### Work of Supreme Court.

The supreme court is in session for the last time until September. The present sitting opened this morning and the entire time was taken up in the consideration of a few unimportant cases. The court is considering a motion to consolidate the case of Mayor Becker against the State with the case of Scott against Flowers, in both of which the constitutionality of the law empowering courts to send offenders who are under 21 years of age to the reform school is attacked. One is a criminal action and the other a civil suit.

Sixth District Polities. John G. Maher, chairman of the demo-

day. former market value. The equalized value of the real estate of the county is \$732,332. There are in the county 7,551 horses valued at \$75,510, 27,908 cattle at \$114,438. mules at \$4,415, 29,885 hogs at \$29,855 and 9,322 sheep at \$4,662. The county tax levy for the year 1899 is 20% mills. The board remitted the taxes on the Orphans' Home. which has been assessed for several years, and also the taxes on some real estate owned by several church organizations and not used by them as sites for houses of worship or parsonages. A big list of bills was allowed.
