

IN THE WORLD OF SPORT

Yale Proposes to Take a Brace in Athletics This Year.

OMAHA CRICKETERS TO GO TO WINNIPEG

They Will Be Handsomely Entertained by Representatives of Royalty on Their Trip to the Northwestern Capital.

Yale's decline in athletics seems to be arousing the alumni to action and convincing them that something radical must be done to save the institution from the chaos which has been gradually opening up before it.

PALAUVER OF THE PUGILISTS

Comments on the Handsome Kid and on the Coming Meeting of Jeffries and Sharkey.

"Jeffries doesn't seem so good to me since I saw him working out with his brother at the Boyd the other night," said the local pugilistic authority, Patsy Fallon, to a group of the followers of the pugilistic game.

the defeat of the Kangaroo. "I thought he would whip Jeffries because I had Jeffries too cheap. I never saw him put up his hands like he fought Fitz, and I draw my estimate of him from what I heard. Why, Joe Choyanski and Maher had Fitzsimmons within a few seconds of Queer street, and if Jim Corbett had followed his way of fighting he would have done the same at Carson City. I know that he cannot land any of those Rube swinges on me. I'm not knocking him now that he is licked, but I simply want to repeat what I have said for the past two years, and that is, that I'm too clever for such a swinging style of boxer as Fitzsimmons. Fitz is by no means clever, though I will admit that he's a hard puncher, and carries a round trip ticket to Queer street if he can track one of those swinges on you. He's been lucky in finding clever people with his swinges, but he ran short of luck when he went up against Jeffries."

ABOUT HORSES AND HORSEMEN

Speedy Ones Are Fast Getting Into Form and Approaching the Two-Minute Mark.

Over a dozen horses have stepped into the 2:15 list already this season.

Star Pointer is in great shape and can beat his latest workout of 2:17 1/2 ten or more seconds.

John R. Gentry keeps going down the scale as he has in the last few weeks, he is now about due for a mile in two minutes.

A reliable authority explains the apparent lack of form and speed of many western trotters and pacers taken east by stating that in the west we race for the purse, while down east they race for the money.

As a friend puts it, John R. Gentry has never been beaten in fast time. It is only when the handsome "red horse" is "off the legs and on to the straw" that second place is a rare thing for him.

White trotters and pacers that toe out interfere in front at times, they are frequently very speedy and far more serviceable than those horses that toe in.

In Russia they have a peculiar way of timing horses. Three minutes is called even time. When the horse trots in 2:28 they call it "without 32."

When the horse trots in 2:32 they call it "without 28." Six minutes is even time for two miles. If the horse trots in 5:05 they call it "without 55."

If he trots a quarter of a verst—that is one-sixth of a mile—in thirty seconds, they call that even time. In Chicago they call it "without five," that would be a 2:30 gait. There are no races for anything younger than 3-year-olds, and performers younger than 5-year-olds are not allowed to trot further than mile heats.

Mares over 8 years old are barred from all races.

MEN OF THE ROD AND GUN

More Parties Than Ever Have Gone on Fishing Excursions to the Favorite Resorts.

The Dupont Gun club will hold its regular weekly shoot for the medal across the river at the usual time.

The Young Men's Christian Association golf club held its regular shoot Friday afternoon.

W. D. and Mrs. Townsend, J. P. Smead, L. E. Lucas, Miss Carrie Olson and party leave tomorrow for a week's camp at Quinnebaugh.

P. Vanneburg and wife of Paxton & Gallinger, leave tomorrow for a short outing at Quinnebaugh.

Sam Becker of Atkinson is visiting W. D. Townsend of this city. Becker is a big rancher and enjoys shooting more than anything else.

Fred Goodrich and Purane left yesterday for Quinnebaugh to take some of the fannies from the spring. This is Fred's seventh trip to the spring to take fannies.

Pho Mo, member to be the place where the fishing parties from Omaha have the most success. Many large catches have been made there of late. John Brown of that place landed a five-pound bighorn last week.

Ed Krug is home from a two weeks' fish at Langdon, where he enjoyed most excellent sport.

CHESS.

Announcement is made that the Nebraska Chess association summer tournament will be held at Lincoln, Neb., August 7, 8, 9, and 10.

The following games have been completed in the Nebraska correspondence tournament: In section A, H. Hammond vs. J. P. Barron in thirty-seven moves, and C. L. Owen lost a two knights' defense to A. Rasmussen in twenty-seven moves.

In section B, F. W. Biddle won a Ruy Lopez from R. E. Brea in thirty-two moves, and W. R. Ellis won a Petroff's defense from A. F. Willis in thirty-three moves.

H. B. Hammond of Wymore is almost certain to win first place in section A of the Nebraska correspondence tournament. He has completed six out of seven games, winning five and drawing one.

Many chess players seem to dread defending against the Ruy Lopez opening and invent all sorts of moves to prevent White from adopting it.

Black's second move usually develops the knight to f3. If he plays 2... P-Q3, Philidor's defense results. If he plays 2... P-K3, the Damiano Gambit results.

2... Kt-K3 is about the worst possible move Black can make where White has opened 1... P-K4 and 2... Kt-K3, especially if the play

proceeds R-K1 x P, P x K1. The following game, played at the Lincoln Chess club not long since, is a fair sample of the difficulty Black gets into by taking the Kt.

Chess board diagram showing a game between White and Black. White pieces: P-K4, P-K3, P-Q3, P-Q4, P-R4, P-R3, P-B4, P-B3, P-N4, P-N3, P-K1, P-K2, P-Q1, P-Q2, P-R1, P-R2, P-B1, P-B2, P-N1, P-N2, P-K3, P-K4, P-Q3, P-Q4, P-R4, P-R3, P-B4, P-B3, P-N4, P-N3, P-K1, P-K2, P-Q1, P-Q2, P-R1, P-R2, P-B1, P-B2, P-N1, P-N2. Black pieces: P-K4, P-K3, P-Q3, P-Q4, P-R4, P-R3, P-B4, P-B3, P-N4, P-N3, P-K1, P-K2, P-Q1, P-Q2, P-R1, P-R2, P-B1, P-B2, P-N1, P-N2.

BRIEF BASE BALL GOSSIP

Omaha Brewing Association Team Goes to Denver This Week for Two Games.

Washington has tried twenty-five players to date and leads in that respect.

To the dyed-in-the-wool rooters no kind of ball is good ball except winning ball.

The Cudahy base ball team has received its new uniforms, which are a dark gray.

Company D, Seventh Infantry, team at Fort Crook has ordered new maroon uniforms.

Baltimore seems to make more runs on fewer base hits than any other team in the league.

The Omaha Brewing association team and the Yukon Girls play this afternoon at Nonpareil park.

The Colonels have established a new record. They played five men at shortstop in as many days, viz: Dexter, Huiswede, Bayer, Langford and Clarke.

Frank Selee let Lajoie slip away from him and took Fred Klobb. Lajoie today is the greatest second baseman in the league.

Manager Selee is satisfied enough with the way the Bostoners are playing and will continue to use his own head and disregard the mouthings of a few disgruntled critics.

The manager has piloted a few winners in his day and still knows a thing or two about the game.

In base ball much interest has been aroused over the number of changes in the pennant race. Chicago got up to second place and Philadelphia also occupied the same position at different times during last week.

Boston, however, jumped up next to the leaders, while Chicago passed Philadelphia finally and retained third place.

Manager Keith goes to Denver Friday with the Omaha Brewing association base ball team. They play two games with the Denver Athletic club team and return home, not stopping for a game either going or coming.

Scullly, who picked a game at the team at Denver.

IN THE WHEELING WORLD.

Entries are still coming in for the Blair road race to be held July 20. Many of the boys do not like the prospect of a hot day.

There are quite a number of riders who are wanted in this race who have not entered as yet. It is to be hoped that it will not be found necessary to invite them to do so.

This opportunity should not be missed. At present, the riders, of whom there are a good number in this party. There are old war horses and racing men from Omaha, rough riders from Council Bluffs, and festive wind-burners from other localities.

Every rider should be able to dismount on either side of the saddle. It requires a good deal of practice for it to be difficult for the average man or woman to reverse even a simple movement involving the use of the right leg in place of the left for the first time, but when you reflect that the ability to dismount on either side will at times prevent accidents, you will see that it is well worth practicing a little to obtain that ability.

The Sydney (Australia) cycle track has been lighted in a novel way by means of inverted arc lights. Fifty-five arc lights and seventy incandescents are placed around the track at intervals of thirty feet.

The transportation committee of the League of American Wheelmen is in receipt of scores of letters from wheelmen contemplating going to the national meet at Boston regarding railroad rates. They do not seem to realize that there is a flat one-fare rate for the round trip from a large part of the United States, and that this is one of the strong inducements for wheelmen to take part in the annual event.

The entertainment committee for the meet is working assiduously completing the details of the entertainments and has recently added a variety carnival to the program. This will be held on the Charles river. The all-night smoker will be held in Mechanics' pavilion, one of the largest buildings in Boston, and the program for it is now complete.

The bicycle, says the Manufacturer, took its beginnings in Europe—England—but when we once seized hold of it we distinguished ourselves in it as in everything else we undertake, by the tremendous energy with which we manufactured and improved and bought and rode this machine.

ing novelties for the tradesman and the rider. This rider would be looked up so as to be kept out of the business. He is one of the many lubbers that ruin the trade, and he cost you a tire in the first place and he might have caused you severe injury. He neglected to screw up the cone and the step on the left-hand side of the wheel struck the frame. The tire is torn all the way around. It will carry you home and that's all."

"Well, I got home and went to my regular repairer at the place where I got the wheel. Before I spoke a word he said: 'That's what you get for going to lubbers for bicycle work.' No doubt my trouble was all due to the neglect of that rider man to screw up one nut, but wouldn't riders have more confidence in them if the repair men did not knock each other so much? I'm afraid to trust any of them now, because every one denounces all the others as incompetent."

Jimmie Michaels, the midget champion, made his first successful effort as a coach at Torrington, Conn., on the Fourth. Thousands paid to see the little chap ride the horses. He rode in two races and won both. The first was a half-mile dash, which he won by a neck in a drive. The second was at five furlongs and he won by a length in a drive. In both he got to the front as soon as he could and stayed there to the end. His riding style is compared to that of Tod Sloan, well forward and in a crouching position on the horse's shoulders.

He was highly elated with his success and after weighing in after the second race remarked, enthusiastically, that "riding horses beats riding a bicycle."

Eastward and westward the American bicycle takes its way. The Treasury Bureau of Statistics at Washington reports that the world, from the jungles of Africa to the wilds of Central America, four million dollars' worth of American bicycles were sold to European countries during the past fiscal year, and more than twice as many were shipped to France, despite her skilled workmen and ingenuity, as were exported to that country during the preceding year. Two million of our bicycles are sent to countries which make a specialty of manufacturing.

Even Japan, with its cheap labor, is constantly increasing its imports of American wheels. Our largest customer is Great Britain, which took nearly \$2,000,000 worth of American bicycles last year. Germany comes next and Canada, then the British islands, British East Indies, Japan, China, Dutch East Indies and Africa following in the order of the amount of their purchases. Since Cuba has become free we have shipped to it eight times as many bicycles as formerly.

Porto Rico and the Hawaiian islands are good customers, though no direct exportation of the bicycles is thus far reported. America leads the world in the manufacture and sale of the best of everything.

The Globe-Democrat reports that interest in cycle racing in St. Louis is practically dead. The editor of the Globe-Democrat writes: "It is not at all likely," says the G. D., "that any bicycle promoters will care to risk their money in further attempts to conduct cycle races in St. Louis, at least for some time to come. Of course, the races did not run on a business basis, but they did not have much to draw from. Had the Fourth been fine the promoters would probably have cleared expenses, but there was nothing like the enthusiastic interest which used to mark cycling tournaments in the past. The cause of the decline can be traced directly to the bolt of the riders. To be sure they had many grievances against the League, but the promoters would get behind them and follow their pace and then spurt by them on the finish. On this account the race will be changed as follows:

The men will be started ten minutes apart, and the best time made will win the money. At present, they picked a game at the team at Denver.

There are quite a number of riders who are wanted in this race who have not entered as yet. It is to be hoped that it will not be found necessary to invite them to do so.

This opportunity should not be missed. At present, the riders, of whom there are a good number in this party. There are old war horses and racing men from Omaha, rough riders from Council Bluffs, and festive wind-burners from other localities.

Every rider should be able to dismount on either side of the saddle. SEWING MACHINES. \$16.00—Box top Singer, new. \$31.00—Drop head Singer, new, latest improved, vibrating, high arm. \$8.00—Second-hand Davis upper feed, in good shape. \$5.00—Second-hand White. \$4.00—Second-hand Wheeler & Wilson.

Nebraska Cycle Co., Cor. 15th and Harney. Geo. E. Mickel, Manager.

allment and his condition is considerably improved, although he is weaker than the lack of nutritious food. Throughout the fast Mr. Parry has not been confined to his bed and short walks have been taken by him daily. Perhaps the most serious effect left upon him is the slight falling of his eyelids, attendant upon his weak condition. It is expected he will recover this as he again receives his strength. For the first day or two Mr. Parry experienced intense hunger, but that soon left him and he was quite comfortable for some time after, until his weakened condition gave him discomfort.

LABOR AND INDUSTRY. The cotton, carpet and hosiery mills of Lowell, Mass., are enjoying a season of noteworthy activity. In the former districts of Russia it costs 33 cents to hire a horse for one day and 24 cents to hire a man. The clothing of Lawrence, Mass., will join the closing movement and grant the Wednesday half-holiday to the clerks. A successful firm of tea merchants in London is composed entirely of women. The blenders, tasters and packers are also women. Label stickers in the canneries are now face to face with a machine which will label 10,000 cans in ten hours, which does not give the hand worker much of a chance. Los Angeles draws its electricity from a turbulent mountain river ninety miles away. The 12,000 horse-power runs street cars and machinery and supplies the city with light and heat.

Seven million yards of ribbons were manufactured in Pennsylvania last year, the product being double that of the previous year. The value of the entire silk production for the year was \$2,284,400, an increase for the year of more than \$500,000. Journeymen bakers are agitating the abolition of night work, arguing that nothing would contribute so much to the elevation of the baking trade, the efficiency of service to the public, the well-being and health of the workers in bakeries, the respectability and social standing of the employees and the whole craft, than day work. About 5,000 employees were benefited by the recent reduction in working hours from ten to nine hours a day in the breweries of Milwaukee. There was no corresponding reduction in wages and the brewers thus lost 750,000 hours of work in a year that would otherwise have been performed. The brewery workers, brewery teamsters, firemen, engineers, mailsters and others have had concessions granted, but greater than all the other concessions was that made last year for the year was \$2,284,400, an increase for the year of more than \$500,000. Journeymen bakers are agitating the abolition of night work, arguing that nothing would contribute so much to the elevation of the baking trade, the efficiency of service to the public, the well-being and health of the workers in bakeries, the respectability and social standing of the employees and the whole craft, than day work.

Rev. J. Hughes Parry, pastor of the Moriah church, Utica, N. Y., broke his long fast at 11 a. m. Saturday, July 7. From May 15 until Saturday morning—forty-eight days—he subsisted entirely on water and a morsel of food touched his lips. He fasted in the hope of relieving a chronic

SEND YOUR NAME TO Dr. Bennett and he will forward you by return mail, his book, "The Findings of the Fountain of Eternal Youth," symptom blanks, etc. You will receive lots of good wholesome advice whether you begin my treatment or not. Dr. Bennett's Electric Belt Restores the health, strength and vigor of youth; creates new fluid and brain matter by purifying the blood, restoring the fullness and most vigorous conditions of robust health of body and mind; cures all nervous diseases, is pursued with confidence and pleasure. It is today the best known agent for applying electricity to the human system, as recommended by the highest medical authorities. I guarantee it a cure for all nervous diseases, cure Shrunken and Undeveloped Testes and Lost Vigor; cure Kidney, Liver and Bladder Troubles, Constipation, Dyspepsia and all Female Complaints. My Belt has soft, silken, chambray-covered sponge electrodes that cannot burn or blister, as do the bare metal electrodes used on all other makes of belts. These electrodes are my exclusive patent. There are cheap imitations. Do not be misled. Get the genuine. My Belt has made cures in every town and city in this state. Be sure and write or order today, and get my book, testimonials, etc. My Electrical Suspensory for the radical cure of the various weaknesses of men is FREE to every male purchaser of one of my Belts. Rooms, 20 and 21 Douglas Block. 16th and Dodge Sts., Omaha, Neb.
