AFRAID OF THE REPUBLICAN MAJORIT'

They May Possibly Concentrate Their Strength on One or Two Candidates-Republicans Are at Work on the Quiet.

LINCOLN, July 2 - (Special.) - The fusion forces of Lancaster county are undecided as to whether to nominate a full ticket for the coming fall campaign or to oucentrate their forces on one or two candidates, centering their fight on the weakest of the republican candidates. There has always been a good republican majority in Lancaster county, but the experience of the last few years indicates that politics does not enter into the consideration of a man's fitness for office as much as it did several years. ago. In one or two instances during the last few years, when men of not very good reputation were chosen by the republicans as candidates, the fusionists found it not very difficult to put in their own men. But this year the conditions are more favorable than ever for the success of the entire republican county ticket and the popocrats of the county, realizing this, will healtate before nominating a full set of candidates simply to be knocked down on election

They feel that they have too much to lose and consequently it is not probable that they will put a full ticket in the field. The offices to be filled are those of the county treasurer, county clerk, county judge, county sheriff, three judges of the district court and clerk of the district court, besides two justices of the peace and two constables. All the three judges now holding office are candidates for re-election on the repub-

The wiser heads of the fusion forces in Lancaster county are advocating the nomination of only three condidates-one for district judge, one for county judge and one for county treasurer. The hardest fight will be made for the election of their candidate for district judge if the present plans carry and the indications are that the contest will be close. In the event of the nomination of but one candidate for this posi tion there will be four men after the three offices. The fusion candidate, in addition to

eration may result in disruption in the ranks of the fusionists, as the three wings of the party are all clamoring for recognition on the ticket. If carried into effect i would be impossible, under the present plan. to apportion the nominations among the three parties, and it has already been hinted that if either of the three parties attempts to secure all of them, which the democrats will probably do, the others will withdraw their support. Should any one of the three parties withdraw its support it would, of course, destroy any chances of success, and this fact has not been lost sight of by those who have proposed the plan.

Republicans at Work.

All the republican candidates are working quietly and as yet the campaign has not commenced to warm up and, of course, will not until the opposition nominations are made. Their convention will not be held for several weeks, but in the meantime the republicans are doing good work in the country precincts. The democrats and populists have shown very little interest in the campaign so far and there are very few candidates for the different offices among their ranks.

As usual Lincoln will be especially quiet this summer and already people have commenced to leave to spend the remainder of the hot season at the various summer resorts. This year most of the pleasure-seekers will go either north or east, Wisconsin and Michigan being the most popular. With the exception of Prof. Hagenow's band concerts and the attractions at Lincoln park there will be no popular form of amusement in the city. Quite a number of Lincoln people have made preparations to spend considerable of their time at the Crete and Beatrice Chautauquas, and the Omaha exposition will also attract many from this city.

Coal May Go Up.

There is some possibility that the price of coal may take an upward turn in this city within the next few days and one dealer is of the opinion that hard coal will be selling for \$11 a ton next winter. On July 1, 1898. the price of hard coal in Chicago was quoted to dealers at \$4 per ton. Yesterday the Chicago quotation was \$5.25 and in addition to this advance there has been a 30 per cent increase in the freight rate, making the coal cost the dealers \$1.55 more per ton than it did a year ago. Dealers think this will result in a decrease in the amount of hard coal used and an increased demand for soft coal in the winter. It is believed the wholesalers in Chicago have formed a pool and those who have placed orders recently have found the wholesaiers singularly anxious that orders be divided with their rivals.

There has never been such a demand for improved residence property and conveniently located building lots in Lincoln during the past several years as there is at the present time. The owner of three cottages, the construction of which has just been completed, received nearly 100 applicants for them before their foundations were completed. One real estate dealer disposed of over \$70,000 worth of property during the

...AMUSEMENTS...

the only high class amusement resort open in the city Sunday night was packed to the doors by an audience that was unusually enthusiastic and demonstrative. With the exception of one act each of the seven on the bill met with hearty approval.

There are a number of distinct novelty acts upon the program that are very entertaining, being quite different from anything of the kind that has been seen upon any of the local vaudeville stages. The big hits of this week's bill are made by Macart's performing dogs and monkeys and John Le Clair, the novelty juggler. Macart's aggregation of canines was seen here during the last winter and includes the large African baboon which, according to the press agent of the theater, broke loose, became intoxicated and demolished things and stopped the cars, stoning the gendarmes generally about the theater. The big animal is still as funny as ever and some of the pranks he cuts up on the stage ington to catch a train. Attendance, 7,180 while his trainer's back is turned are ridiculously funny, and more so because it is evident that he is not taught to do them but is naturally mischievous. Some of the things done by the dogs, including boxing, turning somersaults, bicycle riding, etc., are very clever. John Le Clair presents the best juggling

act that has ever been seen in this city. It is quite unique in that he does not use the usually half dozen balls, but juggles everything else imaginable. He is billed as the human billiard table, and with pockets strapped upon his arms and around his waist he uses his body for a table. rolling the balls from one pocket into another. His balancing is very clever, Another novelty act is offered by Gertrude Haynes, who plays upon an instrument comprising pipe organ, xylophone, drums, cymbals, etc. She uses both hands Late last evening the generals held a con- and feet to play upon it and makes music

snake lifted itself up like a spiral, with its head poised nearly two feet from the ground, and held the woman motionless in its charm. This it repeated for a second time, coming still nearer to her before Colonel Bass came running back to her assistance. Seeing the danger the woman was in, the colonel picked up a large stick and began a savage attack upon the serpent Though he struck it several terrific blows Colonel Bass was unable to kill the charmer and the snake finally slipped noiselessly away and became lost to view in the thick undergrowth. It was some moments before the woman wholly recovered from the spell and began to realize the great danger she had been in. She is sure that the snake meant to do her injury and was charming her for that purpose.

Bicyclist's Feat. MILWAUKEE, Wis. July 2.—William T. Bottofson, secretary of the Mercury Cycling club, today rode to Racine and return on a bicycle without hand-bars. He made the ride without a fall or mishap and covered the distance, fifty-two miles, in three hours and twenty-seven minutes. The ride will be placed on record with the Century Road Club of America, under whose auspices the trip was made. It is doubtful if a similar feat was ever before attempted.
